

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- Get site information faster and share it easily;
- Receive information about all sites in a chosen county - read what you want, delete the rest;
- It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

FACT SHEET

Brownfield Cleanup Program

Former Pfizer Site C

334 Wallabout Street
Brooklyn, NY 11206

SITE No. C224288

NYSDEC REGION 2

May 2021

Where to Find Information

Access project documents through the DECinfo Locator
<https://www.dec.ny.gov/data/DecDocs/C224288/>
and at these location(s):

Brooklyn Public Library - Bushwick Branch

340 Bushwick Avenue
Brooklyn, NY 11206
(718) 602 - 1348

Brooklyn Community Board 1

435 Graham Avenue
Brooklyn, NY 11211
(718) 389 - 0009

**Repositories are temporarily unavailable due to COVID-19 precautions. If you cannot access the online repository, please contact the NYSDEC project manager listed below for assistance.*

Who to Contact

Comments and questions are welcome and should be directed as follows:

Project-Related Questions

Mandy Yau, Project Manager
NYSDEC
Division of Environmental Remediation
47-40 21st Street
Long Island City, NY 1101
(718) 482 - 4897
mandy.yau@dec.ny.gov

Project-Related Health Questions

Stephanie Selmer, Project Manager
NYSDOH
Empire State Plaza
Corning Tower Room 1787
Albany, NY 12237
(518) 402-7864
beei@health.ny.gov

Remedy Proposed for Brownfield Site Contamination; Public Comment Period Announced

The public is invited to comment on a proposed remedy being reviewed by the New York State Department of Environmental Conservation (NYSDEC), in consultation with the New York State Department of Health (NYSDOH), to address contamination related to the Former Pfizer Site C site ("site") located at 334 Wallabout Street, Brooklyn, NY. Please see the map for the site location.

Based on the findings of the investigation, NYSDEC in consultation with the New York State Department of Health (NYSDOH) has determined that the site does not pose a significant threat to public health or the environment.

How to Comment: NYSDEC is accepting written comments about the proposed plan, called a "Draft Remedial Action Work Plan (RAWP)" for 45 days, from **May 20, 2021 through July 3, 2021.**

- Access the Draft RAWP and other project documents online through the DECinfo Locator: <https://www.dec.ny.gov/data/DecDocs/C224288/>.
- Documents also are available at the location(s) identified at left under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

Draft Remedial Action Work Plan: The proposed combined Track 1 unrestricted use and Track 4 restricted residential use remedy consists of:

- Installation of excavation support (e.g., shoring) to facilitate remedial excavation;
- Excavation and appropriate off-site disposal of all soil/fill exceeding unrestricted use soil cleanup objectives (SCOs) across the majority of the Site;
- Excavation of and appropriate off-site disposal of soil/fill exceeding restricted residential SCOs to a depth of approximately 2 feet below grade across western quarter of the site;
- Installation and operation of a dewatering and treatment system to facilitate soil excavation below the water table, and discharge of treated groundwater to the municipal sewer system under a NYCDEP permit;
- Collection and analysis of end-point soil samples to evaluate the effectiveness of the remedy;
- Placement of a cover system, including a demarcation layer, on the Track 4 western quarter of the site;
- Importing clean material that meets the established SCOs for use as backfill and/or cover system material;

BROWNFIELD CLEANUP PROGRAM

- Conducting a soil vapor intrusion evaluation, with provisions for implementing actions recommended to address exposures related to soil vapor, in the proposed buildings;
- Implementing a Health and Safety Plan and Community Air Monitoring Plan during all ground intrusive activities;
- Implementing a Site Management Plan (SMP) for long-term maintenance of the remedial systems (engineering controls) on the Track 4 portion of the site; and
- Recording an Environmental Easement to ensure proper use of the site and implementation of the SM on the Track 4 portion of the site.

The proposed remedy was developed by Harrison Realty LLC (“applicant”) after performing a detailed investigation of the site under New York's Brownfield Cleanup Program (BCP). A “Remedial Investigation Report”, which describes the results of the site investigation was submitted and is also available for review at the locations identified on Page 1.

Next Steps: NYSDEC will consider public comments, revise the cleanup plan as necessary, and issue a final Decision Document. NYSDOH must concur with the proposed remedy. After approval, the proposed remedy becomes the selected remedy. The applicant(s) may then design and perform the cleanup action to address the site contamination, with oversight by NYSDEC and NYSDOH. NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description: The site is 2.55-acres and is bordered on the west by Union Avenue, on the south by Gerry Street, on the east by Harrison Avenue, and on the north by Wallabout Street. It is currently developed with several temporary wooden storage structures and is used for the storage of construction equipment. Previously, the site was used as a manufacturing plant by Charles Pfizer & Co. Chemical Works. The planned redevelopment includes 5 multi-story

mixed use residential buildings with commercial and community space.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C224288) at:

<https://www.dec.ny.gov/cfm/xtapps/derexternal/index.cfm?pageid=3>

Summary of the Investigation: The primary contaminants of concern at the site are semi-volatile organic compounds (SVOCs) and metals in soil, and volatile organic compounds (VOCs), SVOCs and metals in groundwater.

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by NYSDEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.
