## GENERAL COMMENTS:

As part of the of the NYSDEC-approved Remedial Action Work Plan, Roux Environmental Engineering and Geology D.P.C. (Roux) performed environmental oversight and operated air monitoring equipment in compliance with the Community Air Monitoring Plan (CAMP) during foundation installation activities.

RAWP Activities Performed:

- Kingdom continued the installation of foundation elements in grid cell A1.
- Kingdom continued excavating around erected piles within the northeast area of grid cell A2 for upcoming construction of foundation elements.
- Kingdom backfilled in grid B2 after foundation installation was completed.

CAMP Performed:

- CAMP was performed from 07:00 am to 3:30 pm. No exceedances of dust or VOCs were recorded.

Other Relevant Comments or Issues:

- 6 US Concrete trucks arrived on site for concrete pouring.

Upcoming work activities:

- Installation of SOE and deeper foundation elements (footings, piers, pile caps, etc.) expected to continue throughout the site area through October 2022. Localized excavation will occur, as necessary.
- Roux will continue oversight, performance of CAMP during intrusive construction activities, and collecting soil documentation end point samples as required by the RAWP.
