

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites electronically by email.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

FACT SHEET

Brownfield Cleanup Program

Sun Valley Nursery Filling
Station
136-140 Croton Avenue
Ossining, NY 10562

June 2022

SITE No. C360207
NYSDEC REGION 3

Draft Investigation Work Plan for Brownfield Site Available for Public Comment

The public is invited to comment on a draft work plan being reviewed by the New York State Department of Environmental Conservation (NYSDEC) to investigate the Sun Valley Nursery Filling Station site ("site") located at 136-140 Croton Avenue, Ossining, Westchester County. Please see the map for the site location.

Draft Investigation Work Plan: The draft investigation work plan, called a "Remedial Investigation Work Plan," (RIWP) was submitted to NYSDEC under New York's Brownfield Cleanup Program. The investigation will be performed by 136-140 Croton Avenue LLC ("applicant") with oversight by NYSDEC and the New York State Department of Health (NYSDOH).

How to Comment: NYSDEC is accepting written comments about the Draft RIWP for 30 days, from **June 22 through July 21, 2022**.

- Access the RIWP and other project documents online through the DECinfo Locator: <https://www.dec.ny.gov/data/DecDocs/C360207/>.
- Documents also are available at the location(s) identified at left under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

Highlights of the Proposed Site Investigation: The investigation will define the nature and extent of contamination in soil, soil vapor, surface water, groundwater and any other parts of the environment that may be affected.

Previous investigations have detected volatile and semi-volatile organic compounds (VOCs and SVOCs), and metals in soil and groundwater on site.

Key components of the investigation work include:

- Drilling and sampling soil borings to identify possible on-site sources of contamination;
- Collecting soil vapor samples; and
- Installing and sampling ground water wells to monitor impacts from areas of concern on-site.

Next Steps: NYSDEC will review public comments, revise the plan as necessary, and approve the work plan. NYSDOH must concur with the plan. After the work plan is approved, the activities detailed in the work plan will be implemented.

When the investigation is completed, a report will be prepared and submitted to NYSDEC that summarizes the results. NYSDEC will review the report, make any necessary revisions and, if appropriate, approve the report.

After the investigation, a proposed cleanup plan, called a "Draft Remedial Work Plan" will be developed. The cleanup plan will include an evaluation of the proposed site remedy, or recommend a no action or no further action alternative. The goal of the cleanup plan is to ensure the protection of public health and the environment. NYSDEC will present the proposed cleanup plan to the public for its review and comment during a 45-day comment period.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description: The site is 0.8 acres and is bordered on the west by Prospect Avenue, on the east by Watson Avenue, on the south by single family housing, and on the north by Croton Avenue. It is currently vacant with no structures. A garden nursery was the last occupant at the site, between 1997 and December 2017. All structures were demolished by February 2020. The site had previously been used as a gas station, taxi service, and auto repair facility between the 1940s and 1997.

The planned redevelopment of the site will be a mix of retail space and apartments. The anticipated cleanup standard will be to restricted residential use.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C360207) at:

<https://www.dec.ny.gov/cfm/external/index.cfm?pageid=3>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://www.dec.ny.gov/chemical/8450.html>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
