
PROGRESS REPORT #11

**HPS Parcel F
1-15 57th Avenue, Long Island City, New York
Brownfield Cleanup Program #C241225**

Reporting Period: June 2020

Introduction

In accordance with the Brownfield Cleanup Agreement (Index #C241225), dated December 3, 2018, this Progress Report was prepared by Roux Environmental Engineering and Geology, D.P.C. (Roux) to describe the Brownfield Cleanup Program (BCP) activities at the HPS Parcel F, located at 1-15 57th Avenue, Long Island City, New York (Site) for the month of June 2020. GO HPS LLC is the BCP Volunteer.

I. BCP Activities Completed during the Reporting Period

The Environmental Easement Checklist/Certification package was submitted to NYSDEC on June 18, 2020.

The remedial work completed during this period was done in accordance with the certified Remedial Action Work Plan (RAWP) by Roux dated November 2019. Roux provided oversight of subcontractors and implemented the RAWP Site-specific community air monitoring plan (CAMP) during intrusive activities. CAMP monitoring was performed during each day, weather permitting.

General foundation and support of excavation (SOE) work continued with soil disposal activities occurring, as necessary. Caisson pile drilling continued across the Site as well as the installation of timber lagging and tiebacks along the perimeter of the Site for SOE. Excavation for SOE and foundation elements (i.e. footings) resulted in offsite soil disposal which is discussed in more detail below. Within the deeper footings, which are located near or within the water table, contractors began to excavate soil to facilitate the mixing of soil and grout to prevent/limit groundwater intrusion. Contractors began waterproofing installation prior to pouring a concrete footing and will continue as foundation installation progresses. Additionally, a ConEd electrical vault was installed along the east perimeter of the site in WCF-A2 and placed on top of a concrete pad.

During this reporting period, 54 loads of non-hazardous soil were exported to the Kingsland Landfill in Lyndhurst, New Jersey and 47 loads of non-hazardous soil were exported to the Clean Earth of Philadelphia in Philadelphia, Pennsylvania. Roux was present on all days when soil disturbance/excavation occurred. Daily reports were submitted to NYSDEC.

II. BCP Activities Planned for the Next Reporting Period (July 2020)

A draft Site Management Plan will be prepared for NYSDEC review. Remedial activities will continue in July with SOE installation, excavation, and soil disposal activities. All work will be completed in accordance with the RAWP dated November 2019.

III. Schedule and Changes to Scope of Work or Schedule

No changes to the scope of work or schedule occurred during the reporting period.

IV. Sampling and Other Data Received or Generated during the Reporting Period

Roux collected confirmation soil samples EP-1 (18-20), EP-2 (16-18), EP-3 (20.5-22.5), and EP-4 (19-21) for TAL/TCL+30 and Emerging Contaminants. An additional total petroleum hydrocarbons (TPH) sample was collected from WCF-A1 (9-11) feet below grade for waste characterization purposes.

V. Deliverables Submitted during the Reporting Period

No deliverables were submitted during the reporting period.

VI. Percentage of Work Completion and Any Delays

Remedial activities continued, including excavation and soil disposal. Roux will continue to track and report ongoing soil disposal activities to NYSDEC. Soil excavation is approximately 90% complete.

VII. Citizen's Participation Plan Actions Taken during the Reporting Period

No Citizen Participation Actions occurred during the reporting period.

VIII. Citizen's Participation Plan Actions Planned for the Next Reporting Period

No Citizen Participation Actions planned for next reporting period.
