

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- Get site information faster and share it easily;
- Receive information about all sites in a chosen county - read what you want, delete the rest;
- It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

FACT SHEET Brownfield Cleanup Program

Receive Site Fact Sheets by Email. See "For More Information" to Learn How.

Site Name: Former B&Z Steel Equipment Co.
DEC Site #: C224195
Address: 1003 Greene Avenue
Brooklyn, NY 11221

Have questions? See "Who to Contact" Below

Cleanup Action to Begin at Brownfield Site

Action is about to begin that will address the contamination related to the Former B&Z Steel Equipment Co. site ("site") located at 1003 Greene Avenue, Brooklyn, Kings County under New York State's Brownfield Cleanup Program. Please see the map for the site location.

Documents related to the cleanup of this site can be found at the location(s) identified below under "Where to Find Information."

The cleanup activities will be performed by Greene Pastures LLC ("applicant(s)") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC).

Highlights of the Upcoming Cleanup Activities

The goal of the cleanup action for the site is to achieve cleanup levels that protect public health and the environment. The cleanup action for the site includes:

- A remedial design will be performed to provide the details necessary for the construction, operation, optimization, maintenance and monitoring of the remedial program;
- Excavation of all underground storage tanks (USTs) and piping, as well as on-site soils which exceed unrestricted use soil cleanup objectives (UUSCOs). Clean fill meeting the requirements of 6NYCRR Part 375-6.7(d) will be brought in to establish the designed grades at the site;
- A soil vapor intrusion evaluation will be completed to address exposures related to soil vapor intrusion, if identified.

Next Steps

After the applicant completes the cleanup activities, they will prepare a Final Engineering Report and submit it to NYSDEC. The Final Engineering Report will describe the cleanup activities completed and certify that cleanup requirements have been achieved or will be achieved.

When NYSDEC is satisfied that cleanup requirements have been achieved or will be achieved for the site, it will approve the Final Engineering Report. NYSDEC will then issue a Certificate of Completion to the applicant(s).

The applicant(s) would be able to redevelop the site after receiving a Certificate of Completion. In addition, the applicant(s):

- would have no liability to the State for contamination at or coming from the site, subject to certain conditions; and
- would be eligible for tax credits to offset the costs of performing cleanup activities and for redevelopment of the site.

A fact sheet that describes the content of the Final Engineering Report will be sent to the site contact list. The fact sheet will identify any institutional controls (for example, deed restrictions) or engineering controls (for example, a site cap) necessary at the site in relation to the issuance of the Certificate of Completion.

Background

Location: The site is located in the Bedford Stuyvesant section of Brooklyn, NY. The site is identified as Block 1618, Lot 35 and is located on the north side of Greene Avenue between Patchen Avenue and Broadway .

Site Features: The site is currently an unoccupied one-story commercial building constructed in 1910 which occupies the entire lot. Two fuel dispensers are located inside the building and connected to underground piping which is suspected to be connected to underground storage tanks.

Current Zoning and Land Use: The site is zoned as a C4-4L district which allows commercial use. C4 districts are intended for regional commercial shopping centers and offices which generate more traffic than neighborhood shopping areas. The C4-4 designation is used in more densely built areas. Prior to acceptance into the BCP, the site was used for contractor storage/commercial use.

Historic Use: Prior to its most recent use, the site was used as a mineral water bottling facility, wagon houses, storage, and parking garage and auto repair shop. Non-commercial style fueling activities also occurred at the site up until the late 1970's.

Site Geology and Hydrogeology: Subsurface soils at the site consist of historic fill materials to a depth of approximately 4 - 8 feet below grade. Below the fill, a glacial layer exists consisting of silty sand and gravel to a depth of 20 feet with coarse sand and gravel reported to exist below 20 feet. Below the glacial layer, there is a confining layer of Gardiners Clay extending to a depth of approximately 200 feet below sea level. The groundwater depth is approximately 45 feet below grade, and based on the remedial investigation, flows south-southwest.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's website at:

<http://www.dec.ny.gov/cfm/external/derexternal/haz/details.cfm?pageid=3&progno=C224195>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses include recreation, housing, business or other uses.

A brownfield is any real property that is difficult to reuse or redevelop because of the presence or potential presence of contamination.

For more information about the BCP, visit: <http://www.dec.ny.gov/chemical/8450.html>

FOR MORE INFORMATION

Where to Find Information

Project documents are available at the following location(s) to help the public stay informed.

Brooklyn Pubic Library - Macon Branch
361 Lewis Ave. at Macon Street
Brooklyn, NY 11233
phone: 718-573-5606

Who to Contact

Comments and questions are always welcome and should be directed as follows:

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.

Receive Site Fact Sheets by Email

Have site information such as this fact sheet sent right to your email inbox. NYSDEC invites you to sign up with one or more contaminated sites county email listservs available at the following web page: <http://www.dec.ny.gov/chemical/61092.html>. It's quick, it's free, and it will help keep you *better informed*.

As a listserv member, you will periodically receive site-related information/announcements for all contaminated sites in the county(ies) you select.

Note: Please disregard if you already have signed up and received this fact sheet electronically.
