

Former Dico G Auto & Truck Repair

Site No: C203039
Bronx, New York

NOTICE OF START OF INTERIM REMEDIAL ACTION

The New York State Department of Environmental Conservation (NYSDEC) is notifying the public of the start of soil remediation at the Former Dico G Auto & Truck Repair Site located at 3035 White Plains Road in the Bronx, NY (See map on page 2 for location of Site). A draft Interim Remedial Measure Work Plan (IRM) was recently approved for implementation by the NYSDEC and the New York State Department of Health (NYSDOH).

HIGHLIGHTS OF THE PLANNED INTERIM REMEDIAL MEASURE

The IRM will consist of excavating gasoline impacted soils and other contaminated urban soils from most of the site to the bedrock surface which varies from 2 to 10 feet below ground surface. The excavated soils will be properly transported and disposed of in accordance with Federal and State regulations. The IRM includes a Health and Safety Plan and a community air monitoring program to ensure the protection of the general public and workers during implementation of the investigation and remedial work. Air quality will be monitored around the perimeter of the work site during soil disturbance activities such as excavation, loading and grading.

Copies of the IRM Work Plan, the Remedial Investigation Work Plan and all investigation reports are available in the document repositories listed in the box to the left.

NEXT STEPS

All of the activities conducted during the IRM and all of the investigation results obtained will be documented in a draft Remedial Investigation Report. This report will be the basis for determining what actions will need to be taken to address any remaining contamination at the Site.

Contact NYSDEC's project manager if you have any questions on implementation of the IRM, or if you would like to be added to the project contact list to receive future fact sheets.
