**Note:** The information presented in this Citizen Participation Plan was current as of the date of its approval by the New York State Department of Environmental Conservation. Portions of this Citizen Participation Plan may be revised during the site's investigation and cleanup process.

Applicant: S & C Properties LLC Site Name: Teitelbaum Dry Cleaning Inc. ("Site") Site Address: 35-45 35<sup>th</sup> Street, Queens, NY 11106 Site County: Queens Site Number: C241149

### 1. What is New York's Brownfield Cleanup Program?

New York's Brownfield Cleanup Program (BCP) works with private developers to encourage the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and developed. These uses include recreation, housing, and business.

A *brownfield* is any real property that is difficult to reuse or redevelop because of the presence or potential presence of contamination. A brownfield typically is a former industrial or commercial property where operations may have resulted in environmental contamination. A brownfield can pose environmental, legal, and financial burdens on a community. If a brownfield is not addressed, it can reduce property values in the area and affect economic development of nearby properties.

The BCP is administered by the New York State Department of Environmental Conservation (NYSDEC) which oversees Applicants that conduct brownfield site investigation and cleanup activities. An Applicant is a person who has requested to participate in the BCP and has been accepted by NYSDEC. The BCP contains investigation and cleanup requirements, ensuring that cleanups protect public health and the environment. When NYSDEC certifies that these requirements have been met, the property can be reused or redeveloped for the intended use.

For more information about the BCP, go online at: <u>http://www.dec.ny.gov/chemical/8450.html</u>.

### 2. Citizen Participation Activities

### Why NYSDEC Involves the Public and Why It Is Important

NYSDEC involves the public to improve the process of investigating and cleaning up contaminated sites, and to enable citizens to participate more fully in decisions that affect their health, environment, and social well-being. NYSDEC provides opportunities for citizen involvement and encourages early two-way communication with citizens before decision-makers form or adopt final positions.

Involving citizens affected and interest in site investigation and cleanup programs is important for many reasons. These include:

• Promoting the development of timely, effective site investigation and cleanup programs that protect public health and the environment;

- Improving public access to, and understanding of, issues and information related to a particular site and that site's investigation and cleanup process;
- Providing citizens with early and continuing opportunities to participate in NYSDEC's site investigation and cleanup process;
- Ensuring that NYSDEC makes site investigation and cleanup decisions that benefit from input that reflects the interests and perspectives found within the affected community; and
- Encouraging dialogue to promote the exchange of information among the affected/interested public, State agencies, and other interested parties that strengthens trust among the parties, increases understanding of site and community issues and concerns, and improves decision-making.

This Citizen Participation (CP) Plan provides information about how NYSDEC will inform and involve the public during the investigation and cleanup of the Site identified above. The public information and involvement program will be carried out with assistance, as appropriate, from the Applicant.

### Project Contacts

Appendix A identifies NYSDEC project contact(s) to whom the public should address questions or request information about the site's investigation and cleanup program. The public's suggestions about this CP Plan and the CP program for the Site are always welcome. Interested parties are encouraged to share their ideas and suggestions with the project contacts at any time.

### Locations of Reports and Information

The locations of the reports and information related to the site's investigation and cleanup program also are identified in Appendix A. These locations provide convenient access to important project documents for public review and comment. Some documents may be placed on the NYSDEC website. If this occurs, NYSDEC will inform the public in fact sheets distributed about the Site and by other means, as appropriate.

### Site Contact List

Appendix B contains the site contact list. This list has been developed to keep the community informed about, and involved in, the site's investigation and cleanup process. The site contact list will be used periodically to distribute fact sheets that provide updates about the status of the project. These will include notifications of upcoming activities at the Site (such as fieldwork), as well as availability of project documents and announcements about public comment periods. The site contact list includes, at a minimum:

- Chief executive officer and planning board chairperson of each county, city, town and village in which the Site is located;
- Residents, owners, and occupants of the Site and properties adjacent to the Site;
- The public water supplier which services the area in which the Site is located;
- Any person who has requested to be placed on the site contact list;
- The administrator of any school or day care facility located on or near the Site for purposes of posting and/or dissemination of information at the facility; and
- Location(s) of reports and information.

The site contact list will be reviewed periodically and updated as appropriate. Individuals and organizations will be added to the site contact list upon request. Such requests should be submitted to the NYSDEC project contact(s) identified in Appendix A. Other additions to the site contact list may be made at the discretion of the NYSDEC project manager, in consultation with other NYSDEC staff as appropriate.

### **CP** Activities

The table at the end of this section identifies the CP activities, at a minimum, that have been and will be conducted during the site's investigation and cleanup program. The flowchart in Appendix D shows how these CP activities integrate with the site investigation and cleanup process. The public is informed about these CP activities through fact sheets and notices distributed at significant points during the program. Elements of the investigation and cleanup process that match up with the CP activities are explained briefly in Section 5.

- Notices and fact sheets help the interested and affected public to understand contamination issues related to a site, and the nature and progress of efforts to investigate and clean up a site.
- **Public forums, comment periods and contact with project managers** provide opportunities for the public to contribute information, opinions and perspectives that have potential to influence decisions about a site's investigation and cleanup.

The public is encouraged to contact project staff at any time during the site's investigation and cleanup process with questions, comments, or requests for information.

This CP Plan may be revised due to changes in major issues of public concern identified in Section 3 or in the nature and scope of investigation and cleanup activities. Modifications may include additions to the site contact list and changes in planned citizen participation activities.

### Technical Assistance Grant

NYSDEC must determine if the Site poses a significant threat to public health or the environment. This determination generally is made using information developed during the investigation of the Site, as described in Section 5.

If the Site is determined to be a significant threat, a qualifying community group may apply for a Technical Assistance Grant (TAG). The purpose of a TAG is to provide funds to the qualifying group to obtain independent technical assistance. This assistance helps the TAG recipient to interpret and understand existing environmental information about the nature and extent of contamination related to the Site and the development/implementation of a remedy.

An eligible community group must certify that its membership represents the interests of the community affected by the Site, and that its members' health, economic well-being or enjoyment of the environment may be affected by a release or threatened release of contamination at the Site.

For more information about TAGs, go online at http://www.dec.ny.gov/regulations/2590.html.

Note: The table identifying the citizen participation activities related to the site's investigation and cleanup program follows on the next page:

Citizen Participation Requirements (Activities)	Timing of CP Activity(ies)
Applicatio	n Process:
<ul><li>Prepare site contact list</li><li>Establish document repositories</li></ul>	At time of preparation of application to participate in the BCP.
<ul> <li>Publish notice in Environmental Notice Bulletin (ENB) announcing receipt of application and 30- day public comment period</li> <li>Publish above ENB content in local newspaper</li> <li>Mail above ENB content to site contact list</li> <li>Conduct 30-day public comment period</li> </ul>	When NYSDEC determines that BCP application is complete. The 30-day public comment period begins on date of publication of notice in ENB. End date of public comment period is as stated in ENB notice. Therefore, ENB notice, newspaper notice, and notice to the site contact list should be provided to the public at the same time.
After Execution of Brownfic	eld Site Cleanup Agreement:
Prepare Citizen Participation (CP) Plan	Before start of Remedial Investigation
Before NYSDEC Approves Reme	dial Investigation (RI) Work Plan:
<ul> <li>Distribute fact sheet to site contact list about proposed RI activities and announcing 30-day public comment period about draft RI Work Plan</li> <li>Conduct 30-day public comment period</li> </ul>	Before NYSDEC approves RI Work Plan. If RI Work Plan is submitted with application, public comment periods will be combined and public notice will include fact sheet. Thirty-day public comment period begins/ends as per dates identified in fact sheet.
After Applicant Complete	es Remedial Investigation:
• Distribute fact sheet to site contact list that describes RI results	Before NYSDEC approves RI Report
Before NYSDEC Approves I	Remedial Work Plan (RWP):
<ul> <li>Distribute fact sheet to site contact list about proposed RWP and announcing 45-day public comment period</li> <li>Public meeting by NYSDEC about proposed RWP (if requested by affected community or at discretion of NYSDEC project manager)</li> </ul>	Before NYSDEC approves RWP. Forty-five day public comment period begins/ends as per dates identified in fact sheet. Public meeting would be held within the 45-day public comment period.
Conduct 45-day public comment period	
Before Applicant Sta	-
• Distribute fact sheet to site contact list that describes upcoming cleanup action	Before the start of cleanup action.
After Applicant Comp	letes Cleanup Action:
<ul> <li>Distribute fact sheet to site contact list that announces that cleanup action has been completed and that summarizes the Final Engineering Report</li> <li>Distribute fact sheet to site contact list announcing issuance of Certificate of Completion (COC)</li> </ul>	At the time NYSDEC approves Final Engineering Report. These two fact sheets are combined if possible if there is not a delay in issuing the COC.

### 3. Major Issues of Public Concern

This section of the CP Plan identifies major issues of public concern that relate to the Site. Additional major issues of public concern may be identified during the course of the site's investigation and cleanup process.

The potential exists for the intrusion of soil vapor into the on-site building and into adjacent/surrounding buildings. A 2012 site characterization investigation performed approximately 207 feet south of the Site at 34-12 36<sup>th</sup> Avenue, the former Luft Co. Inc. Cosmetics Manufacture site (241139), indicates that elevated concentrations of chlorinated solvents (dry cleaning fluids and solvents) are present in the soil vapor and groundwater downgradient and beneath that property. The action under the BCP will address the concentrations of soil vapor and/or groundwater that require mitigation through approved actions.

The Site is located within a potential Environmental Justice Area. Environmental justice is defined as the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.

Environmental justice efforts focus on improving the environment in communities, specifically minority and low-income communities, and addressing disproportionate adverse environmental impacts that may exist in those communities.

Because the Site is located in an area with a large Hispanic-American community, all future fact sheets will be translated into Spanish.

Furthermore, there may be impacts with regards to truck traffic coming from the Site, noise and odors as well.

Upon conclusion of the BCP Application 30-day public comment period, if issues of public concern are identified, this CP Plan will be amended to address any additional CP activities that may need to be implemented.

### 4. Site Information

### Site Description

The Site is located in a mixed use area of Astoria, NY. The Site is comprised of an approximately 9,950 square foot square parcel. It is located near the southwest corner of the block and is bound to the northwest by 35th Street; to the south by 36th Avenue; to the east by 36th Street; and to the northeast by 35th Avenue. Adjacent properties include mixed use commercial and residential buildings to the northwest, industrial and manufacturing to the south and northeast, and commercial and office buildings to the east. The Site is identified on New York City tax maps as Block 639, Lot 4. A Site location map is presented in Appendix C.

The Site is currently improved with one high-ceilinged commercial/manufacturing building (measuring approximately 100' x 100'). The ground floor of the building is currently utilized as a drycleaner. A portion of the building contains a second floor that is used as office space and storage. Four (4) 275-gallon fuel oil above ground storage tanks (ASTs) are located in the northern and western sections of the first floor.

#### History of Site Use, Investigation, and Cleanup

Based on interviews with the Site owner, Gusenburger Cleaners occupied the Site prior to 1952. Sometime between 1952 and 1975, Renard's Cleaners took over the dry cleaning operation. In 1975, Teitelbaum Cleaners purchased the property and continued the dry cleaning operations. In 1987, the property was sold to Charlotte and Samuel Ratafia who continued to operate the dry cleaner. In 2002, S & C Properties, LLC, took over ownership of the property, and leased the building and dry cleaning operations to Red Cap Services, LTD. Red Cap Services, LTD has operated a dry cleaner onsite from 2002 to present.

No environmental investigations or sampling have occurred at the Site. However, information was obtained from investigations performed approximately 207 feet south of the Site at 34-12 36<sup>th</sup> Avenue, the former Luft Co. Inc. Cosmetics Manufacture site (241139), and current home to the Baccalaureate School for Global Education, indicates that elevated concentrations of chlorinated solvents are present in the soil vapor and groundwater downgradient and beneath that property.

Based on the known site usage as a dry cleaner since approximately 1952 and the on-site storage of Tetrachloroethylene (PCE) waste, it is reasonable to assume that soil, groundwater, and/or soil vapor may be potentially impacted by chlorinated solvents. In addition, the presence of (4) 275-gallon fuel oil ASTs present potential for the above stated media to be impacted by petroleum constituents. An onsite investigation is necessary to determine if chlorinated solvent or petroleum impacts exist.

#### 5. Investigation and Cleanup Process

#### Application

The Applicant has applied for and been accepted into New York's Brownfield Cleanup Program as a Participant. This means that the Applicant was either the owner of the Site at the time of the disposal or discharge of contaminants; or is otherwise a person responsible according to applicable principles of statutory or common law liability, unless such person's liability arises solely as a result of such person's ownership or operation of or involvement with the Site subsequent to the disposal or discharge of contaminants. The Participant must fully characterize the nature and extent of contamination on-site and off-site, and must conduct a qualitative exposure assessment, a process that characterizes the actual or potential exposures of people, fish and wildlife to contaminants on the Site and to contamination that has migrated from the Site. The Site is currently zoned M1-5 for manufacturing districts that include light industrial uses. Remediation of the Site is not being performed in association with any redevelopment of the Site.

To achieve the remediation goal, the Applicant will conduct investigation and cleanup activities at the Site with oversight provided by NYSDEC. The Brownfield Cleanup Agreement executed by NYSDEC and the Applicant sets forth the responsibilities of each party in conducting these activities at the Site.

#### Investigation

The Applicant will conduct an investigation of the Site officially called a "remedial investigation" (RI). This investigation will be performed with NYSDEC oversight. The Applicant must develop a remedial investigation workplan, which is subject to public comment.

The site investigation has several goals:

- 1) Define the nature and extent of contamination in soil, surface water, groundwater and any other parts of the environment that may be affected;
- 2) Identify the source(s) of the contamination;
- 3) Assess the impact of the contamination on public health and the environment; and
- 4) Provide information to support the development of a proposed remedy to address the contamination or the determination that cleanup is not necessary.

When the investigation is complete, the Applicant will prepare and submit a report that summarizes the results. This report also will recommend whether cleanup action is needed to address site-related contamination. The investigation report is subject to review and approval by NYSDEC.

NYSDEC will use the information in the investigation report to determine if the Site poses a significant threat to public health or the environment. If the Site is a significant threat, it must be cleaned up using a remedy selected by NYSDEC from an analysis of alternatives prepared by the Applicant and approved by NYSDEC. If the Site does not pose a significant threat, the Applicant may select the remedy from the approved analysis of alternatives.

#### Remedy Selection

When the investigation of the Site has been determined to be complete, the project likely would proceed in one of two directions:

1. The Applicant may recommend in the report of its investigation ("Investigation Report") that no action is necessary at the Site. In this case, NYSDEC would make the investigation report available for public comment for 45 days. NYSDEC then would complete its review, make any necessary revisions, and, if appropriate, approve the Investigation Report. NYSDEC would then issue a Certificate of Completion (COC), described below, to the Applicant.

#### or

2. The Applicant may recommend in its Investigation Report that action needs to be taken to address site contamination. After NYSDEC approves the Investigation Report, the Applicant may then develop a cleanup plan, officially called a Remedial Work Plan. The Remedial Work Plan describes the Applicant's proposed remedy for addressing contamination related to the Site.

When the Applicant submits a proposed Remedial Work Plan for approval, NYSDEC would announce the availability of the proposed plan for public review during a 45-day public comment period.

#### Cleanup Action

NYSDEC will consider public comments, and revise the draft cleanup plan if necessary, before approving the proposed remedy. The New York State Department of Health (NYSDOH) must concur with the proposed remedy. After approval, the proposed remedy becomes the selected remedy.

The Applicant may then design and perform the cleanup action to address the site contamination. NYSDEC and NYSDOH oversee the activities. When the Applicant completes cleanup activities, it will prepare a Final Engineering Report (FER) that certifies that cleanup requirements have been achieved or will be achieved within a specific time frame. NYSDEC will review the report to be certain that the cleanup is protective of public health and the environment for the intended use of the Site.

#### Certificate of Completion

When NYSDEC is satisfied that cleanup requirements have been achieved or will be achieved for the Site, it will approve the FER. NYSDEC then will issue a COC to the Applicant. The COC states that cleanup goals have been achieved, and relieves the Applicant from future liability for site-related contamination, subject to certain conditions. The Applicant would be eligible to redevelop the Site after it receives a COC, although as noted, there are no current redevelopment plans.

#### Site Management

Site management is the last phase of the site cleanup program. This phase begins when the COC is issued. Site management may be conducted by the Applicant under NYSDEC oversight, if contamination will remain in place. Site management incorporates any <u>institutional controls</u> and <u>engineering controls</u> required to ensure that the remedy implemented for the Site remains protective of public health and the environment. All significant activities are detailed in a Site Management Plan.

An <u>institutional control</u> is a non-physical restriction on use of the Site, such as a deed restriction that would prevent or restrict certain uses of the property. An institutional control may be used when the cleanup action leaves some contamination that makes the Site suitable for some, but not all uses.

An <u>engineering control</u> is a physical barrier or method to manage contamination. Examples include: caps, covers, barriers, fences, and treatment of water supplies.

Site management also may include the operation and maintenance of a component of the remedy, such as a system that is pumping and treating groundwater. Site management continues until NYSDEC determines that it is no longer needed.

## Appendix A Project Contacts and Locations of Reports and Information

### **Project Contacts**

For information about the site's investigation and cleanup program, the public may contact any of the following project staff:

### New York State Department of Environmental Conservation (NYSDEC):

Shaun Bollers Project Manager NYSDEC, Region 2 Division of Environmental Remediation 1 Hunters Point Plaza 47-40 21<sup>st</sup> Street Long Island City, NY 11101 Tel: (718) 482-4096 Email: shaun.bollers@dec.ny.gov Thomas V. Panzone Regional Citizen Participation Specialist NYSDEC, Region 2 47-40 21<sup>st</sup> Street Long Island City, NY 11101 Tel: (718) 482-4953

### New York State Department of Health (NYSDOH):

Krista Anders Project Manager NYSDOH Corning Tower Empire State Plaza, Albany, NY 12237 Tel: (518) 402-7880 Email: BEEI@health.state.ny.us

### **Locations of Reports and Information**

The facilities identified below are being used to provide the public with convenient access to important project documents:

### **Appendix D– Brownfield Cleanup Program Process**

## ATTACHMENT 1

### Remedial Programs Scoping Sheet for Major Issues of Public Concern (see instructions)

Remedial Party:	S & C Properties LLC
Site Name:	Teitelbaum Dry Cleaning Inc.
Site Number:	C241149
Site County:	Queens

# Note: For Parts 1. - 3., the individuals, groups, organizations, businesses and units of government identified should be added to the site contact list as appropriate.

**Part 1.** List major issues of public concern and information the community wants. Identify individuals, groups, organizations, businesses and/or units of government related to the issue(s) and/or information. Use this information as an aid to prepare or update the Major Issues of Public Concern section of the site Citizen

Soil vapor intrusion within the on-site building and possible off-site migration of soil vapor. The Site is located within a potential Environmental Justice Area. Environmental justice is defined as the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies. Environmental justice efforts focus on improving the environmental in communities, specifically minority and low-income communities, and addressing disproportionate adverse environmental impacts that may exist in those communities. Because the Site is located in an area with a large Hispanic-American community, all future fact sheets will be translated into Spanish. Furthermore, there may be impacts util regards to truck traffic coming from the Site, noise and odors as well.

How were these issues and/or information identified?

Site characterization investigation of the Former Luft Co. Inc. Cosmetics Manufacturer site (241139) in 2012

**Part 2.** List important information needed **from** the community, if applicable. Identify groups, organizations, businesses and/or units of government related to the needed information.

N/A

How were these information needs identified?

N/A

**Part 3.** List major issues and information that need to be communicated **to** the community. Identify groups, organizations, businesses and/or units of government related to the issues(s) and/or information.

Commercial tenants of the site building and possibly commercial and residential tenants of the surrounding properties

How were these issues and/or information identified?

.

Site characterization investigation of the Former Luft Co. Inc. Cosmetics Manufacturer site (241139) in 2012

**Part 4.** Identify the following characteristics of the affected/interested community. This knowledge will help to identify and understand issues and information important to the community, and ways to effectively develop and implement the site citizen participation plan (mark all that apply):

a. Land use/zoning around site:			
X Residential Agricultural	Recreational	X Commercial	X Industrial
<b>b.</b> Residential type around site:	X Urban	Suburban	Rural

<b>c.</b> Population density around site:	X <sub>High</sub>	Medium	Low
<b>d.</b> Community economic status:	High	X Medium	Low
e. Water supply of nearby residences:	X Public	Private Wells	Mixed
f. Other environmental issues significantly impact	ting affected comm	nunity? (Yes/No)	No
Explain if "Yes"			
g. Special considerations:	ge Age	Transportation	Other
Explain marked categories in g.:	fact sheets will b	e translated into Spanish	
<b>Part 5.</b> The site contact list must include, at a mir the instructions for <b>Part 5.</b> Are other individuals,	groups and organi	izations affected by, or inter	rested in, the site,
or its remedial program? (Mark and identify all the $\mathbf{X}$	hat apply, then adju		propriate.)
