Project 2201010

Via email: matthew.hubicki@dec.ny.gov

Mr. Matthew Hubicki
Project Manager, NYSDEC
Division of Environmental Remediation
625 Broadway
Albany, NY 12233-7016

Dear Mr. Hubicki:

**Re: Progress Report – August 2022
Polychrome East Site
City of Yonkers, Westchester County
NYSDEC BCP Site No. C360098**

This Progress Report has been prepared by GEI Consultants, Inc., P.C. (GEI), under contract with Consolidated Edison Company of New York (Con Edison) on behalf of Avalon Yonkers Sun Sites, LLC (AVB) to summarize the work performed at the Polychrome East site [Brownfield Cleanup Program (BCP) Site No. C360098] located at 80-94 Alexander Street, Yonkers, New York (the Site) during the month of August 2022.

Site Activities

On August 4, and 18, 2022, DNAPL gauging was conducted at NW-1, NW-2, NW-3, NW-4, and NW-5. DNAPL recovery wells are equipped with 3-foot sumps. DNAPL was detected during the August 2022 monitoring events in NW-3 and NW-4 as summarized in Table 1. DNAPL measurements from 2022 are provided in Table 2.

DNAPL was removed from recovery well NW-3 using a 2-inch submersible pump and dedicated tubing. DNAPL gauging and recovery amounts for the August events are summarized in Table 1.

The recovered DNAPL was containerized in Department of Transportation (DOT)-approved 55-gallon drums, labeled as hazardous waste, and picked up from the Site for off-site disposal at an appropriate receiving facility. Waste disposal manifests for August are provided as Attachment A.

A total of approximately 5.5 gallons of DNAPL were recovered during the reporting period. Since the start of 2022, a total of 115.86 gallons of DNAPL have been removed. DNAPL recovery totals for 2022 are summarized in Table 3.

The following changes to the monitoring program were approved by NYSDEC in a letter dated August 30, 2022:

- Abandon the following NAPL recovery wells in accordance with procedures detailed in NYSDEC CP-43: Groundwater Monitoring Well Decommissioning Policy.
 - NW-1, NW-2, and NW-5

- Discontinue gauging of NAPL recovery wells NW-1, NW-2, and NW-5 pending well abandonment.
- Discontinue twice monthly gauging/removal and perform the gauging/removal on a monthly basis at NAPL recovery wells NW-3 and NW-4.

The following changes to the monitoring program are proposed:

- Starting October 1, 2022, if less than 6 inches of measurable NAPL is observed at a recovery well for 6 months, NAPL gauging/removal will be reduced from monthly to quarterly.
- If less than 6 inches of measurable NAPL is observed at a recovery well for an additional 6 months from when the monthly gauging is initiated, NAPL gauging/removal will be reduced from quarterly to annually.

The following work is planned for September:

- Complete DNAPL gauging and removal in September 2022 using the same methods as described above at a frequency of once monthly while long-term trends and alternate recovery methods are evaluated.
- Disposal, as needed, of recovered DNAPL and used personal protective equipment and field supplies.
- Prepare and submit the Groundwater Monitoring Well Decommissioning Work Plan to NYSDEC.

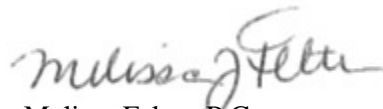

If you have any questions or require any further information, please contact Melissa Abt at Con Edison at 718-204-4331 or via electronic mail at abtm@coned.com.

Sincerely,

GEI CONSULTANTS, INC., P.C.

Matt O'Neil, P.E.
Vice President, Program Manager

Melissa Felter, P.G.
Project Manager
