

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- Get site information faster and share it easily;
- Receive information about all sites in a chosen county - read what you want, delete the rest;
- It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Remedy Proposed for Brownfield Site Contamination; Public Comment Period Announced

The public is invited to comment on a proposed remedy being reviewed by the New York State Department of Environmental Conservation (NYSDEC), in consultation with the New York State Department of Health (NYSDOH), to address contamination related to the 90-02 168th Street Site ("site") located at 90-02 168th Street, Jamaica, NY. Please see the map for the site location.

Based on the findings of the investigation, NYSDEC in consultation with NYSDOH has determined that the site does not pose a significant threat to public health or the environment.

How to Comment: NYSDEC is accepting written comments about the proposed plan, called a "Draft Remedial Action Work Plan (RAWP)" for 45 days, from **May 27 through July 10, 2021.**

- Access the RAWP and other project documents online through the DECinfo Locator: <https://www.dec.ny.gov/data/DecDocs/C241243/>.
- Documents also are available at the location(s) identified at left under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

Draft Remedial Work Plan: The proposed Unrestricted Use remedy consists of:

- Installation of a support of excavation (SOE) system;
- Excavation and off-site disposal of all site soils exceeding the unrestricted use soil cleanup objectives (SCOs);
- Installation of a soil vapor barrier/waterproofing membrane as a precautionary measure and foundation construction element.
- If an Unrestricted Use cleanup is not achieved, implementation of a Site Management Plan (SMP) would also be required for long-term maintenance of the remedial systems; and
- If an Unrestricted Use cleanup is not achieved, recording of an Environmental Easement to ensure proper future use of the site.

The proposed remedy was developed by 90Ninety LLC ("applicant") after performing a detailed investigation of the site under New York's Brownfield Cleanup Program (BCP). A "Remedial Investigation Report", which describes the results of the site investigation was submitted concurrently with the Remedial Action Work Plan and is also available for review at the locations identified in the left column.

BROWNFIELD CLEANUP PROGRAM

Next Steps: NYSDEC will consider public comments, revise the cleanup plan as necessary, and issue a final Decision Document. NYSDOH must concur with the proposed remedy. After approval, the proposed remedy becomes the selected remedy. The applicant(s) may then design and perform the cleanup action to address the site contamination, with oversight by NYSDEC and NYSDOH.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description: The site consists of an approximately 2.28-acre property located at 90-02 168th Street in Jamaica, NY. The property is bounded to the north by 90th Avenue, to the east by 168th Street, to the west by a church complex, a religious bookstore, and residential buildings, and to the south by commercial retail buildings. Records indicate that the site was developed prior to 1886 with residential dwellings and stables. Commercial properties were present on the site by 1925 including a plumbing shop and paint storage shed. An auto repair shop and church were present on the northern portion of the property in the 1940s and 1950s. By 1963 all on-site structures were demolished, and the property has since been utilized for parking. Planned redevelopment includes a mixed-use commercial and residential building with underground parking.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C241243) at:

<https://www.dec.ny.gov/cfmx/extapps/dereexternal/index.cfm?pageid=3>

Summary of the Investigation: The primary contaminants of concern at this site include semi-volatile organic compounds

(SVOCs), metals and pesticides in soil, and volatile organic compounds (VOCs) in soil vapor.

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by NYSDEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:
