270 Michigan Avenue  
Buffalo, NY 14203-2999

**Re:    Quarterly Progress Report, April through June 2015  
NYSDEC Site 9-15-066, Cheektowaga, New York**

Dear Mr. Loey:

On behalf of CBS Corporation (CBS) and the Niagara Frontier Transportation Authority (NFTA), CBS submits this progress report on activities undertaken in during the second quarter of 2015 at New York State Department of Environmental Conservation (NYSDEC) Site No. 9-15-066 in Cheektowaga, New York (the Site) pursuant to the Order on Consent and Settlement Agreement, Index No. B9-0381-91-8, entered with NYSDEC (the Order). Under agreements among the Respondents to the Order, CBS is managing the Remedial Program, including the post-closure monitoring related to the Operable Unit 2 (OU2) groundwater collection and treatment system. This progress report also provides the results from the third round of post-closure groundwater and storm sewer (surface water) monitoring.

**1.     Site Activities and Status**

- A.     On May 10, 2015, CBS submitted to NYSDEC a quarterly progress report on the status of activities at the Site during the first quarter of 2015 (*i.e.*, January through March 2015).<sup>1</sup>
- B.     On May 19, 2015, GHD, Ltd. (GHD), formerly known as Conestoga-Rovers & Associates, surveyed and inspected the groundwater monitoring well network at the Site.

---

<sup>1</sup> Because of adverse winter weather conditions and accumulated snow, the first quarter 2015 (second post-closure round) groundwater and storm sewer sampling could not be conducted until April 1, 2015. The results of the April 2015 sampling were provided in the progress report submitted May 10, 2015.

- C. On June 18, 2015, GHD conducted the third round of quarterly post-closure groundwater and storm sewer (surface water) sampling.
- D. TestAmerica Laboratories, Inc. (TestAmerica) completed the analyses of the groundwater and storm sewer (surface water) samples that were collected on June 18, 2015. GHD conducted data validation and usability evaluations.

## **2. Sampling Results and Other Site Data**

- A. Table 1 presents a summary of monitoring well observations and survey data from the May 19, 2015 inspections.
- B. Table 2 presents groundwater elevations over the course of post-closure groundwater monitoring, including the data collected from the most recent (June 18, 2015) measurements.
- C. Table 3 presents the results of the June 2015 groundwater sampling. As shown in this table, none of the monitored volatile organic compounds (VOCs) was detected at concentrations above their respective remedial action objectives (RAOs). Lead was detected at well MW-5 at a concentration of 150 micrograms per liter ( $\mu\text{g}/\text{L}$ ), compared to the lead RAO of 25  $\mu\text{g}/\text{L}$ . In past monitoring, the lead concentration at MW-5 had twice exceeded the lead RAO in 2004 and 2005, but concentrations have been below the RAO since that time. The cause of these sporadic elevated concentrations is not known.
- D. Tables 4 through 6 present the results of the June 2015 surface water sampling. Sampling locations are shown in Figure 1. As indicated in these tables, low constituent concentrations are evident in the area of the 001 segment of the former collection system and the western portion of the 003 segment (*i.e.*, Manholes MH-3B and MH-3C). Higher (and variable) constituent concentrations are present in the area of the 002 segment and the eastern portion of the 003 segment (*i.e.*, Manhole MH-3A). Additional rounds of data are needed to assess trends in post-closure constituent concentrations in surface water.
- E. Attachments A and B provide the analytical laboratory reports for the groundwater and storm sewer samples collected in June 2015, respectively.
- F. Attachment C provides the data validation and usability evaluation for the samples collected in June 2015.

Mr. David P. Locey

July 31, 2015

Page 3

### **3. Upcoming Activities**

- A. CBS will continue the quarterly OU2 post-closure groundwater and storm sewer monitoring.
- B. As analytical data are developed and evaluated, GHD will submit electronic data deliverables (EDDs) for incorporation of Site data into the NYSDEC EQuIS database.<sup>2</sup>

### **4. Technical and Schedule Issues**

- A. There are no unresolved technical or operational issues affecting the OU2 post-closure groundwater and storm sewer monitoring.

We trust this submittal satisfies your requirements at this time. If you have questions regarding this progress report or other project matters, please do not hesitate to contact me.

Respectfully submitted,

Leo M. Brausch  
Consultant/Project Engineer  
Environmental Remediation

---

<sup>2</sup> The EDD for the June 2015 groundwater and surface water sampling data was submitted to NYSDEC on July 23, 2015.

## **TABLES**

**Table 1**  
**Monitoring Well Summary - May 2015**  
**Site No. 9-15-066, Cheektowaga, New York**

Well Number	Well Location (ft)		Ground Elevation (ft-msl)	Well Riser Elevation (ft-msl)	Riser Diameter (inches)	Well Condition	Notes
	Northing	Easting					
MW-2	1069009.41	1109549.37	692.16	691.81	2	Good	
MW-5	1068724.32	1110121.23	688.21	685.93	2	Good	New 2-inch J-Plug needed; consider extending riser 3 feet to ground.
MW-28	1068886.73	1109522.21	689.26	688.27	2	Fair	New surface cap needed (5.25-inch diameter threaded clean out cap).
MW-30	1069042.32	1111369.94	695.54	694.81	2	Good	Protective casing full of water to below top of well riser.
MW-31	1068844.34	1110710.31	688.46	687.22	2	Good	Mud to top of well riser; J-plug is tight.
MW-32	1071284.60	1110644.80	711.37	710.71	2	Good	
MW-33	1070266.23	1111810.27	713.34	712.50	2	Good	New 2-inch J-Plug needed.
MW-34S	1069319.02	1111862.87	703.81	702.93	2	Good	
MW-34D	1069295.12	1111850.96	703.23	701.79	4	Good	
MW-35	1069123.81	1111642.32	698.86	698.46	2	Good	

Notes :

1. Well elevations and locations surveyed by CRA on 05/19/15.
2. Well conditions observed and noted by CRA on 05/19/15.

Notes:

1. For manhole locations, see Figure 1.
2. "NA" indicates not available.
3. Data Legend:  
*Detections and estimated values are in **bold-face** type.*  
*Data Qualifiers:*  
*U - not detected at indicated reporting limit (RL).*  
*J - estimated concentration.*  
*B - constituent detected in corresponding blank sample.*

# Case Narrative

Client: Leo Brausch Consulting  
Project/Site: Buffalo Airport

TestAmerica Job ID: 180-45236-1

## Job ID: 180-45236-1

Laboratory: TestAmerica Pittsburgh

### Narrative

#### Job Narrative 180-45236-1

### Receipt

The samples were received on 6/19/2015 9:15 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.5° C.

The chain of custody did not list a sampling time for sample TB-18036-061815-DJT. The earliest sample time was logged in for this sample.

### GC/MS VOA

Internal standard (ISTD) response for TBA d9 for the following sample was outside acceptance criteria: WG-18036-061815-SG-009 (180-45236-10). This ISTD does not correspond to any of the requested target compounds; therefore, the results have been reported.

### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

# Definitions/Glossary

Client: Leo Brausch Consulting  
Project/Site: Buffalo Airport

TestAmerica Job ID: 180-45236-1

## Qualifiers

### GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

### Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

# Certification Summary

Client: Leo Brausch Consulting  
Project/Site: Buffalo Airport

TestAmerica Job ID: 180-45236-1

## Laboratory: TestAmerica Pittsburgh

All certifications held by this laboratory are listed. Not all certifications are applicable to this report.

Job Number: 180-45236-1

**Login Number: 45236**

**List Source: TestAmerica Pittsburgh**

**List Number: 1**

**Creator: Watson, Debbie**

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	False	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

TestAmerica Job ID: 180-45232-1

## Job ID: 180-45232-1

Laboratory: TestAmerica Pittsburgh

### Narrative

#### Job Narrative 180-45232-1

### Receipt

The samples were received on 6/19/2015 9:15 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 2 coolers at receipt time were 3.0° C and 4.3° C.

The chain of custody did not list a sampling time for sample TB-18036-061815-01. The earliest sample time was logged in for this sample.

The chain of custody listed a sampling time of 10:15 for sample SW-18036-061815-004 and 10:00 for sample SW-18036-061815-005. The sample containers listed the times as 10:00 and 10:15 respectively. .The sampling times were logged on off of the chain of custody.

### GC/MS VOA

The following samples was diluted to bring the concentration of target analytes within the calibration range: SW-18036-061815-004 (180-45232-4), SW-18036-061815-005 (180-45232-5), SW-18036-061815-006 (180-45232-6), SW-18036-061815-007 (180-45232-7) and SW-18036-061815-008 (180-45232-8). Elevated reporting limits are provided.

### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

### General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

# Definitions/Glossary

Client: Leo Brausch Consulting  
Project/Site: Buffalo Airport

TestAmerica Job ID: 180-45232-1

## Qualifiers

### GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
E	Result exceeded calibration range.

### Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

### General Chemistry

Qualifier	Qualifier Description
HF	Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.
U	Indicates the analyte was analyzed for but not detected.

## Glossary

**Abbreviation** These commonly used abbreviations may or may not be present in this report.

¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

# Certification Summary

Client: Leo Brausch Consulting  
Project/Site: Buffalo Airport

TestAmerica Job ID: 180-45232-1

## Laboratory: TestAmerica Pittsburgh

Unless otherwise noted, all analytes for this laboratory were covered under each certification below.

Authority	Program	EPA Region	Certification ID	Expiration Date
New York	NELAP	2	11182	03-31-16

The following analytes are included in this report, but are not certified under this certification:

Analysis Method	Prep Method	Matrix	Analyte
SM 4500 H+ B		Water	pH

## Login Sample Receipt Checklist

Client: Leo Brausch Consulting

Job Number: 180-45232-1

**Login Number: 45232**

**List Source: TestAmerica Pittsburgh**

**List Number: 1**

**Creator: Watson, Debbie**

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	False	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Re: **Analytical Results and Reduced Validation  
Groundwater and Surface Water Monitoring Program  
CBS Corporation Airport Site – Cheektowaga, New York  
June 2015**

---

## 1. Introduction

The following document details a reduced validation of analytical results for surface water and groundwater samples collected at the Cheektowaga, New York Site on June 18, 2015. Samples were submitted to TestAmerica Laboratories, Inc. (TA), located in Pittsburgh, Pennsylvania. A sample collection and analysis summary is presented in Table 1. A summary of the analytical methodology is presented in Table 2.

Standard GHD deliverables were submitted by the laboratory. The final results and supporting quality assurance/quality control (QA/QC) data were assessed. Evaluation of the data was based on information obtained from the chain of custody forms, finished report forms, method blank data, duplicate data, recovery data from surrogate spikes, laboratory control samples (LCS), matrix spikes (MS); and field QC samples.

The QA/QC criteria by which these data have been assessed are outlined in the analytical methods referenced in Table 2 and applicable guidance from the documents entitled:

- i) "USEPA Contract Laboratory Program National Functional Guidelines for Inorganic Superfund Data Review", United States Environmental Protection Agency (USEPA) 540 R 10 011, January 2010
- ii) "USEPA Contract Laboratory Program National Functional Guidelines for Superfund Organic Methods Data Review", USEPA 540 R 08 01, June 2008
- iii) "Groundwater and Surface Water Monitoring Program Quality Assurance Project Plan", September 2014

## 2. Sample Holding Time and Preservation

The sample holding time criteria for the analyses are summarized in Table 2. Sample chain of custody documents and analytical reports were used to determine sample holding times. All samples were analyzed within the required holding times except pH. pH is a field parameter, and the associated laboratory results were qualified as estimated (see Table 3).

All samples were properly preserved, delivered on ice, and stored by the laboratory at the required temperature (0-6°C).

### 3. Laboratory Method Blank Analyses

Method blanks are prepared from a purified matrix and analyzed with investigative samples to determine the existence and magnitude of sample contamination introduced during the analytical procedures.

For this study, laboratory method blanks were analyzed at a minimum frequency of 1 per 20 investigative samples and/or 1 per analytical batch.

All method blank results were non-detect, indicating that laboratory contamination was not a factor for this investigation.

### 4. Surrogate Spike Recoveries - Organic Analyses

In accordance with the methods employed, all samples, blanks, and QC samples analyzed for organics are spiked with surrogate compounds prior to sample analysis. Surrogate recoveries provide a means to evaluate the effects of laboratory performance on individual sample matrices.

All samples submitted for volatile organic compound (VOC) determinations were spiked with the appropriate number of surrogate compounds prior to sample analysis.

Surrogate recoveries were assessed against laboratory control limits. All surrogate recoveries met the above criteria.

### 5. Laboratory Control Sample Analyses

LCS are prepared and analyzed as samples to assess the analytical efficiencies of the methods employed, independent of sample matrix effects.

For this study, LCS were analyzed at a minimum frequency of 1 per 20 investigative samples and/or 1 per analytical batch.

#### 5.1      **Organic Analyses**

The LCS contained all compounds of interest. All LCS recoveries were within the laboratory control limits, demonstrating acceptable analytical accuracy.

#### 5.2      **Inorganic Analyses**

The LCS contained all analytes of interest. LCS recoveries were assessed per the "Guidelines". All LCS recoveries were within the control limits, demonstrating acceptable analytical accuracy.

## **6. Matrix Spike/Matrix Spike Duplicate (MS/MSD) Analyses**

To evaluate the effects of sample matrices on the preparatory procedures, measurement procedures, and accuracy of a particular analysis, samples are spiked with a known concentration of the analyte of concern and analyzed as MS/MSD samples. The relative percent difference (RPD) between the MS and MSD is used to assess analytical precision.

MS/MSD analyses were performed as specified in Table 1. The laboratory performed additional site-specific MS/MSD analyses internally.

### **6.1      Organic Analyses**

The MS/MSD samples were spiked with all compounds of interest. All percent recoveries and RPD values were within the laboratory control limits, demonstrating acceptable analytical accuracy and precision.

### **6.2      Inorganic Analyses**

The MS/MSD samples were spiked with the analytes of interest, and the results were evaluated using the "Guidelines". All percent recoveries and RPD values were within the control limits, demonstrating acceptable analytical accuracy and precision.

## **7. Duplicate Sample Analyses – Inorganic Analyses**

Analytical precision is evaluated based on the analysis of laboratory duplicate samples. For this study, duplicate samples were prepared and analyzed by the laboratory as specified in Table 1. The laboratory performed additional site-specific duplicate analyses internally. The duplicate results were evaluated per the "Guidelines". All duplicate analyses performed were acceptable, demonstrating acceptable analytical precision.

## **8. Field QA/QC Samples**

The field QA/QC consisted of two trip blank samples and two field duplicate sample sets.

### **8.1      Trip Blank Sample Analysis**

To evaluate contamination from sample collection, transportation, storage, and analytical activities, two trip blanks were submitted to the laboratory for VOC analysis. All results were non-detect for the compounds of interest.

### **8.2      Field Duplicate Sample Analysis**

To assess the analytical and sampling protocol precision, two field duplicate sample sets were collected and submitted "blind" to the laboratory, as specified in Table 1. The RPDs associated with these duplicate samples must be less than 50 percent for water samples. If the reported concentration in either the investigative sample or its duplicate is less than five times the practical quantitation limit (PQL), the evaluation criterion is one times the PQL value.

All field duplicate results were within acceptable agreement, demonstrating acceptable sampling and analytical precision.

## 9. Analyte Reporting

The laboratory reported detected results down to the laboratory's method detection limit (MDL) for each analyte. Positive analyte detections less than the report limit (RL) but greater than the MDL were qualified as estimated (J) unless qualified otherwise in this memorandum.

## 10. Conclusion

Based on the assessment detailed in the foregoing, the data are acceptable with the noted qualifications. These qualifications have been applied to the electronic files provided by the laboratory.
