

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The community map repository should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations (BFEs)** and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded vehicle-flood elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations (CBFEs) shown on this map apply only to areas of the National Geodetic Vertical Datum of 1929 (NGVD 29). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations tables in the Flood Insurance Study report for the jurisdiction. Elevations shown in the Summary of Stillwater Elevations tables should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for the jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The projection used in the preparation of this map was New York State Plane FIPS ZONE 3104. The horizontal datum was NAD 83, GRS80 spheroid. Differences in datum, spheroid projection or State Plane zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Flood elevations on this map are referenced to the National Geodetic Vertical Datum of 1929. These flood elevations must be compared to structure and ground elevations referenced to the same vertical datum. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at <http://www.ngs.noaa.gov> or contact the National Geodetic Survey at the following address:

 (301) 713-3242

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at (301) 713-3242, or visit its website at <http://www.ngs.noaa.gov>.

Base map information shown on this FIRM was provided in digital format by the Department of Information Technology and Telecommunication, City of New York. This information was derived from digital orthophotos produced at a scale of 1:1,200 with 2-foot pixel resolution from photography dated 2004.

based on updated topographic information, this map reflects more detailed and up-to-date stream channel configurations and floodplain delineations than those shown on the previous FIRM for this jurisdiction. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study Report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map. Also, the need to floodplain relationships for unregulated streams may differ from what is shown on previous maps.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed **Map Index** for an overview map showing the layout of map panels for this jurisdiction.

Contact the **FEMA Map Service Center** at 1-800-358-5616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at <http://www.fema.gov>.

If you have questions about this map or questions concerning the National Flood Insurance Program in general, please call 1-877-FEMA-MAP (1-877-358-2627) or visit the FEMA website at <http://www.fema.gov>.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual flood (100-year flood) also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to Inundation by the 1% annual chance flood. Areas of Special Flood Hazard include Zones A, AE, AH, AO, AR, AV, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

ZONE A No Base Flood Elevations determined.
ZONE AE Base Flood Elevations determined.
ZONE AH Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevation determined.
ZONE AO Flood depths of 1 to 3 feet, usually areas, flow on sloping terrain; average depth determined; Flood depths of shallow rain flooding; vehicles may be damaged.
ZONE AR Special Flood Hazard Area to which protection from the 1% annual chance flood by a flood control system that will completely overtop. Zone AE indicates that the former flood control system is being restored to provide protection from the 1% annual chance flood; no Base Flood Elevation determined.
ZONE AV Area to be protected from 1% annual chance flood by a federal flood protection system under construction; no Base Flood Elevation determined.
ZONE V Coastal flood zone with velocity hazard (wave action); no Base Flood Elevation determined.
ZONE VP Coastal flood zone with velocity hazard (wave action); Base Flood Elevation determined.

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood height.

ZONE X HIGH FLOOD AREAS
 Areas of 0.2% annual chance flood; areas of 2% annual chance flood with average depths of less than 1 foot or with average areas less than 1 square mile; and areas protected by levees; 1% annual chance flood.

OTHER AREAS

Areas determined to be outside the 1% annual chance floodplain.
 Areas in which flood hazards are undetermined, but less than 1% annual chance flood.

LEGEND SYMBOLS:
 - 1% annual chance floodplain boundary
 - 0.2% annual chance floodplain boundary
 - Zone D boundary
 - Zone X boundary
 - Zone AE boundary
 - Boundary of Special Flood Hazard Areas (Zone AE and Zone X) showing Special Flood Hazard Areas (Zone AE and Zone X) flood elevations, flood depths or flood velocities.
 - Flood Profile location (see map on page 10 for elevation and flow data).
 - Base Flood Elevation value where uniform unless otherwise noted.
 - (EL 502)

Other Symbols:
 - National Geodetic Vertical Datum of 1929
 - Cross section line
 - Transit line
 - Geographic coordinates referenced to the North American Datum of 1983 (NAD 83), System: Universal Transverse Mercator
 - 150-meter Universal Transverse Mercator grid values, zone 18
 - Spot height grid notes: New York State Flood Insurance System, Long Island zone 11 (USADL 2104); Lambert Conformal Conic projection
 - Reach mark, (see elevation in Notes to Users section of this FIRM)
 - M1.S
 - MAP REPOSITORY
 - Refer to listing of Map Repositories on Map Index
 - FIRM MAP DATE: July 28, 1974
 - FLOOD HAZARD BOUNDARY MAP REVISIONS: None
 - FLOOD INSURANCE RATE MAP EFFECTIVE: February 16, 1988
 - FLOOD INSURANCE RATE MAP REVISIONS: None
 - September 5, 2007: To change Special Flood Hazard Areas, to reflect updated topographic information, and to update flood zones.

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-658-6622.
