TEMP.	< 32		40-50		50-70	x	70-85		>85	

Langan Project No:	100688801	Project:	12074 Flatlands Avenue p/o Lot 1	Date:	11/7/2022
NYSDEC BCP Site No:	C224353			Time:	06:45 – 12:45

Consultant:

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C.

PERSONNEL ON SITE:

Langan: Patrick Lenihan (Geotechnical)

Craig: John Millington (Drillers)

EQUIPMENT ON SITE: Two (2) CME truck-mounted drill rigs

Site Activities

- Langan mobilized to the site with Craig Geotechnical Drilling Co., Inc. (Craig), the geotechnical drilling contractor.
- Craig used a CME truck-mounted drill rig to advance soil boring B-1 to a depth of 100-feet bgs. Elevated PID readings (up to 0.8 parts per million [ppm]) and slight odors were observed between 4 and 8 feet bgs within the soil boring. All soil between 4 to 8 feet was placed within glass sample jars.
- Craig used a CME truck-mounted drill rig to advance soil borings B-7 to a depth of 40-feet bgs. Slight odors were observed between 20 and 27 feet bgs within the soil boring. All soil between 20 to 27 feet was placed within glass sample jars.

Samples Collected

- None.

Community Air Monitoring Program (CAMP)

- Langan implemented the CAMP during soil disturbance. The CAMP equipment consisted of a DustTrack II and photoionization detector (PID) at dedicated locations on the downwind perimeter and upwind perimeter of the site, as well as a personal DataRam (pDR) and Photoionization Detector (PID) at a work zone monitoring station.
- Dust and VOC concentrations were not detected in exceedance of the daily STEL.

Problems Encountered

- None.

Activities Scheduled for Next Day

- Craig will continue the installation of soil borings.

Photo Log

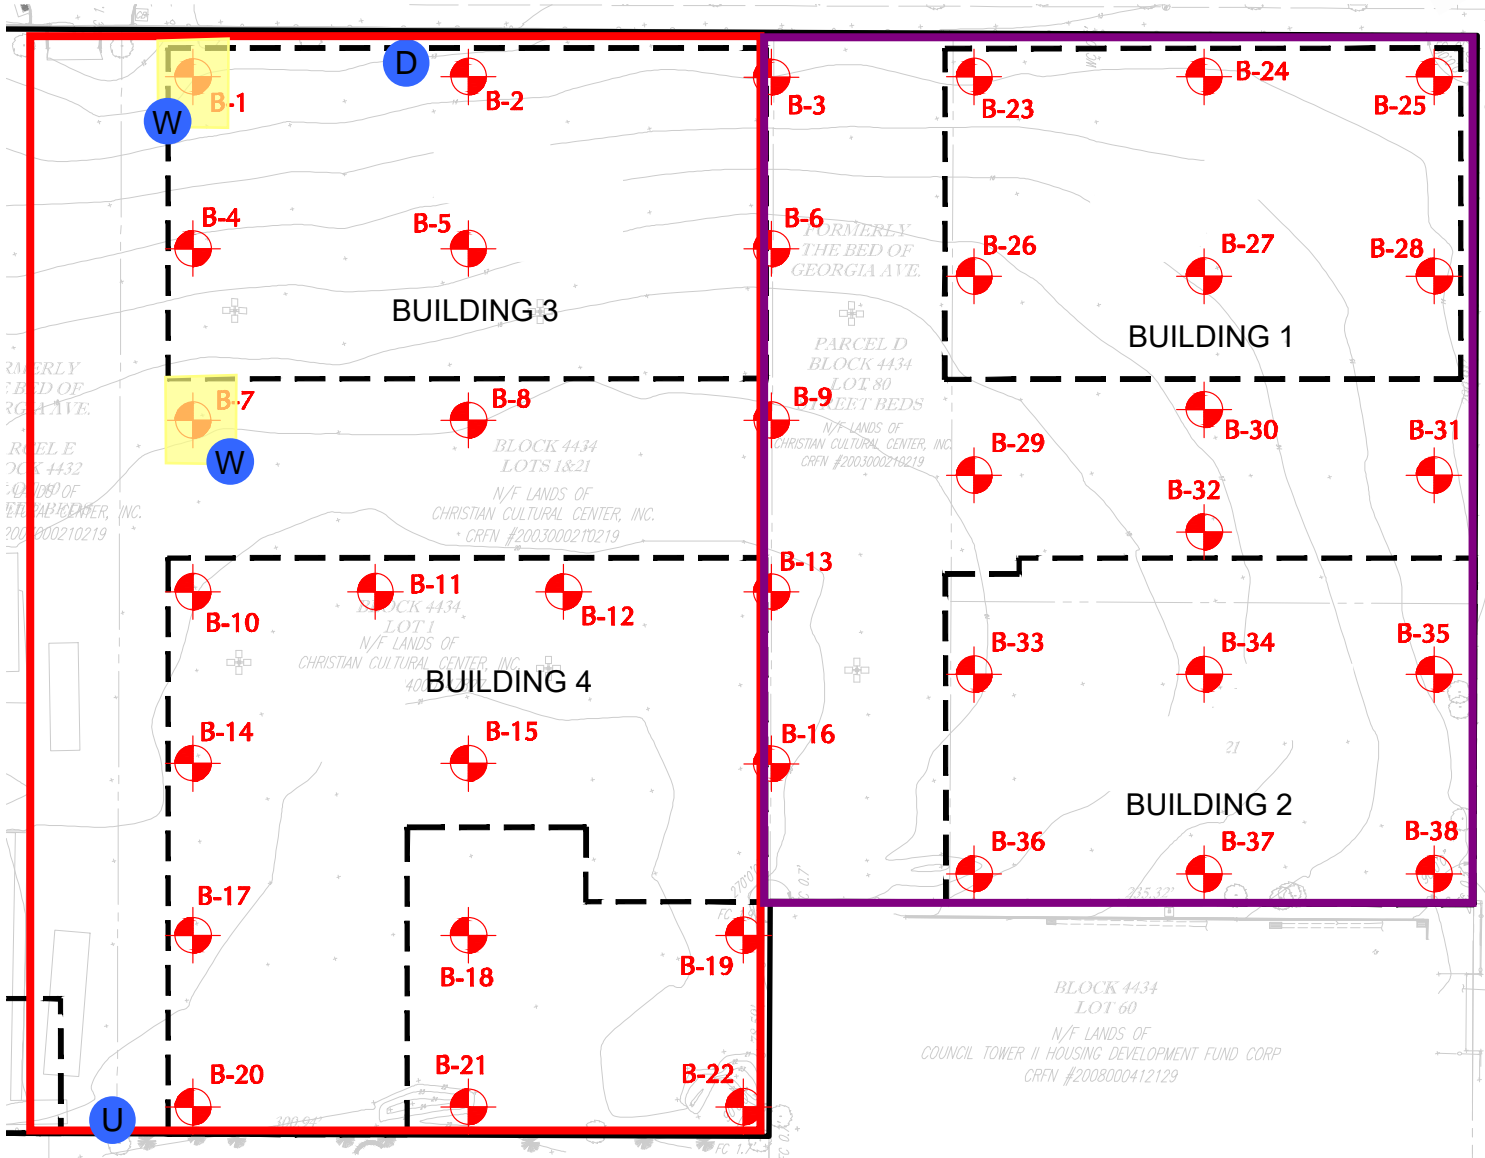

Photo 1 – Craig drilling boring B-1, facing northwest.

Photo 2 – Craig taking a split spoon sample at B-1, facing north.
