

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- Get site information faster and share it easily;
- Receive information about all sites in a chosen county - read what you want, delete the rest;
- It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

FACT SHEET

Brownfield Cleanup Program

1510 Broadway Dry Cleaner Site
1510 Broadway
Brooklyn, New York, NY 11221

SITE No. C224280

NYSDEC REGION 2

July 2020

Report Recommends Cleanup of Brownfield Site Contamination

The New York State Department of Environmental Conservation (NYSDEC) is reviewing the Remedial Investigation Report for the 1510 Broadway Dry Cleaner Site ("site") located at 1510 Broadway, Brooklyn, NY. Please see the map for the site location.

Remedial Investigation Report: The Remedial Investigation Report (RIR) describes the results of the site investigation and recommends development of a remedy to address the contamination that was found. The RIR was submitted by 1510 Broadway LLC ("applicant").

- Access the RIR and other project documents online through the DECinfo Locator:
<https://www.dec.ny.gov/data/DecDocs/C224280/>.
- The documents also are available at the location(s) identified at left under "Where to Find Information."

Based on the findings of the investigation, NYSDEC, in consultation with the New York State Department of Health (NYSDOH), has determined that the site does not pose a significant threat to public health or the environment. This decision is based on the environmental data.

Highlights of the Remedial Investigation Report: Soil and groundwater samples were collected and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), pesticides and per- and polyfluoroalkyl substances (PFAS). Soil vapor samples were analyzed for VOCs. Metals and SVOCs were found in subsurface soils at concentrations above restricted residential use soil cleanup objectives at depths up to 17 feet below grade. On-site groundwater contained volatile organic compounds (VOCs) in excess of ambient water quality standards. Contamination is likely the result of past site uses and historic fill, which is present throughout the site.

BROWNFIELD CLEANUP PROGRAM

Next Steps: NYSDEC will complete its review, make any necessary revisions and, if appropriate, approve the investigation report. The approved report will be made available to the public (see “Where to Find Information” at left). The applicant(s) may then develop a cleanup plan, called a "Remedial Work Plan." This plan describes how contamination will be addressed, with NYSDEC and NYSDOH overseeing the work. NYSDEC will present the draft cleanup plan to the public for its review and comment during a 45-day comment period. NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description: The 0.46-acre site is located at 1510 Broadway in Brooklyn and is bordered on the west by Saratoga Avenue, on the south by Hancock Street, on the north by Jefferson Avenue, and on the northeast by Broadway. There is also a two-story building bordering the southwest portion of the site. Currently, the site is vacant, enclosed by construction fencing and covered by gravel and overgrown vegetation. Previously, the site had commercial and industrial uses including dry-cleaning, dress manufacturing/dyeing, printing, and watch and jewelry repair.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C224280) at:

<http://www.dec.ny.gov/cfm/xtapps/derexternal/index.cfm?pageid=3>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by NYSDEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<http://www.dec.ny.gov/chemical/8450.html>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
