APPENDIX L

DATA PRESENTATION TABLES

DATA QUALIFIER SUMMARY EXPLANATION

Qualifier Organic Results

- J - Reported concentration is estimated.
- D - Reported concentration was obtained through subsequent dilution of the sample.
- N - Reported compound is presumed to be present based on analytical evidence.
- X - Non specific qualifier applied by laboratory, generally indicates difficulty in chromatographic separation of compounds.

Inorganic Results

- J - Reported concentration is estimated.
- B - Reported concentration is less than contract required detection limit but greater than or equal to instrument detection limit.
- * - Duplicate analysis was not within control limits.
- E - Reported concentration is estimated due to matrix interference.
- N - Spike sample recovery not within control limits.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (ab) - Sample value exceeds both evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a) or (b) or (ab) - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (ab) - Sample value exceeds both evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a) or (b) or (ab) - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (ab) - Sample value exceeds both evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a) or (b) or (ab) - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (ab) - Sample value exceeds both evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a) or (b) or (ab) - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (ab) - Sample value exceeds both evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a) or (b) or (ab) - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

STANDARDS FOOTNOTES:

- * - Tentative value.
- ** - As total chlordane.
- *** - As 2,4'- and 4,4'-DDT.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (c) - Sample value exceeds the third evaluation criterion.
- (ab) - Sample value exceeds the first and second evaluation criteria.
- (bc) - Sample value exceeds the second and third evaluation criteria.
- (ac) - Sample value exceeds the first and third evaluation criteria.
- (abc) - Sample value exceeds the first, second, and third evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a), (b), etc. - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (c) - Sample value exceeds the third evaluation criterion.
- (ab) - Sample value exceeds the first and second evaluation criteria.
- (bc) - Sample value exceeds the second and third evaluation criteria.
- (ac) - Sample value exceeds the first and third evaluation criteria.
- (abc) - Sample value exceeds the first, second, and third evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a), (b), etc. - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (ab) - Sample value exceeds both evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a) or (b) or (ab) - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (ab) - Sample value exceeds both evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a) or (b) or (ab) - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (ab) - Sample value exceeds both evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank
-
- (a) or (b) or (ab)
- The compound or analyte was not analyzed.
- The compound or analyte was not detected.
- The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

STANDARDS FOOTNOTES:

* - Trans only.

FLAGS:

(a) - Sample value exceeds the first evaluation criterion.
(b) - Sample value exceeds the second evaluation criterion.
(ab) - Sample value exceeds both evaluation criteria.

ABSENCE OF SAMPLE DATA:

N/A or a blank - The compound or analyte was not analyzed.
----- - The compound or analyte was not detected.
----- (a) or (b) or (ab) - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (ab) - Sample value exceeds both evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a) or (b) or (ab) - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

STANDARDS FOOTNOTES:

- ** - Standard is for the sum of 1,2- and 1,4-dichlorobenzene.
 *** - Standard is for phenolic compounds (total phenols).
 **** - Chemical-specific standard noted as not detectable by the tests specified or approved in NYSCRR Title 6, Chapter X, Part 700, thus standard value defaulted to standard for principle organic contaminant classes.
 ***** - Standard as chlordane.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
 (b) - Sample value exceeds the second evaluation criterion.
 (c) - Sample value exceeds the third evaluation criterion.
 (ab) - Sample value exceeds the first and second evaluation criteria.
 (bc) - Sample value exceeds the second and third evaluation criteria.
 (ac) - Sample value exceeds the first and third evaluation criteria.
 (abc) - Sample value exceeds the first, second, and third evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
 ----- - The compound or analyte was not detected.
 ----- (a), (b), etc. - The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

STANDARDS FOOTNOTES:

- * - Dissolved form.
- ** - Standard for iron and manganese (together) is 500 ug/l.
- *** - Acid-soluble form.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (c) - Sample value exceeds the third evaluation criterion.
- (ab) - Sample value exceeds the first and second evaluation criteria.
- (bc) - Sample value exceeds the second and third evaluation criteria.
- (ac) - Sample value exceeds the first and third evaluation criteria.
- (abc) - Sample value exceeds the first, second, and third evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank
-
- (a), (b), etc.
- The compound or analyte was not analyzed.
- The compound or analyte was not detected.
- The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

STANDARDS FOOTNOTES:

- ** - Standard is for the sum of 1,2- and 1,4-dichlorobenzene.
- *** - Standard is for phenolic compounds (total phenols).
- **** - Chemical-specific standard noted as not detectable by the tests specified or approved in NYSCRR Title 6, Chapter X, Part 700, thus standard value defaulted to standard for principle organic contaminant classes.
- ***** - Standard as chlordane.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (c) - Sample value exceeds the third evaluation criterion.
- (ab) - Sample value exceeds the first and second evaluation criteria.
- (bc) - Sample value exceeds the second and third evaluation criteria.
- (ac) - Sample value exceeds the first and third evaluation criteria.
- (abc) - Sample value exceeds the first, second, and third evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank
-
- (a), (b), etc.
- The compound or analyte was not analyzed.
- The compound or analyte was not detected.
- The non-detected value exceeds the evaluation criteria.

DATA EVALUATION QUALIFIERS:

Please refer to the Data Qualifiers Table at the front of this section.

STANDARDS FOOTNOTES:

- ** - Standard is for the sum of 1,2- and 1,4-dichlorobenzene.
- *** - Standard is for phenolic compounds (total phenols).
- **** - Chemical-specific standard noted as not detectable by the tests specified or approved in NYSCRR Title 6, Chapter X, Part 700, thus standard value defaulted to standard for principle organic contaminant classes.
- ***** - Standard as chlordane.

FLAGS:

- (a) - Sample value exceeds the first evaluation criterion.
- (b) - Sample value exceeds the second evaluation criterion.
- (c) - Sample value exceeds the third evaluation criterion.
- (ab) - Sample value exceeds the first and second evaluation criteria.
- (bc) - Sample value exceeds the second and third evaluation criteria.
- (ac) - Sample value exceeds the first and third evaluation criteria.
- (abc) - Sample value exceeds the first, second, and third evaluation criteria.

ABSENCE OF SAMPLE DATA:

- N/A or a blank - The compound or analyte was not analyzed.
- - The compound or analyte was not detected.
- (a), (b), etc. - The non-detected value exceeds the evaluation criteria.

CDM FEDERAL'S RESPONSE TO
EPA'S COMMENTS ON THE
DRAFT RI REPORT

125 Maiden Lane, 5th Floor
New York, New York 10038
Tel: 212 785-9123 Fax: 212 785-6114

September 20, 1996

Ms. Gloria Sosa
U.S. Environmental Protection Agency
Remedial Project Manager
29 Broadway
New York, New York 10007-1866

PROJECT	Forest Glen Site Work Assignment No 053-2L3U ARCS II, EPA Contract No. 68-W9-0024
DOCUMENT CONTROL NO	7720-053-EP-CLQB
SUBJECT	Response to EPA Comments on the Draft Forest Glen Remedial Investigation Report (dated April 15, 1996)

Dear Ms Sosa

CDM Federal Programs Corporation's (CDM Federal) received EPA's comments on the Draft Remedial Investigation (RI) Report for the Forest Glen Site in Niagara Falls, New York on September 13, 1996. The RI will be modified to reflect EPA's comments. CDM Federal's specific responses follow:

EPA Comment No. 1
Executive Summary,
Page 2:

Please revise the third paragraph as follows: "On July 21, 1989, ATSDR issued a Preliminary Health Assessment for the Forest Glen site. The assessment, which was based on the April 1989 confirmatory sampling results, concluded that there was a significant risk to human health for persons living in the subdivision. ATSDR determined that the significant health risk could occur from direct ingestion of and dermal contact with, site soils and wastes contaminated with aniline, benzothiazole, mercaptobenzothiazole and semivolatile PAHs. Potential health effects included allergic contact dermatitis, phototoxic skin reactions and cancer. ATSDR recommended that individuals be removed from the site due to this significant health risk. On July 31, 1989, ATSDR issued a Public Health Advisory in which it recommended relocating the residents of the subdivision. Based upon the ATSDR Public Health Assessment and Public Health

Ms. Sosa
September 20, 1996
Page 2

Advisory, the USEPA, through its removal program and in conjunction with the Federal Emergency Management Agency (FEMA), implemented a temporary relocation program for the Forest Glen residents. Temporary relocation activities began immediately after the Public Health Advisory was issued."

CDM Federal Response: CDM Federal will revise the text to include this supplied information.

EPA Comment No. 2
Executive Summary,
Page 3:

Please add the following sentence after the first complete sentence on the page: The *Remedial Action Report*, dated September 1993, documents the remedial activities performed at the site.

CDM Federal Response: CDM Federal will amend the text to include the above sentence

EPA Comment No. 3
Executive Summary,
Page 8:

Please fix the character spacing in the berm paragraph.

CDM Federal Response: CDM Federal will revise the paragraph accordingly

EPA Comment No. 4
Section 1, Page 4:

In the fourth paragraph, please insert a sentence about the ATSDR Health Advisory (See comment #1.)

CDM Federal Response: CDM Federal will amend the text to include the above referenced sentence.

EPA Comment No. 5
Section 1.4.1.5, Page 7:

This section discusses the exposure survey conducted by NYSDOH. This paragraph mentions the number of people who reported being exposed to site contaminants (39) and the number of people who believed their health problems were attributable to contamination from the site (45). However, the number of people that participated in the study (115) is not mentioned. Please include the number of people who participated in the survey to provide a clear perspective of the number of people who reported exposures or effects to site contaminants versus the total number of people who

Ms. Sosa
September 20, 1996
Page 3

participated in the survey. Likewise, include the number of households that participated in the study (45) versus the total number of occupied residences at the time of the survey (51). This shows that 88.2% of the households participated in the study

CDM Federal Response: CDM Federal will revise the text so it reflects the provided information.

EPA Comment No. 6
Section 2, Page 7:

There is a typographic error in the first paragraph. Change 4.2 4 to 4.2.5.

CDM Federal Response: The text will be revised accordingly

EPA Comment No. 7
Figure 2-7

The reference locations in Figure 2-17 are labeled "WTSD BCK1" and "WTSD BCK2" not "WTSD BCKA" and "WTSD BCKB" as referenced on page 3-20.

CDM Federal Response: The reference locations illustrated on Figure 2-17, WTSBCK1 and WTSBCK2, represent the analytical wetland sediment background samples. Analytical samples were collected from these locations. The locations WTSD BCKA and WTSD BCKB that are referenced on page 3-20 served as reference locations for the Phase I Ecological Assessment. These locations were used for informational purposes only and did not have analytical samples collected from them. These locations are not illustrated on Figure 2-17. The text will be clarified.

EPA Comment No. 8
Section 2, Page 18:

In the second paragraph of Section 2.5.3, it states that an additional well cluster was added to the continuous water-level measurement investigation. Please explain further. There is some confusion that measuring water levels in this additional cluster is providing surface water-level measurements.

CDM Federal Response: Due to the low stream stage level of East Gill Creek at the time of the continuous water level measurement investigation, CDM Federal decided against collecting water level data from the creek. The monitoring well cluster was added to the investigation in an effort to provide additional data on groundwater levels and flow regime only. The text will be revised to include this information.

Ms. Sosa
September 20, 1996
Page 4

EPA Comment No. 9
Section 2, Page 26:

As stated in Section 2.7.1, the wells were evacuated during the purging procedure using a submersible pump, while the sampling was performed by utilizing a bailer. Recently, EPA abandoned the use of bailers and is now utilizing pumps for collecting groundwater samples. Bailers could agitate the water column and cause the loss of volatile organic compounds due to degassing and aeration during sample collection. EPA recommends utilizing pumps for any future groundwater collection. This will allow for lower turbidity samples which will be more representative.

EPA now suggests that the completion of purging is gauged on the stabilization of water quality parameters rather than on a fixed number of well volumes pumped. The turbidity is a very conservative parameter in term of equilibration. Measurement and stabilization of turbidity, as with other quality parameters, is of great importance because the turbidity is usually last parameter to stabilize. Metals in the groundwater contaminants are of great concern. The concentration of insoluble metals in the samples is turbidity dependent. Turbidity should be included in future purging/sampling procedure.

CDM Federal Response: CDM Federal will conduct any future sampling at the site in accordance with EPA's new protocol.

EPA Comment No. 10
Section 2, Page 27:

In paragraph 1, it is stated that a "final set of field measurements was collected from the first bailer removed from the well." Please indicate where this data is located in the report. Is it included in Appendix I?

CDM Federal Response: CDM Federal collected the final set of field measurements from sampled purge water upon completion of well evacuation activities. These measurements are recorded on the Field Data Sheets presented in Appendix I. The text will be revised to reflect the actual protocol used by CDM Federal.

EPA Comment No. 11
Table 2-1:

In the last line of this table, Summary of Field Measurement, Dec 26, 1995 was shown for the Round Four Synoptic Measurements. In Table 2.5, Synoptic Data, this measurement is shown on Dec 28, 1995. Please clarify.

Ms. Sosa
September 20, 1996
Page 5

CDM Federal Response: CDM Federal will revise the tables to reflect the correct information.

EPA Comment No. 12
Section 3, Page 1:

There is no description of the man-made drainage ditches and the storm-sewer line. Information about these would assist EPA in assessing the vertical contaminant-migration potential.

CDM Federal Response: CDM Federal will revise the text to include descriptions of both the man-made ditches and storm-sewer lines.

EPA Comment No. 13
Figures 3-14, 3-15:

The groundwater elevations should be indicated near each monitoring well for the shallow and deep zones.

It seems that the contact line between the shallow and deep zones should be moved down to the approximate elevation 552-563 msl (Fig. 2-14). This coincides better with the lithologic description of the core log in Appendix D. The competent rock there was met at a depth of 30 feet.

CDM Federal Response: CDM Federal will revise the figures accordingly.

EPA Comment No. 14
Section 3.6.1.2
Paragraph 1:

It is expected from the literature that the bedding-plane fractures that parallel the formation bedding transmit the majority of the groundwater flow and dominate in the lineament. The measurements of the strike and dip of the bedding planes should be presented in the text.

CDM Federal Response: CDM Federal will amend the text to include the requested information.

EPA Comment No. 15
Figure 3-21:

There appears to be a discrepancy. The groundwater elevation in the MW-4S (December 28) is 580.42. The groundwater elevation in Table 2-5 for MW-4S (December 28) is 569.22. Please clarify.

There is an error with MW-1S. Instead of 580.3 it should be 580.13.

Ms. Sosa
September 20, 1996
Page 6

CDM Federal Response: CDM Federal will revise the text and table accordingly.

EPA Comment No. 16

Section 4:

It would be helpful if the maps found in this section indicated the location of the X-sections.

CDM Federal Response: Cross section location maps are provided in Section 3. CDM Federal will refer to these maps in Section 4 to further assist the reader

EPA Comment No. 17

Section 4:

This section should summarize the volumes of contaminated media. This information will be needed during the feasibility study and also helps to more completely define the extent of contamination. A single figure showing the extent of soil contamination would be helpful along with contours showing the depth of contamination.

CDM Federal Response: At this time, CDM Federal cannot determine volumes of contaminated media since site cleanup numbers have not yet been developed. A figure that illustrates the site-wide extent and depth of contamination will be included in the Final RI Report

EPA Comment No. 18

Section 4.2.8:

The report notes, but does not offer explanations for, the significant variability in contaminant concentrations in groundwater between the first and second sampling rounds. EPA questions the conclusion reached on page 4-40 that there is a correlation between inorganic contamination and groundwater inorganic contamination, especially for chromium. The level of chromium contamination in soil does not appear high enough to explain what is found in the groundwater. It is possible that it is more likely that the chromium in groundwater is an artifact of the stainless steel wells and not from site contamination. The nickel data is also suspect.

CDM Federal Response: CDM Federal acknowledges the significant variability in contaminant concentrations between the two sampling rounds. The data will be reviewed further and potential explanations will be offered in the Final RI Report. CDM Federal recommends that an additional round of groundwater samples be collected to confirm contaminant concentrations

Ms. Sosa
September 20, 1996
Page 7

CDM Federal maintains its assertion that a correlation between soil and groundwater contamination does exist. CDM Federal believes that it is unlikely that the stainless steel wells are responsible for the observed metals contamination. Both sampling rounds were completed within six months of well installation. In addition, the pH of the site groundwater was never noted to be extremely acidic. Conditions, therefore, do not seem favorable to support leaching of the well materials.

EPA Comment No. 19

Section 4, Page 5:

The difference between "not-detected" and a "non-detect value" should be discussed

CDM Federal Response: CDM Federal used the two terms interchangeable throughout this section to represent the same concept. The text will be edited to insure the consistent use of the terms.

EPA Comment No. 20

Section 4.1.6, Page 6:

Although there is significant overlap, NYSDOH drinking-water standards and NYSDEC groundwater standards are not identical. Site groundwater contaminants should also be compared with the standards in § 703.5 to determine if there are any instances where the groundwater standards are more stringent (e.g. chromium where the groundwater standard is 50 ug/l and the drinking-water standard is 100 ug/l.)

CDM Federal Response: CDM Federal will compare site data with the NYSDEC groundwater standards. Exceedances of these standards will be noted in the appropriate text sections and tables.

EPA Comment No. 21

Table 4-1:

It should be noted in Table 4-1 that surface soil sample "SSBK01" represents a range from 0-6", not 0-6", as per page 4-2.

CDM Federal Response: CDM Federal will revise the table accordingly.

EPA Comment No. 22

Table 4-2, Page 1:

The first ten soil cleanup objectives for volatile compounds are incorrect and should be revised to reflect TAGM 4046. These corrections should be carried through the report.

CDM Federal Response: CDM Federal will revise the table and associated text accordingly.

Ms. Sosa
September 20, 1996
Page 8

EPA Comment No. 23
Tables 4-6, 4-8:

Sediment screening values for organics are available for many of the SVOCs and pesticides which are listed as "NS" (no standard) in Tables 4-6 and 4-8. The screening values, "Guidelines for the Protection and Management of Aquatic Sediment Quality in Ontario," (D. Persaud, et. al. August 1993), can be used.

CDM Federal Response: CDM Federal will compare sediment concentrations against the referenced criteria. Exceedances of these standards will be noted in the appropriate text sections and tables.

EPA Comment No. 24
Tables 4-7, 4-9:

In Tables 4-7 and 4-9, the sediment screening values for silver reflects the SEL value, rather than the LEL value which is referenced for all other inorganics. The use of LELs should be consistent. Further, the "Guidelines for the Protection and Management of Aquatic Sediment Quality in Ontario," provide a screening value for iron, which may be used.

CDM Federal Response: CDM Federal will revise the tables accordingly

EPA Comment No. 25
Table 4-19:

Table 4-19 identifies organic surface water contaminants of concern. These data should be reflected in an accompanying figure.

CDM Federal Response: Figure 4-16 will be revised to include the organic contaminants of concern.
