December 2017
BROWNFIELD CLEANUP PROGRAM (BCP)
APPLICATION FORM

DEC requires an application to request major changes to the description of the property set forth in a Brownfield Cleanup Agreement, or "BCA" (e.g., adding a significant amount of new property, or adding property that could affect an eligibility determination due to contamination levels or intended land use). Such application must be submitted and processed in the same manner as the original application, including the required public comment period. Is this an application to amend an existing BCA?

<table>

Is the requestor authorized to conduct business in New York State (NYS)?

- If the requestor is a Corporation, LLC, LLP or other entity requiring authorization from the NYS Department of State to conduct business in NYS, the requestor’s name must appear, exactly as given above, in the [NYS Department of State’s Corporation & Business Entity Database](https://www.dos.ny.gov). A print-out of entity information from the database must be submitted to the New York State Department of Environmental Conservation (DEC) with the application, to document that the requestor is authorized to do business in NYS.

Do all individuals that will be certifying documents meet the requirements detailed below?

- Individuals that will be certifying BCP documents, as well as their employers, meet the requirements of Section 1.5 of [DER-10, Technical Guidance for Site Investigation and Remediation](https://www.dec.ny.gov/oper/65588.html) and Article 145 of New York State Education Law. Documents that are not properly certified will be not approved under the BCP.

**Section II. Project Description**

1. What stage is the project starting at? **Investigation**

2. If the project is starting at the remediation stage, a Remedial Investigation Report (RIR), Alternatives Analysis, and Remedial Work Plan must be attached (see [DER-10, Technical Guidance for Site Investigation and Remediation](https://www.dec.ny.gov/oper/65588.html) for further guidance).

3. If a final RIR is included, please verify it meets the requirements of Environmental Conservation Law (ECL) Article 27-1415(2): **Yes**

4. Please attach a short description of the overall development project, including:

   - the date that the remedial program is to start; and
   - the date the Certificate of Completion is anticipated.
Section III. Property’s Environmental History

All applications must include an Investigation Report (per ECL 27-1407(1)). The report must be sufficient to establish contamination of environmental media on the site above applicable Standards, Criteria and Guidance (SCGs) based on the reasonably anticipated use of the property.

To the extent that existing information/studies/reports are available to the requestor, please attach the following (please submit the information requested in this section in electronic format only):

1. Reports: an example of an Investigation Report is a Phase II Environmental Site Assessment report prepared in accordance with the latest American Society for Testing and Materials standard (ASTM E1903).

2. SAMPLING DATA: INDICATE KNOWN CONTAMINANTS AND THE MEDIA WHICH ARE KNOWN TO HAVE BEEN AFFECTED. LABORATORY REPORTS SHOULD BE REFERENCED AND COPIES INCLUDED.

*Please describe:

3. FOR EACH IMPACTED MEDIUM INDICATED ABOVE, INCLUDE A SITE DRAWING INDICATING:

- SAMPLE LOCATION
- DATE OF SAMPLING EVENT
- KEY CONTAMINANTS AND CONCENTRATION DETECTED
- FOR SOIL, HIGHLIGHT IF ABOVE REASONABLY ANTICIPATED USE
- FOR GROUNDWATER, HIGHLIGHT EXCEEDANCES OF 6NYCRR PART 703.5
- FOR SOIL GAS/ SOIL VAPOR/ INDOOR AIR, HIGHLIGHT IF ABOVE MITIGATE LEVELS ON THE NEW YORK STATE DEPARTMENT OF HEALTH MATRIX

THESE DRAWINGS ARE TO BE REPRESENTATIVE OF ALL DATA BEING RELIED UPON TO MAKE THE CASE THAT THE SITE IS IN NEED OF REMEDIATION UNDER THE BCP. DRAWINGS SHOULD NOT BE BIGGER THAN 11" X 17". THESE DRAWINGS SHOULD BE PREPARED IN ACCORDANCE WITH ANY GUIDANCE PROVIDED.

ARE THE REQUIRED MAPS INCLUDED WITH THE APPLICATION? ✓ Yes  ❌ No

4. INDICATE PAST LAND USES (CHECK ALL THAT APPLY):

- ☐ Coal Gas Manufacturing ☑ Manufacturing
- ☐ Agricultural Co-op  ☐ Dry Cleaner
- ☐ Salvage Yard  ☐ Bulk Plant  ☜ Pipeline
- ☐ Landfill ✓ Tannery  ☐ Electroplating  ☐ Service Station
- ☐ Unknown

Other: Fertilizer manufacturing; meat processing and packaging facility; auto storage and repair
**Section IV. Property Information - See Instructions for Further Guidance**

**PROPOSED SITE NAME** First Prize Center Site

**ADDRESS/LOCATION** See Support Document. The Site has three addresses in two municipalities.

1. Do the proposed site boundaries correspond to tax map metes and bounds?  
   If no, please attach a metes and bounds description of the property.
   - Yes  
   - No

2. Is the required property map attached to the application?  
   (application will not be processed without map)
   - Yes  
   - No

3. Is the property within a designated Environmental Zone (En-zone) pursuant to Tax Law 21(b)(6)?  
   (See DEC’s website for more information)
   - Yes  
   - No
   
   **If yes, identify census tract:** 3
   
   **Percentage of property in En-zone (check one):**
   - Yes  
   - No

4. Is this application one of multiple applications for a large development project, where the development project spans more than 25 acres (see additional criteria in BCP application instructions)?
   - Yes  
   - No
   
   **If yes, identify name of properties (and site numbers if available) in related BCP applications:**

5. Is the contamination from groundwater or soil vapor solely emanating from property other than the site subject to the present application?
   - Yes  
   - No

6. Has the property previously been remediated pursuant to Titles 9, 13, or 14 of ECL Article 27, Title 5 of ECL Article 56, or Article 12 of Navigation Law?
   - Yes  
   - No
   
   **If yes, attach relevant supporting documentation.**

7. Are there any lands under water?  
   If yes, these lands should be clearly delineated on the site map.
   - Yes  
   - No
Section IV. Property Information (continued)

8. Are there any easements or existing rights of way that would preclude remediation in these areas? If yes, identify here and attach appropriate information.
   - Yes ☑ No ☐

   **Easement/Right-of-way Holder**
   Multiple access and utility easements; see Exhibit C, Deed Schedule B.

   **Description**
   See Exhibit C, Deed Schedule B.

9. List of Permits issued by the DEC or USEPA Relating to the Proposed Site (type here or attach information)

10. Property Description and Environmental Assessment – please refer to application instructions for the proper format of each narrative requested.
    Are the Property Description and Environmental Assessment narratives included in the prescribed format?
    - Yes ☑ No ☐

11. For sites located within the five counties comprising New York City, is the requestor seeking a determination that the site is eligible for tangible property tax credits? If yes, requestor must answer questions on the supplement at the end of this form.
    - Yes ☐ No ☑

12. Is the Requestor now, or will the Requestor in the future, seek a determination that the property is Upside Down?
    - Yes ☑ No ☐

13. If you have answered Yes to Question 12, above, is an independent appraisal of the value of the property, as of the date of application, prepared under the hypothetical condition that the property is not contaminated, included with the application?
    - Yes ☑ No ☐

**NOTE:** If a tangible property tax credit determination is not being requested in the application to participate in the BCP, the applicant may seek this determination at any time before issuance of a certificate of completion by using the BCP Amendment Application, except for sites seeking eligibility under the underutilized category.

If any changes to Section IV are required prior to application approval, a new page, initialed by each requestor, must be submitted.

Initials of each Requestor: _______ _______ _______ _______ _______ _______
**Section V. Additional Requestor Information**

**NAME OF REQUESTOR'S AUTHORIZED REPRESENTATIVE** Simon J. Milde, Managing Member

**ADDRESS** c/o William Hoblock, 8 Paddocks Circle

**CITY/TOWN** Saratoga Springs  **ZIP CODE** 12866

**PHONE** (518) 786-7100  **FAX** N/A  **E-MAIL** William.Hoblock@rbc-ny.com

**NAME OF REQUESTOR'S CONSULTANT** C.T. Male Associates, Kirk Moline

**ADDRESS** 50 Century Hill Drive

**CITY/TOWN** Latham  **ZIP CODE** 12110

**PHONE** (518) 786-7502  **FAX** (518) 786-7299  **E-MAIL** k.moline@ctmale.com

**NAME OF REQUESTOR'S ATTORNEY** Knauf Shaw LLP, Linda R. Shaw, Esq.

**ADDRESS** 1400 Crossroads Building, 2 State Street

**CITY/TOWN** Rochester  **ZIP CODE** 14614

**PHONE** (585) 546-8430  **FAX** (585) 546-4324  **E-MAIL** Ishaw@nyenflaw.com

**Section VI. Current Property Owner/Operator Information – if not a Requestor**

**CURRENT OWNER'S NAME** Exchange Street Associates LLC  **OWNERSHIP START DATE** 3/31/2015

**ADDRESS** 25 Mason Lane

**CITY/TOWN** Slingerlands  **ZIP CODE** 12159

**PHONE** (518) 439-6103  **FAX** N/A  **E-MAIL** frankjcrisafulli@gmail.com

**CURRENT OPERATOR’S NAME** See Exhibit E, Past Owners and Operators List, which also includes current Operators.

**ADDRESS** See Exhibit E

**CITY/TOWN**  **ZIP CODE**

**PHONE**  **FAX**  **E-MAIL**

**IF REQUESTOR IS NOT THE CURRENT OWNER, DESCRIBE REQUESTOR’S RELATIONSHIP TO THE CURRENT OWNER, INCLUDING ANY RELATIONSHIP BETWEEN REQUESTOR’S CORPORATE MEMBERS AND THE CURRENT OWNER. PROVIDE A LIST OF PREVIOUS PROPERTY OWNERS AND OPERATORS WITH NAMES, LAST KNOWN ADDRESSES AND TELEPHONE NUMBERS AS AN ATTACHMENT. DESCRIBE REQUESTOR’S RELATIONSHIP, TO EACH PREVIOUS OWNER AND OPERATOR, INCLUDING ANY RELATIONSHIP BETWEEN REQUESTOR’S CORPORATE MEMBERS AND PREVIOUS OWNER AND OPERATOR. IF NO RELATIONSHIP, PUT “NONE”.

**Section VII. Requestor Eligibility Information (Please refer to ECL § 27-1407)**

If answering “yes” to any of the following questions, please provide an explanation as an attachment.

1. Are any enforcement actions pending against the requestor regarding this site?  □ Yes  □ No

2. Is the requestor subject to an existing order for the investigation, removal or remediation of contamination at the site?  □ Yes  □ No

3. Is the requestor subject to an outstanding claim by the Spill Fund for this site? Any questions regarding whether a party is subject to a spill claim should be discussed with the Spill Fund Administrator.  □ Yes  □ No
Section VII. Requestor Eligibility Information (continued)

4. Has the requestor been determined in an administrative, civil or criminal proceeding to be in violation of i) any provision of the ECL Article 27; ii) any order or determination; iii) any regulation implementing Title 14; or iv) any similar statute, regulation of the state or federal government? If so, provide an explanation on a separate attachment.
   [ ] Yes [ ] No

5. Has the requestor previously been denied entry to the BCP? If so, include information relative to the application, such as name, address, DEC assigned site number, the reason for denial, and other relevant information.
   [ ] Yes [ ] No

6. Has the requestor been found in a civil proceeding to have committed a negligent or intentionally tortious act involving the handling, storing, treating, disposing or transporting of contaminants?
   [ ] Yes [ ] No

7. Has the requestor been convicted of a criminal offense i) involving the handling, storing, treating, disposing or transporting of contaminants; or ii) that involves a violent felony, fraud, bribery, perjury, theft, or offense against public administration (as that term is used in Article 195 of the Penal Law) under federal law or the laws of any state?
   [ ] Yes [ ] No

8. Has the requestor knowingly falsified statements or concealed material facts in any matter within the jurisdiction of DEC, or submitted a false statement or made use of or made a false statement in connection with any document or application submitted to DEC?
   [ ] Yes [ ] No

9. Is the requestor an individual or entity of the type set forth in ECL 27-1407.9 (f) that committed an act or failed to act, and such act or failure to act could be the basis for denial of a BCP application?
   [ ] Yes [ ] No

10. Was the requestor’s participation in any remedial program under DEC’s oversight terminated by DEC or by a court for failure to substantially comply with an agreement or order?
    [ ] Yes [ ] No

11. Are there any unregistered bulk storage tanks on-site which require registration?
    [ ] Yes [ ] No

THE REQUESTOR MUST CERTIFY THAT HE/SHE IS EITHER A PARTICIPANT OR VOLUNTEER IN ACCORDANCE WITH ECL 27-1405 (1) BY CHECKING ONE OF THE BOXES BELOW:

☐ PARTICIPANT

A requestor who either 1) was the owner of the site at the time of the disposal of hazardous waste or discharge of petroleum or 2) is otherwise a person responsible for the contamination, unless the liability arises solely as a result of ownership, operation of, or involvement with the site subsequent to the disposal of hazardous waste or discharge of petroleum.

☑ VOLUNTEER

A requestor other than a participant, including a requestor whose liability arises solely as a result of ownership, operation of or involvement with the site subsequent to the disposal of hazardous waste or discharge of petroleum.

NOTE: By checking this box, a requestor whose liability arises solely as a result of ownership, operation of or involvement with the site certifies that he/she has exercised appropriate care with respect to the hazardous waste found at the facility by taking reasonable steps to: i) stop any continuing discharge; ii) prevent any threatened future release; iii) prevent or limit human, environmental, or natural resource exposure to any previously released hazardous waste.

If a requestor whose liability arises solely as a result of ownership, operation of or involvement with the site, submit a statement describing why you should be considered a volunteer – be specific as to the appropriate care taken.
Section VII. Requestor Eligibility Information (continued)

Requestor Relationship to Property (check one):
[ ] Previous Owner [ ] Current Owner [ ] Potential /Future Purchaser [ ] Other ________________

If requestor is not the current site owner, proof of site access sufficient to complete the remediation must be submitted. Proof must show that the requestor will have access to the property before signing the BCA and throughout the BCP project, including the ability to place an easement on the site. Is this proof attached?

[ ] Yes [ ] No

Note: a purchase contract does not suffice as proof of access.

Section VIII. Property Eligibility Information - See Instructions for Further Guidance

1. Is / was the property, or any portion of the property, listed on the National Priorities List? If yes, please provide relevant information as an attachment.

   [ ] Yes [ ] No

2. Is / was the property, or any portion of the property, listed on the NYS Registry of Inactive Hazardous Waste Disposal Sites pursuant to ECL 27-1305?

   If yes, please provide: Site # __________________ Class # __________________

   [ ] Yes [ ] No

3. Is / was the property subject to a permit under ECL Article 27, Title 9, other than an Interim Status facility?

   If yes, please provide: Permit type: ________________ EPA ID Number: ________________

   Date permit issued: ________________ Permit expiration date: ________________

   [ ] Yes [ ] No

4. If the answer to question 2 or 3 above is yes, is the site owned by a volunteer as defined under ECL 27-1405(1)(b), or under contract to be transferred to a volunteer? Attach any information available to the requestor related to previous owners or operators of the facility or property and their financial viability, including any bankruptcy filing and corporate dissolution documentation.

   [ ] Yes [ ] No

5. Is the property subject to a cleanup order under Navigation Law Article 12 or ECL Article 17 Title 10?

   If yes, please provide: Order #: __________________

   [ ] Yes [ ] No

6. Is the property subject to a state or federal enforcement action related to hazardous waste or petroleum?

   If yes, please provide explanation as an attachment.

   [ ] Yes [ ] No

Section IX. Contact List Information

To be considered complete, the application must include the Brownfield Site Contact List in accordance with DER-23 / Citizen Participation Handbook for Remedial Programs. Please attach, at a minimum, the names and addresses of the following:

1. The chief executive officer and planning board chairperson of each county, city, town and village in which the property is located.
2. Residents, owners, and occupants of the property and properties adjacent to the property.
3. Local news media from which the community typically obtains information.
4. The public water supplier which services the area in which the property is located.
5. Any person who has requested to be placed on the contact list.
6. The administrator of any school or day care facility located on or near the property.
7. The location of a document repository for the project (e.g., local library). In addition, attach a copy of an acknowledgement from the repository indicating that it agrees to act as the document repository for the property.
8. Any community board located in a city with a population of one million or more, if the proposed site is located within such community board’s boundaries.
# Section X. Land Use Factors

1. What is the current zoning for the site? What uses are allowed by the current zoning?
   - Residential 
   - Commercial 
   - Industrial
   If zoning change is imminent, please provide documentation from the appropriate zoning authority.

2. Current Use: 
   - Residential
   - Commercial
   - Industrial
   - Vacant
   - Recreational
   (check all that apply)
   Attach a summary of current business operations or uses, with an emphasis on identifying possible contaminant source areas. If operations or uses have ceased, provide the date.

3. Reasonably anticipated use Post Remediation: 
   - Residential
   - Commercial
   - Industrial
   (check all that apply)
   Attach a statement detailing the specific proposed use.
   If residential, does it qualify as single family housing? 
   - Yes
   - No

4. Do current historical and/or recent development patterns support the proposed use? 
   - Yes
   - No

5. Is the proposed use consistent with applicable zoning laws/maps? Briefly explain below, or attach additional information and documentation if necessary.
   See Support Document.

6. Is the proposed use consistent with applicable comprehensive community master plans, local waterfront revitalization plans, or other adopted land use plans? Briefly explain below, or attach additional information and documentation if necessary.
   See Support Document.
XI. Statement of Certification and Signatures

(By requestor who is an individual)

If this application is approved, I hereby acknowledge and agree: (1) to execute a Brownfield Cleanup Agreement (BCA) within 60 days of the date of DEC’s approval letter; (2) to the general terms and conditions set forth in the Proposed DER-32, Brownfield Cleanup Program Applications and Agreements; and (3) that in the event of a conflict between the general terms and conditions of participation and the terms contained in a site-specific BCA, the terms in the site-specific BCA shall control. Further, I hereby affirm that information provided on this form and its attachments is true and complete to the best of my knowledge and belief. I am aware that any false statement made herein is punishable as a Class A misdemeanor pursuant to section 210.45 of the Penal Law.

Date: __________________ Signature: __________________________
Print Name: __________________

(By a requestor other than an individual)

I hereby affirm that I am _________________ (title) of ______________________ (entity); that I am authorized by that entity to make this application and execute the Brownfield Cleanup Agreement (BCA) and all subsequent amendments; that this application was prepared by me or under my supervision and direction. If this application is approved, I acknowledge and agree: (1) to execute a BCA within 60 days of the date of DEC’s approval letter; (2) to the general terms and conditions set forth in the Proposed DER-32, Brownfield Cleanup Program Applications and Agreements; and (3) that in the event of a conflict between the general terms and conditions of participation and the terms contained in a site-specific BCA, the terms in the site-specific BCA shall control. Further, I hereby affirm that information provided on this form and its attachments is true and complete to the best of my knowledge and belief. I am aware that any false statement made herein is punishable as a Class A misdemeanor pursuant to Section 210.45 of the Penal Law.

Date: 12/18/2017 Signature: __________________________

SUBMITTAL INFORMATION:

- Two (2) copies, one paper copy with original signatures and one electronic copy in Portable Document Format (PDF), must be sent to:
  - Chief, Site Control Section
  - New York State Department of Environmental Conservation
  - Division of Environmental Remediation
  - 625 Broadway
  - Albany, NY 12233-7020

FOR DEC USE ONLY
BCP SITE T&A CODE: __________________ LEAD OFFICE: __________________
Supplemental Questions for Sites Seeking Tangible Property Credits in New York City ONLY. Sufficient information to demonstrate that the site meets one or more of the criteria identified in ECL 27 1407(1-a) must be submitted if requestor is seeking this determination.

**BCP App Rev 9**

| Property is in Bronx, Kings, New York, Queens, or Richmond counties. | ☐ Yes ☑ No |
| Requestor seeks a determination that the site is eligible for the tangible property credit component of the brownfield redevelopment tax credit. | ☐ Yes ☑ No |

Please answer questions below and provide documentation necessary to support answers.

1. Is at least 50% of the site area located within an environmental zone pursuant to NYS Tax Law 21(b)(6)?
   - Please see DEC's website for more information.
   - ☐ Yes ☐ No

2. Is the property upside down or underutilized as defined below?
   - Upside Down? ☐ Yes ☐ No
   - Underutilized? ☐ Yes ☐ No

From ECL 27-1405(31):

"Upside down" shall mean a property where the projected and incurred cost of the investigation and remediation which is protective for the anticipated use of the property equals or exceeds seventy-five percent of its independent appraised value, as of the date of submission of the application for participation in the brownfield cleanup program, developed under the hypothetical condition that the property is not contaminated.

From 6 NYCRR 375-3.2(l) as of August 12, 2016: (Please note: Eligibility determination for the underutilized category can only be made at the time of application)

375-3.2:

   (l) "Underutilized" means, as of the date of application, real property on which no more than fifty percent of the permissible floor area of the building or buildings is certified by the applicant to have been used under the applicable base zoning for at least three years prior to the application, which zoning has been in effect for at least three years; and

   (1) the proposed use is at least 75 percent for industrial uses; or

   (2) at which:

   (i) the proposed use is at least 75 percent for commercial or commercial and industrial uses;

   (ii) the proposed development could not take place without substantial government assistance, as certified by the municipality in which the site is located; and

   (iii) one or more of the following conditions exists, as certified by the applicant:

   (a) property tax payments have been in arrears for at least five years immediately prior to the application;

   (b) a building is presently condemned, or presently exhibits documented structural deficiencies, as certified by a professional engineer, which present a public health or safety hazard; or

   (c) there are no structures.

"Substantial government assistance" shall mean a substantial loan, grant, land purchase subsidy, land purchase cost exemption or waiver, or tax credit, or some combination thereof, from a governmental entity.
3. If you are seeking a formal determination as to whether your project is eligible for Tangible Property Tax Credits based in whole or in part on its status as an affordable housing project (defined below), you must attach the regulatory agreement with the appropriate housing agency (typically, these would be with the New York City Department of Housing, Preservation and Development; the New York State Housing Trust Fund Corporation; the New York State Department of Housing and Community Renewal; or the New York State Housing Finance Agency, though other entities may be acceptable pending Department review). Check appropriate box, below:

☐ Project is an Affordable Housing Project - Regulatory Agreement Attached;

☐ Project is Planned as Affordable Housing, But Agreement is Not Yet Available* (*Checking this box will result in a “pending” status. The Regulatory Agreement will need to be provided to the Department and the Brownfield Cleanup Agreement will need to be amended prior to issuance of the CoC in order for a positive determination to be made.);

☐ This is Not an Affordable Housing Project.

From 6 NYCRR 375- 3.2(a) as of August 12, 2016:

(a) “Affordable housing project” means, for purposes of this part, title fourteen of article twenty seven of the environmental conservation law and section twenty-one of the tax law only, a project that is developed for residential use or mixed residential use that must include affordable residential rental units and/or affordable home ownership units.

(1) Affordable residential rental projects under this subdivision must be subject to a federal, state, or local government housing agency’s affordable housing program, or a local government’s regulatory agreement or legally binding restriction, which defines (i) a percentage of the residential rental units in the affordable housing project to be dedicated to (ii) tenants at a defined maximum percentage of the area median income based on the occupants’ households annual gross income.

(2) Affordable home ownership projects under this subdivision must be subject to a federal, state, or local government housing agency’s affordable housing program, or a local government’s regulatory agreement or legally binding restriction, which sets affordable units aside for home owners at a defined maximum percentage of the area median income.

(3) “Area median income” means, for purposes of this subdivision, the area median income for the primary metropolitan statistical area, or for the county if located outside a metropolitan statistical area, as determined by the United States department of housing and urban development, or its successor, for a family of four, as adjusted for family size.

ENVIRONMENTAL REPORTS SEPARATELY ATTACHED ON CD:

D. 1990 Draft Phase I ESA Update Report, by C.T. Male
E. 1990 Subsurface Investigation of Spills Areas and Soil Removal Report, by C.T. Male
G. 2001 Phase I ESA Report, by C.T. Male
H. 2001 GZA GeoEnvironmental, Inc. (“GZA”) Analytical Report, Boring Log, Bore Hole and Test Pit Locations and Field Logs, and Laboratory Report
I. 2004 Phase I ESA Report, by C.T. Male
SECTION I - REQUESTOR INFORMATION

The Requestor is First Prize Development Partners, LLC, a Delaware limited liability corporation, located at 8 Paddocks Circle, Saratoga Springs, New York 12866. First Prize Development Partners, LLC is authorized to do business in the State of New York. See Exhibit A, Delaware Secretary of State Certificate of Good Standing, and NYSDOS Entity Information. The members/owners are as follows:

1. Simon J. Milde (Managing Member)
2. William M. Hoblock (Member)
3. Tobias Milde (Member)
4. James J. Flood (Member)

The Written Consent provides Simon J. Milde authority to sign all Brownfield Cleanup Program ("BCP") documents on behalf of the Requestor First Prize Development Partners, LLC. See Exhibit B, Written Consent.

As further described below, the site is composed of the following three parcels:

1. 68 Exchange Street, Town of Colonie, New York 12205 (Tax Parcel No. Section 53.16 Block 1 Lot 23.1) ("Tax Parcel 1");
2. Rear Russell Road, City of Albany, New York, New York 12203 (Section 53.60 Block 1 Lot 3.1) ("Tax Parcel 2"); and
3. Russell Road, City of Albany, New York 12203 (Section 53.59 Block 1 Lot No. 1 ("Tax Parcel 3"). See Exhibit G, survey depicting each Tax Parcel

Collectively, Tax Parcels 1, 2, and 3 are the “Site” or “BCP Site”. Requestor is not yet the owner of the three parcels that make up the Site. Exchange Street Associates LLC, located at 25 Mason Lane, Slingerlands, New York 12159 ("Owner") is the current owner of Tax Parcels 1-3. See Exhibits C, Deed and Exhibit G Survey. Requestor is a prospective purchaser and has received a temporary license from the Owner to access the property to perform investigation and remediation work required by the BCP. See Exhibit D, Site Access Agreement.

The Requestor has no prior relationship with any current or past owners or operators of the Site. See Sections V and VI below, and Exhibit E, Previous Owners and Operators List. The Requestor did not cause any of the contamination of the Site, which predates the Requestor’s involvement at the Site.

SECTION II - PROJECT DESCRIPTION

[Please refer to Questions 1-3 on the BCP Application Form]

4. Short Project Description

The blighted site is one of the largest eyesores in the entire Capital Region. Redevelopment of the site has been consistently abandoned as a result of the significant costs associated with the demolition of over 400,000 square feet of concrete reinforced structures and environmental contamination clean-up. However, The First Prize Center redevelopment will transform the blight into the Capital Region’s first comprehensive vibrant mixed-use community, while thwarting suburban sprawl and use of green spaces at the same time. Based on the principles of New Urbanism, The First Prize Center will create a self-sustaining hub that combines living, working, and shopping in a single, walkable destination. The community will integrate housing with shops, restaurants, entertainment, places to work, and green space. The pedestrian-
friendly design of the redeveloped First Prize Center will incorporate the basic elements of Smart Growth and sustainability in order to achieve the goal of a community where one can live, work and play.

Once transformed, The First Prize Center will consist of approximately 1.8 million total square feet of various uses. The redevelopment will include approximately 1.1 million square feet of multi-family residences; 160,000 square feet of retail stores and restaurants; 250,000 square feet of office space; a full service hotel; a health club; an urban grocery store; a multi-plex movie theater; and vast open areas of community active and passive outdoor recreational space.

The redevelopment of the decaying First Prize Center property is timed perfectly with the rapid growth being seen throughout the Capital Region due in large part to the increase in the technology sector of the economy and employment base. This growth has led to the migration of people into the Capital Region from urban technology hubs from across the country and world. Such people are used to quality high-density mixed use centers and communities integrating live, work and play spaces. As this type of lifestyle is sought out in the Capital Region, the options simply do not currently exist. Mixed-use communities are thriving throughout the country, and the Capital Region is ripe for such a development.

The redevelopment will create thousands of temporary jobs and approximately 750 permanent jobs over the course of the buildout. The redevelopment will be constructed in phases. Assuming good market absorption, the project is currently anticipated to be built in four phases and total build-out is expected to exceed 8 years.

**Schedule- Commencement through COC**

The Site has been preliminarily investigated over a number of years. The Remedial Investigation Work Plan (“RIWP”), which will outline the RI work to be performed on the Site, is estimated to be completed between April 2018 and May 2018. The Remedial Investigation Report (“RIR”), which will summarize all RI work performed on Site, is estimated to be completed in the summer of 2018. The Remedial Action Work Plan (“RAWP”) will be completed in the fall of 2018. Any required remediation may commence in the winter of 2018, or spring of 2019. The Certificate of Completion is anticipated to be issued in 2019. As described below, the Site is in the recently formed First Prize District, including a variety of uses. With respect to the local land use approvals for the project, all uses are permitted as of right with Site Plan approval. See Section X(1) for a full list of permitted uses in the First Prize District. Site Plan approval will be sought shortly after admission into the BCP.

**SECTION III – PROPERTY’S ENVIRONMENTAL HISTORY**

1. **List of Environmental Reports**

   The following is the list of environmental reports for the Site separately attached:

   D. 1990 Draft Phase I ESA Update Report, by C.T. Male
   E. 1990 Subsurface Investigation of Spills Areas and Soil Removal Report, by C.T. Male

This Phase I was prepared by C.T. Male on behalf of Exchange Express Limited Partnership as required by the Bank of New England for due diligence prior to this entity’s planned purchase of the Site at this time. The report was completed for only approximately 2.3 acres of the Site on the undeveloped northwest portion of the former Tobin Packing Co., Inc. (“Tobin”) plant and associated properties. However, the historical use descriptions cover the entire BCP Site.

Tobin was an animal slaughterhouse and meat packaging plant that operated on the Property between the 1920s and 1980s. [NOTE: The 2004 C.T. Male Phase I identified an owner prior to Tobin, Consolidated Rendering Company, which sold the Property to Tobin in 1953; although Tobin did operate on the Property beginning in 1924. Consolidated Rendering Company manufactured fertilizers and glue; and also performed meat slaughter and packaging.] The Federal government acquired the property from Tobin Packing Co. after they went bankrupt in the early 1980’s, and in turn sold it to the Albany County Industrial Development Agency (“IDA”). The IDA leased the entire parcel to several entities in the 1980s. A more thorough history of the lessees is described in the 1988 Phase I summary below at Section III(1)(B), and outlined in Exhibit E, Previous Owners and Operators List.

At the time this report was written in 1987, this 2.3 acre portion of the Site was used for storage of a few mobile homes by RV Rentals of Albany (subleased from Brooks Financial Corp.), items of heavy construction equipment, and two guard houses; and a majority of it was surrounded by a chain link fence. This part of the property was vacant in the 1940s through 1960s, and was used for recreation by children. In the 1970s, this portion of the Site was used for Tobin employee parking.

This Phase I report noted that numerous empty 55 gallon drums and wooden carts allegedly left by Tobin were stored near the southwestern portion of the property. No surficial evidence suggesting the presence of hazardous substances or oil contamination on site or areas abutting the site was observed by C.T. Male Associates’ personnel during site visits.

While there were no notices of violations from any state, local, or federal agencies, or local neighbor complaints on this portion of the Property; the larger site did receive complaints when Tobin was in operation. These complaints were about odors in the area and pollution of surface water (Patroon Creek specifically) with conventional pollutants (i.e. organic wastes high in biological oxygen demand, oil and grease, and suspended solids). To alleviate the above problem, Tobin installed a wastewater treatment plant to treat their wastewater prior to discharging it to Patroon Creek and later the Albany County Sewer District. Odor complaints were the result of an incinerator on site that burned animal carcasses etc. to create an organic potash, which was in turn a marketed product. Another incinerator located west of the main Tobin Plant was used in the early years and up to the 1960s (exact dates unknown) to burn paper and wood refuse. Complaints were filed in relation to this second incinerator’s discharge of soot in the area.

The Tobin Plant operated a machine shop and garage for purposes of equipment repair and vehicle maintenance where it may have used some degreasers and lubricating oils. At the time of this Report, the garage area was leased by Goodyear Tire and Rubber Co. from Brooks Financial Corp.
Goodyear used the facility to recap tires. Other portions of the former Tobin complex were leased primarily for office and warehousing purposes. The railroad tracks adjacent to the subject site which were a part of the former Tobin Complex have not been used since the late 1970s.

Subsurface Investigation
Subsurface explorations for this site assessment consisted of advancing three soil test borings to a depth of 5-8 feet below the ground surface (bgs) at which groundwater was encountered, and taking continuous split spoon soil samples per ASTM D-1586. The boring locations are shown on Figure 1 of the Report, and soil logs of the test borings are enclosed in Appendix C of the Report.

Test boring #1 encountered a gravel and sand subbase from 0-2 feet bgs which graded to fine to medium sand from 2-10 feet bgs. Groundwater was encountered at approximately 3 feet bgs, and the groundwater level in the hollow stem auger at the termination of boring was at 5.8 feet bgs. Test boring #2 encountered a gravel and sand subbase from 0-2 feet bgs, fine sand from 2-6 feet bgs, and grey silt and clay from 6-8 feet bgs. Groundwater was encountered at approximately 2.5 feet bgs, and no measurable groundwater was noted inside the auger at completion of the boring. In general, test boring #3 encountered orange-brown fine sand from 0-12 feet bgs. Groundwater was encountered at approximately 4 feet bgs, and the groundwater level in the auger at termination of the boring was at 7.5 feet bgs.

Laboratory Analyses and Results
Two samples from each test boring, one near the surface (2-4 feet bgs) and the other below the depth at which groundwater was encountered (6-8 feet bgs) were analyzed, and the following results were found in soil:

1. Silver was detected in one soil sample from test boring #2 at 6-8 feet bgs at 1.3 ug/g; and
2. Small amounts of arsenic, barium, chromium, lead, and mercury were detected.

This Phase I ESA was prepared for Exchange Street Associates LLC, which became the lease holder of the Property in September 1987, on approximately 38-acres, (slightly larger than the BCP Site), which encompassed the former Tobin plant and associated properties. [NOTE: THE BCP SITE DOES NOT INCLUDE ALL OF TOBIN’S ASSOCIATED PROPERTIES DESCRIBED HEREIN; SPECIFICALLY, THE 2.6 ACRE GRAVEL PARKING LOT DESCRIBED BELOW, AND IDENTIFIED AS TOWN OF COLONIE TAX MAP PARCEL SECTION 53.16, BLOCK 1, LOT 29, IS NOT INCLUDED].

The larger site discussed in this report housed five (5) existing structures: the main four-story masonry office building and plant; a masonry multi-stall garage; a former storage building of masonry construction, which was later used for car repair; a one-story wood structure, which was the location of former hog pens; and a masonry structure, which was the former wastewater treatment plant building. These structures were concentrated on the southeastern portion of the property.

The northern portion of the site contained ball fields, operated by the West Albany Athletic Association. A 2.6 acre gravel parking lot existed across Exchange Street and various paved parking areas existed around the buildings. A fenced-in, approximately 2.3 acre, partially paved parking area existed northwest of the main building (and was the subject of the 1987 C.T. Male Phase I). The balance of the site was largely unpaved and undeveloped. Appendix A of this Report includes a boring map that labels the structures and features of the Site.
Ownership history
This Phase I similarly mentioned Tobin’s operation of the Site as an animal slaughterhouse and meat packing plant from the late 1920's to the early 1980's and the Federal Government’s acquisition of the property after Tobin went bankrupt in the early 1980's. According to this Phase I, the Federal government sold the Site to the IDA, which leased the entire Site to McNar Industries. In 1985, Brooks Financial Corp. of New York City (“Brooks”), which took over the lease, assigned it to First Prize Industrial Park, Inc. Community Federal Savings and Loan of Bridgeport, Connecticut foreclosed on Brooks, and then acquired the lease/purchase agreement in September of 1987. On November 30, 1987, Exchange Street Associates, the current owner, purchased the lease-hold agreement and performed this Environmental Assessment (as described above, Exchange Street Associates took title to the Site in 2015).

Site Operation history
During the operation of Tobin, the main building (“Main Building”) was used as the slaughterhouse and meat packing plant, including cooler and freezer space, boiler room, laboratory, smoke rooms, warehouse space, etc.

On the southeast end of the main building is the former machine shop, hog pen area, and "cookers" room (i.e. where inedible waste was rendered). [NOTE: This building is referred to as “Outbuilding #1” in the C.T. Male 2001 Phase I summarized below.]

The garage building was used by Tobin for the storage and maintenance of their trucks, where it may have used some degreasers and lubricating oils. [NOTE: This building is referred to as “Outbuilding #3” in the C.T. Male 2001 Phase I summarized below.] Goodyear Tire and Rubber Co. leased the garage building beginning in 1985 and still occupied the building at the time of this Assessment. Rubber dust from their operation was collected in a cyclone dust collector and Goodyear allegedly had an air emission permit for this operation. Rubber dust was collected in hoppers, and was allegedly disposed of off-site by a Canadian firm. The dust was vacuumed out of the hoppers at a rate of 3 to 4 full hoppers per day. Waste oil was generated on site from Goodyear trucks, which was stored in drums inside the building, and transported off-site. Mechanical parts were cleaned in a self-contained Safety Kleen solvent sink maintained by Safety Kleen. Several other tenants began conducting auto repair operations, vehicle painting, and had offices, or stored materials in the garage in 1987.

West of the garage building was the former storage building and car repair shop used by Tobin. [NOTE: This building is referred to as “Outbuilding #2” in the C.T. Male 2001 Phase I summarized below.] At the time of this assessment, this space was used as warehouse space, office space, and a recording studio.

The former hog pens were used to house hogs before they were slaughtered. [NOTE: This building is referred to as “Outbuilding #4” in the C.T. Male 2001 Phase I summarized below.] At the time of this report, this structure was used by McNar Industries for storage of various equipment and parts. Debris accumulated outside of this building was in the process of being removed at the time of this report.

The former wastewater treatment plant building, which was constructed in the mid 1960's, contained some of the equipment that was used for treatment of Tobin's wastewater. [NOTE: This building is referred to as “Outbuilding #1” in the C.T. Male 2001 Phase I summarized below.] After Tobin’s departure, the building was used as a cement plant beginning in approximately 1986.
Two incinerators were operated on site. The primary incinerator, which is no longer present on Site, was located northwest of the main building, and used from the 1920’s (early years of operation) up to the 1960’s (exact dates unknown) to burn paper and wood refuse. As described above, complaints were received as a result of the soot created by these operations. The ash/coal was reportedly disposed of in an open field area northwest of the main building. While there are reports that the coal/ash was removed, there is no indication of how much, when, or where the disposal occurred. A smaller incinerator was reportedly located in the former wastewater treatment plant building. Its exact use was not able to be determined, but it may have been used to incinerate hog carcasses to create an organic potash.

In addition to the tenants described above, at the time of this Assessment, the property was occupied by approximately 30 tenants. Portions of the main building and other structures on site were used for office space, cold storage, commercial businesses, file and equipment storage, and truck and car repair and/or storage. The Previous Owners and Operators List at Exhibit E of this Application contains a list of the tenants collected from this report, and all reports summarized herein.

Neither NYSDEC nor the City of Albany had record of notices of violations or code violations at the facility at this time.

*Site Visit Observations*

Seventy-nine (79) photographs were taken during the Site Visit, which were chronicled in the report in Appendix B with a key describing the photographs.

The 55-gallon drums (also mentioned in the C.T. Male Phase I) observed west of the fenced in area were further described in this report. The drums lined in a horizontal position were observed to be empty but the drums in a vertical position were 50% to 100% full. The drums, which were labelled mineral spirits (4±), motor oil (14±), and Voctra oil (3±), all appeared to contain a light, clear lubricating type oil. The drums with State Chemical (2±) labels appeared to contain rain water with some oil. One 30± gallon drum was observed to contain a semi-solid grease type waste that appeared organic in nature. A second 30± gallon drum was observed to contain a black/purple liquid the consistency of oil with a strong odor. All the drums were of steel construction and rusted. According to interviews, the drums were left by Tobin. The drums did not appear to be leaking, and no stressed vegetation or staining of the soil was observed.

At least three abandoned underground fuel storage tanks were located on site that had not been properly closed in accordance with the NYSDEC Petroleum Bulk Storage Regulations at this time (specifically 6 NYCRR Part 613.9). An area of unauthorized dumping of apparent non-putrescible household waste was observed on the northwest end of the property near the former ball fields.

Numerous areas of stockpiled wood, abandoned industrial equipment, abandoned steel or cast iron piping, and other miscellaneous metal debris were also observed in the northwestern portion of the Site in the open field area west of the main building and east of the railroad tracks, around the former hog pens, and in the southern corner of the property. Abandoned cars and trucks were observed, which were owned by a current tenant and owner of the cement processing plant on site in the former wastewater treatment building. The cement operating plant was out of operation at the writing of this report for 9 months.

Drums of waste oil generated by tenants were observed to be stored indoors within their leased area. One tenant stored waste oil in drums adjacent to the fenced in electrical transformers. Signs of poor housekeeping (i.e. oil spillage) were observed in this area. Other outdoor areas of poor housekeeping were observed at the northwestern corner of the former Tobin's storage and car repair
building, the southwest corner of the former garage building where a full 55 gallon drum of waste oil and an abandoned car exist, and the northwest side of the former garage building where a 55 gallon drum of waste oil and an abandoned motor exist. Other small areas of oil stained soil were observed at various locations of the property.

An abandoned gas island with two pumps, and several underground storage tank fill ports were observed north of the former garage building. Based on the layout of the fill ports there appeared to be three underground storage tanks in the area of the gas island. Based on measurements taken, the tanks appeared to vary from five to eight feet in diameter. The two tanks nearest the former garage building had 3 1/2 to 5 inches of water with a fuel odor smell in them. The tank furthest north was observed to be dry. It was indicated that these tanks were likely last used during Tobin’s operation. The approximate location of the tanks is shown on drawing No. 88-536 in Appendix A of the report.

A 400± gallon above ground diesel fuel storage tank operated by Goodyear is located adjacent to the southeast corner of the building. No visible evidence of spillage or leakage from the tank was observed. A puddle of yellow waste paint was observed next to the trash dumpster in this area. According to a Goodyear employee, the paint had leaked from empty paint cans disposed of in the dumpster.

Four transformers were located in a fenced in area on the southwest side of the main building, whose dielectric fluid may contain PCBs in excess of 50 ppm.

Asbestos containing materials (ACM) were encountered in the main building on site. Abandoned industrial equipment and associated piping used by Tobin during their operation was present throughout the main building and on the roof. Waste laboratory chemicals, and numerous containers/drums of varying sizes of chemical products containing hazardous substances were located in the main plant building and former hog pen building.

Three 275± gallon aboveground storage tanks were present adjacent to the outside south wall of the former garage building. According to interviews, the tanks contained heating fuel oil to operate the boiler inside the garage building, and were going to be removed. No spillage or leakage from the tanks was observed. Floor trench drains in the former garage building were not observed to discharge to an oil/water separator prior to discharging to the sanitary sewer.

The site was serviced by public water and sewer. Sanitary waste from the former garage building and main plant building discharges to the sanitary sewer on Exchange Street. An abandoned above ground No. 6 heating fuel storage tank was partially located within the building and adjacent to the boiler room. Its size was unknown and C.T. Male could not determine if there was any oil left in the tank.

Sampling and Analysis
Soil samples were collected during the drilling of five soil borings which were converted to groundwater monitoring wells. The Boring Logs are located in Appendix C of the report. MW-1 was located in the northeastern Gravel Parking Lot across Exchange Street. MW-2 was located in the northeastern portion of the Site near the former incinerator. MW-3 was located in the southwestern portion of the Site near the three-story masonry structure and former wastewater treatment plant building. MW-4 was located in the Southeastern portion of the Site beside a 1 story masonry structure, formerly used for car storage and repair. MW-5 was also located in the southwestern portion of the Site beside a one-story masonry structure, formerly used for truck maintenance and storage. Appendix A in this report includes a figure depicting the well locations.
Soil samples collected from the test borings that were converted into monitoring wells MW-1, MW-2, MW-3, and MW-4 showed no response on the HNU meter. Coal fill material was encountered in boring/well MW-2. MW-5 showed readings on the HNU meter of 3.5 to 7 ppm total volatile compounds at each sample depths from 0.5 feet to 11.5 feet bgs. MW-5 is downgradient of the abandoned underground storage tanks, and in the vicinity of the former truck maintenance building and railroad spur.

Lead was present in groundwater at concentrations above the NYSDEC groundwater standard at 6 NYCRR Part 703. The standard is 0.025 mg/l. The exceedances were present in MW-1 (0.05 mg/l), MW-2 (0.04 mg/l), MW-3 (0.10 mg/l), MW-4 (0.15 mg/l), and MW-5 (0.11 mg/l).

Arsenic was detected at 0.025 mg/l in well MW-4, which is the NYSDEC 6 NYCRR Part 703 groundwater standard for arsenic.

Appendix D of the report includes summary tables of these results, and Appendix E includes the Laboratory Results. [NOTE: The groundwater standards for lead and arsenic are the same today as at the time of this Report.]

This Asbestos Containing Materials Survey Report was prepared for Exchange Street Associates, P.C. by C.T. Male in December 1988. The ACM survey was conducted on the five (5) existing structures on Site.

Site Inspection
Suspect and known ACM was encountered throughout the main plant building; on the outside of the main plant building; and in the former wastewater treatment plant building in the form of thermal systems insulation, floor tile, and/or transite board.

The asbestos containing thermal systems insulation encountered and identified included corrugated air cell insulation with a paper wrap, block type insulation with a canvas wrap or aluminum jacket, and brown fibrous paper like insulation with a canvas wrap on heating piping, hot and cold water piping and sanitary sewer piping at a minimum; hard concrete like asbestos cement insulation on piping elbows, joints and valves: cementitious asbestos insulation around an abandoned aboveground No. 6 fuel oil storage tank: hard concrete like insulation on the eastern most boiler and tank above it, on the tank above the western most boiler, and on two other tanks in the northeast corner of the boiler room; and as block type insulation on the boiler breaching.

Sampling and Laboratory Analysis
In general, laboratory analysis identified chrysotile asbestos in the samples of: floor tile; hard concrete-like insulation on piping elbows; insulation on the abandoned No. 6 fuel oil tank; fibrous block type of insulation, and fibrous paper like insulation on piping. The sampling locations and a summary of the laboratory analysis results are presented in Table 3.0-1 of the Report, and the analysis is enclosed in Appendix C of the Report.

Quantity of Asbestos Containing Material
In general, the total estimated linear feet of piping with ACM in the main building was 9375.5± feet, outside the main building was 1550± feet, and in the former wastewater treatment plant building was 230± feet. Estimated quantities of remaining asbestos containing material included: asbestos transite board at 4713± square feet; asbestos floor tile at 14.244± square feet; and
miscellaneous ACM at 710.8± cubic feet. Table 4.0 of the Report includes the quantity and type of ACM present per location at the Site.

*Condition of Asbestos Containing Material*

ACM was present in the majority of the thermal systems, and was damaged or exposed to some degree either from age, contact, nicks, dents, moisture, water, dripping fluids, repairs or penetrations. Even the insulation in good condition was exposed at the ends of sections of insulation and where it passed through walls. The majority of the piping insulated with the asbestos containing insulation was no longer in use. The boilers, tanks, and boiler breaching with asbestos insulation in the boiler rooms (Rm 105 and 106) were also not in use.

This Phase I ESA was prepared for Realty Assets, Inc., property managers for Exchange Street Associates LLC on July 30, 1990. This update was intended to describe any new environmental concerns noted at the Site since the 1988 ESA Report. This Report also noted if any recommendations had been implemented or actions had been taken to improve the site conditions since the original report was submitted, or if the environmental condition remained. [NOTE: This narrative only summarizes new information in this 1990 report as compared to the 1988 report. Therefore, if no update is given, the condition described above continued to persist at the time of this Report.]

The only major change from the original Report to the structures on the Site was that the Hogpen Building was demolished, excluding the foundation. There were several changes in tenants, as described on Table 1 in the Report. A full list of tenants is enclosed in the Previous Owners and Operators list in Exhibit E of this Application.

The area occupied by the Site was believed to be located partially over an unconsolidated aquifer according to the mapping of aquifers in the area by E. Bugliose, R. Trudell, and G. Casey, "Potential Yields of Wells in Unconsolidated Aquifers in Upstate New York - Hudson Mohawk Sheet." This aquifer was reported to yield 10 to 100 gallons per minute, but was not used for City drinking water.

*Site Visit*

Photographs taken during the site visit are enclosed in Appendix A. A new tenant, Midstate Industries, Ltd, began performing fiberglass casting manufacturing. The operation included the use of fiberglass resin and volatile organic solvents (acetone). Three empty drums were observed on the roof outside this business; one of acetone and two of fiberglass resin. No spillage to the roof in the area of the drums was evident.

Chemicals present in former laboratory room (Room 404) were removed, and records began to be stored in that space. No chemical or petroleum storage was observed on the first floor of the main building. The incinerator previously located in the Former Cement Plant and Wastewater Treatment Building was removed. At the time of this Report, a new company used the space for ice-cream storage, and truck storage outside of the building. Fill piles of apparent oily contaminated soil were present near (northwest of) this building. The baseball fields previously north of the main site building in an area secured with a chain link fence were moved to an adjacent parcel immediately north of the vacant fields. Therefore, at the time of this report, this area was currently vacant.

To the west of the Main Building, and east of the railroad tracks, on the subject Site were several areas of different types of waste accumulation. Piles of construction and demolition debris, waste metal, and wood are present throughout this area. Several empty drums and abandoned above
ground storage tanks, and an old heating pipe with suspect asbestos containing insulation on it, were also observed deposited among this fill. In general, locations of minor oily soil staining were noted throughout this area.

An additional 1,000 gallon underground storage tank was identified at the subject site along the east side of the Main Building, south of the loading docks, and immediately east of the boiler room. The tank was not in use and was reportedly not used for years. The age of the tank was not known; nor was it known if anything remained in the tank since no fill ports were visible/accessible for inspection.

Domermuth Environmental Services, Inc. was retained by Realty Assets, Inc. to remove some oil filled drums from the subject site and properly dispose of the waste. Drums from the Hogpen Building, from the Kendall Truck Repair waste oil storage area, and from the area west of the camper storage lot (previously identified on Page 4 of the Phase 1998 Phase I report, Comment No. 7 and Page 5 Comment No. 11) were reportedly moved to the concrete pad on the west side of the property, where the incinerator was formerly located. Approximately 1,100 gallons worth of waste oil was disposed of from the Site or placed on the west side of the Site to be removed in the future (approximately 10 drums).

In the interim, some of the drums were dumped over by vandals and their contents released to the adjacent soil. This approximately 400 gallon spill was reported to the NYSDEC on December 4, 1989, which was assigned Spill Number 8908716. The Spill was closed on January 29, 1990. The soil from the spill area was allegedly excavated and placed on and covered with polyethylene in the vicinity of the excavation. Two soil piles were observed during the site visit. However, both piles were uncovered, half of the concrete pad was oil soaked, and oily runoff was allegedly entering the soil on the east end of the pad at the time of this report. Additionally, several of the ten 55-gallon steel drums had no bung covers and appeared to have leaked some quantity of oily waste to the ground surface.

The three 275 gallon tanks and one 550 gallon tank along the south side of the Goodyear Building, previously described in the original report, were observed to not have secondary containment, and were not registered with NYSDEC. Some oil staining of the soils was observed between the 550 gallon tank and two of the 275 gallon tanks. Fourteen new drums used by John’s Truck Repair were against the building. Some of these drums appeared to be empty, some were partially filled, and some were being used to store waste liquids. Oil staining was apparent adjacent to some of the drums.

Two open top metal pipes, protruding from the ground that used to support a sign, were south of the Goodyear Building. The open pipes were a potential pathway for liquid waste disposal to subsurface soils. Additionally, to the east of the Goodyear Building were two skid mounted 1,000 gallon petroleum storage tanks. One was in use. Neither had secondary containment, and the site contact at the time was unsure if the tanks were registered with NYSDEC.

Extensive filling was being performed along the west side and southwest corner of the site. Fill piles along the west side had metal and wood wastes mixed into the concrete and soil (clean fill materials). Filling has also occurred in the southwest corner of the property. During the site visit the surface of this fill material appeared to be "clean fill."

During this update, C.T. Male discovered that the samples taken for the four transformers in the fenced in area on the southwest side of the main building were never processed by General Electric to confirm PCB concentrations.
ACM abatement occurred on April 3, 1990 by Midstate Industries, Ltd. 47% of the asbestos containing insulation on piping and fittings (excluding that present in the Boiler Room) and approximately 20% (excluding the Boiler Room) of other thermal systems insulation was removed. This report did not explain why these areas of ACM were removed and not others, however this report did state that the remainder of the recommendations in the 1988 C.T. Male’s Survey Report were still valid for the ACM remaining at the Site.

E. 1990 Subsurface Investigation of Spills Areas and Soil Removal Report by C.T. Male

This Subsurface Investigation of Spills Areas and Soil Removal Report was prepared on October 5, 1990 by C.T. Male for Realty Assets, Inc., property manager for Exchange Street Associates LLC. The subsurface investigation of soils in the area of the former incinerator was completed on August 23, 1990 in response to Spill No. 8908716 described above. After this original spill, the drums were moved to an area northwest of the concrete pad, adjacent to the staged soil pile. The drums were again tipped over by vandals and it appeared that some oily liquids were released. [NOTE: This second spill was reported to NYSDEC in the work plan letter dated August 17, 1990 and appears to have been considered part of Spill 8908716.] The investigation was completed in accordance with the NYSDEC approved work plan prepared by C. T. Male Associates dated August 17, 1990 (Appendix A). A diagram of this area was included as Figure 1 of Appendix B of this Report.

In general, the sidewalls of the existing excavation from the initial spill area and visually contaminated soil adjacent to the south and southwest corner of the foundation for the former incinerator were excavated and staged on polyethylene adjacent to the existing stockpiled soil. Visually contaminated soil from the new spill area was also excavated and staged on polyethylene in a separate pile. Upon completion of the investigations the piles of soil were covered with polyethylene.

Original Drum Spill Area
Soil samples were collected along the walls of the existing excavation, south of the concrete incinerator pad. Soil sample locations and identifications are noted on Figure 1 in Appendix B. Table 1 on page 7 lists the soil sample head space analysis results for this investigation. The soil pile of material excavated from the original drum spill area encompassed an area 45± feet by 12± feet and 5± feet high at the center.

Headspace analysis results showed a reading of 60± ppm for the sidewall soil sample collected along the south end of the pit (area of sample W-1). Additional soil was excavated 2 - 3 feet back along this pit and was removed and staged. New samples were then collected from the wall, (samples W-12 and W-13) and readings of 5.4 and 3.4 ppm where obtained. Readings between 7± ppm to 30± ppm (one reading of 44 ppm) were obtained in samples taken from the western and eastern perimeter of the initial spill area excavation.

Visual oil contamination was not observed except in the area adjacent to the south and southwest edges of the concrete pad. The presence of ash and cinders from the former incinerator gave the soil a discolored appearance, but no petroleum/oil odor was encountered except at the referenced edges of the concrete pad. Since the sidewalls of the excavation did not appear to be contaminated, even though average readings of 25 ppm were obtained on a PID meter, it was decided to scrape the sidewalls of the excavation and not remove any additional soil horizontally pending laboratory analyses results of the excavated soil. Sidewalls of the pit were excavated on the north side the concrete slab and partially around the western edge of the pad, to ensure that oily contamination
had not entered the soils beneath the slab. A slight oil odor and a minor visual sheen was noted in the soils adjacent to the slab. A reading of 16± ppm volatile compounds was detected with the Microtip by headspace analysis screening at the latter location. Some visual oil contaminated soil appeared to still be present under the south/southwest corner of the pad but was not able to be removed without first removing the concrete pad. It was decided not to remove the concrete pad unless laboratory analyses results indicated that it would be necessary.

A control soil sample (W-11/CS-l) was taken approximately 25-30 feet west of the original drum spill area and screened by head space analysis. A reading of 7± ppm total volatile compounds was obtained. It was determined that the ash and cinders fill in this area might be a source of the volatile compounds detected in the field control sample.

Along the north end of the concrete pad, in an area where some oil staining was noted on the pad, a small observation pit was excavated down approximately 2 feet below grade, along the edge of the pad. Soil samples were collected from the sidewall of the pit and headspace analysis was performed on each (W-14 and W-15 in Table 1). No evidence of contamination (2.2 and 3.2 ppm) was noted on the field instrument and no visual contamination was observed in the pit. Materials from this pit were staged with the soils from the excavation south of the pad.

New Drum Spill Area
Soils in this area were excavated during the investigations to a depth of approximately 2 feet below grade where clay was encountered. The soil excavated from the new drum spill area encompassed an area 15± feet by 15± feet and 5± feet high in the center. A total of 10 soil samples were collected from the sidewalls of the excavation, and headspace analysis was performed. Results of the headspace analysis (1± to 3± ppm) as shown on Table 1 of this Report, indicated no obvious evidence of volatile compound contamination. No visual oily contamination was noted within the excavation. Soil samples were also collected from the bottom of the excavation and submitted for laboratory analyses. Laboratory analysis of these soils is described in section 3.0. Figure 1 in Appendix B of this Report shows the area of investigation and the sampling locations.

Laboratory Analysis Results
The composite soil sample (i.e., P-9, P-10, P-11, and P-12) taken from the new drum spill area soil pile showed trace concentrations of methylene chloride, barium, and chromium. The methylene chloride was reported at a concentration of 40 ug/l. The concentrations of chromium (0.02 mg/l) and barium (0.49 mg/l) in this sample were detected at levels which were below the applicable NYSDEC groundwater standards, the NYSDOH drinking water standards, and the TCLP maximum contaminant level (indicating the soil was not hazardous).

As described above, this Spill No. 8908716 was closed on January 29, 1990.

This report on closure of petroleum storage tanks was prepared by C.T. Male for Realty Assets, Inc., the property manager for Exchange Street Associates LLC. It describes the work procedures performed to close the eight petroleum storage tanks (7 underground and 1 above ground). The closure work was performed between August 20, 1991 and September 9, 1991. The piping from the tanks to the pump island were also visible. The contents of the tanks were removed by a vacuum truck. The liquid fuel wastes removed from the tanks and cleaning wastes, approximately 1,696 gallons total, were transported for disposal on August 27, 1991 by Clean Harbors of Kingston, Inc.
G. 2001 Phase I ESA Report, by C.T. Male

This Phase I ESA was prepared for Everett Storage and Handling on December 21, 2001 to provide a liability defense as an innocent tenant. The portion of the lands of the First Prize Center investigated as part of this assessment included approximately 15.25 acres on the eastern, southeastern, south and southwestern portions of the lands of the Site. [NOTE: Only new information not previously provided in prior Phase I reports will be summarized herein.]

Operation of the Tobin Plant, Site Buildings, and Structures
Areas within the southern portion of the Main Building were closed as "unusable areas" as required by the Albany County Office of Code Enforcement, and were segregated from the remainder of the building by firewalls. Subsequent tenants of the building included an indoor paint ball facility, a chemical supply company, meat and dairy distributors and storage. At the time of this report, the building was used for a combination of office space, dry storage, cold storage, freezer space, an artist studio, and classrooms.

Outbuilding #1 (former machine shop, hog pen area and "cookers" room) was being used as a vehicle storage, repair and sales garage by Ashley Auto Sales, Inc., as an art gallery and specialty framing shop by Art Associates, and as a vehicle service shop by Kendall Trucking.

Outbuilding #2 (the Tobin garage building previously leased to Goodyear Tire and several vehicle service and repair shops) was closed as "unusable areas", and segregated from the remainder of the building by firewalls.

Outbuilding #3 (Tobin storage building and car repair shop) now included tenants called Armor Elevator, Sound Barriers, and several health care facilities.

Outbuilding #4 (former hog pens) was demolished in the late 1980's or early 1990's as described above.

Outbuilding #5 (former wastewater treatment plant building) was being used as a cement plant and a storage operation for an ice cream company.

Radon
The Site lies in Zone 1, which is defined as having an average predicted indoor radon screening potential greater than 4 pCi/L. The EPA Map of Radon Zones is included as Figure 6 in Appendix A.

ASTM Federal and State Database Review
The Site was identified twice on the RCRA generator list. The first listing is on the RCRA NLR (No Longer Regulated) list, under the name First Prize Center. In addition, a former tenant, Fiberglass Products, Inc., was listed as a small generator generating less than 100 kg/month of hazardous waste.

Three additional spills were filed on the Site since Spill No. 8908716 (described above): Spill No. 9214479 was reported in September 1992 as a result of a worker overcome by vapor. It was determined that a forklift in the closed room caused the vapor, and the spill was closed on March 31, 1993. Spill No. 9210607 was reported on December 14, 1992 based on the observance of an oily substance found while excavating a gas main valve on Exchange Street near the Site. No action was recommended unless the situation changed. The spill was subsequently closed on December 16, 1992. Spill No. 9506248 was reported as a result of several 55 gallon drums leaking in a parking
lot. It was determined that the product was probably waste oil from a truck repair shop in the building. This spill was closed on September 8, 1995.

**Transformers**
Transformers, some of which were not previously identified in the prior Phase I reports, were observed in several areas throughout the Site, including six pole-mounted transformers, three wall-mounted transformers, four pad mounted transformers (identified in the C.T. Male 1988 Phase I Report as PCB-containing transformers), four floor-mounted transformers, and six suspended from elevator frame. It was not known if the transformers, other than the four pad mounted transformers, contained PCBs.

**Asbestos**
No ACM surveys or asbestos abatement activities occurred at the facility since the 1990 C.T. Male Report described above.

**Site Drainage Issues**
A slop sink within Outbuilding #5 was discharging to a trench-type floor drain within the building, which was subsequently pumped to a catch basin outside the building. The slop sink appeared to have residual paint staining from products used in the Mapco Enterprises shop, and cloudy-to-milky colored liquid was observed within the trench drain at the time of the site visits. The former anhydrous ammonia refrigeration system was reportedly decommissioned by draining the ammonia in the late 1980's or early 1990's. However, no documentation was found concerning this activity.

**Lead Paint**
Peeling paint was observed throughout various portions of the Site buildings at the time of the site visits. Based on the age of the Site buildings, it was noted that the paint present within the buildings may contain lead. However, testing for lead based paint was not performed.

**Underground and/or Above Ground Storage Tanks**
Seven underground storage tanks previously identified at the Site were closed in-place (see 1991 Closure Report described above), and no evidence of new tanks (i.e., vent and fill pipes) were observed; however, portions of the piping associated with the seven closed tanks remained in the ground. A 20,000 gallon above ground tank used to store No. 6 fuel oil was removed from the site in 1991.

The report noted that none of the facilities located at the subject site have tanks registered with the NYSDEC. Nevertheless, a total of sixteen (16) above ground storage tanks were present at the facility at the time of the report. Two of these tanks were apparently abandoned, and a third tank used for fuel oil was reportedly going to be removed in early 2002. The remaining tanks were used to store motor oil, heating oil, antifreeze, and used oil.

### Storage of Materials

Storage of five 55-gallon drums of unidentified materials, and a flammable material storage cabinet containing approximately 30 gallons of abandoned chemical products, was observed at the facility at the time of the site visits. Storage of approximately forty 55-gallon drums of used oil, two 55-gallon drums of used antifreeze, two 55± gallon drums of waste adhesives, three 5-gallon used oil containers, twenty-five 55-gallon drums (which were utilized for used oil collection and were empty or had minimal residual product present at the time of the visits), one 55-gallon drum of used oil filters, and a used oil filter collection container was observed at the facility in tenant areas at the time of the site visits. Storage of several hundred drums and containers of General Electric Silicones products; drums of motor oils, hydraulic oil, latex-based adhesive products, and antifreeze; and containers of various lubricants, cleaners, chemicals, oils, degreasers, gasoline and fuel conditioners were observed at the facility at the time of the site visits.

### Observed Evidence of Potential or Known Site Contamination

Several instances of staining with the appearance of oil or petroleum products were observed at the Site during the visits. These areas included the loading dock on the southwest side of the Main Building, on the floor within Area 103 of Outbuilding #1, on the floor surrounding a drum in Area 104 of Outbuilding #1, on the floor surrounding the above ground storage tanks at Area 101 of Outbuilding #2B, on the floor in the service area and surrounding drums and an above ground storage tank at Area 102/103 of Outbuilding #2B, on the floor within the All Star Driving School garage in Area 103 of Outbuilding #2B, on the floor within Area 106 of Outbuilding #2A, on the floor within Area 108 of Outbuilding #2A, on the floor surrounding an above ground used oil storage tank within Area 109 of Outbuilding #2A, and in the parking lot area to the northeast of Building #2A. The staining in those areas appeared to have occurred exclusively on concrete and asphalt surfaces, suggesting that soil or groundwater at the Site would not have been impacted.

Additional staining with the appearance of oil or petroleum products was observed at the Site during the visits on the floor within Area 101 of Outbuilding #1 and on the ground surface to the south of Area 101 of Outbuilding #1. Poor housekeeping appeared to be contributing to the staining observed in these areas. As the area along the south side of Outbuilding #1 was not entirely paved, impacts to subject site soils and/or groundwater may have occurred as a result of the poor housekeeping.

Discolored (i.e., an orange-brown colored) soil was observed on the southeast side of Area 101 of

Outbuilding #2B, and "Black Beauty" blasting agent used by Mapco Enterprises was observed to be present in a widespread area on the southwest side of Outbuilding #5.

Debris Material
An area of apparent construction and demolition debris material, tires, wood, and household-type waste was observed on the southwestern portion of the site, northwest of Outbuilding #3. A collection of old equipment, rubbish, used storage containers, automotive batteries, and automotive parts were observed in the area immediately south of the Kendall Trucking garage (Area 101 of Outbuilding #1).

H. 2001 GZA GeoEnvironmental, Inc. ("GZA") Analytical Report, Boring Log, Bore Hole and Test Pit Locations and Field Logs, and Laboratory Report

In 2000, GZA prepared a “Proposed Exploration Location Plan”, which summarized the location of former groundwater monitoring wells installed by others, and proposed GZA borings with monitoring wells, geotechnical borings, shallow soil borings, geotechnical test pits, and test pits, for an owner that was interested in siting a Home Depot at the Site. In addition to this plan, a 2001 GZA Analytical Report, Boring Log, Bore Hole and Test Pit Locations and Field Logs, and Laboratory Report was prepared; however, no formal investigation report was ever produced summarizing the results of this investigation. The Spider Maps submitted with this BCP Application at Exhibit F summarizes the results from this 2001 GZA investigation against current NYSDEC standards, and were input directly onto the GZA Proposed Exploration Location Plan. See 2004 C.T. Male Phase I Report, which provides a summary of the data from this report, and the Environmental Assessment in Section IV(10)(F) of this Support Narrative.

A. 2004 Phase I ESA Report, by C.T. Male

This Phase I was prepared by C.T. Male on behalf of a prospective purchaser, WideWaters Everett Road Co., LLC, in relation to the property that encompasses the BCP Site (Tax Parcels 1-3), and one additional parcel (Town of Colonie Section 53.16, Block 1, Lot 29), which is not included in the BCP Site. [NOTE: Only new information, not previously provided in the aforementioned Phase Is are summarized below].

Site Buildings and Structures
The formerly “unused” areas within the southern portion of the building were rehabilitated for use by the time of this report. This work was performed in accordance with approved plans and specifications filed with Albany County Office of Code Enforcement (Building Permit 174 issued August 31, 2000), and a Certificate of Compliance was received from the Albany County Office of Code Enforcement on December 21, 2000 (included within Appendix C of the Report).

Site and Surrounding Area Historic and Records Review
At the time of this report, Albany IDA continued to own the Property, and Exchange Street Associates continued to have a lease-purchase agreement. A list of the tenants in the building at the time of this report are listed in the Previous Owners and Operators List at Exhibit E. This Phase I reviewed tax assessment records and determined that the specific agency of the Federal Government that took control of the Site from Tobin in 1983 was the Economic Development Administration of the Department of Commerce. Additionally, this Phase I reviewed a title search report, which indicated that Tobin purchased the property from Consolidated Rendering Company on October 30, 1953.
**GZA 2001 Results**

The Phase I summarized the GZA 2001 results in detail. According to the Draft Proposed Exploration Location Plan dated November 29, 2000, and enclosed in this Phase I as Figure 21 in Appendix A, and based on the GZA 2001 boring logs available, it was inferred that thirteen test pits were advanced by Precision Industrial Maintenance under the observation of GZA for environmental purposes; thirty-seven test borings were advanced by SJB Services and twenty-five test pits were also completed under the observation of Gifford Engineering for geotechnical purposes; and thirty-eight soil borings (thirteen of which were converted to groundwater monitoring wells) were advanced by GZA.

This Report’s summary of exceedances is not repeated herein since the NYSDEC standards and guidance have changed since the writing of the Report. Instead, the Spider Maps submitted with this BCP Application at Exhibit F shows the locations for the exceedances by contaminant from this investigation against current standards, and the Environmental Assessment in Section IV(10)(F) provides a narrative of the results according to current standards.

**Additional Findings**

A total of sixteen above ground storage tanks were present at the facility at the time of this Report, with four of those tanks apparently abandoned. Those tanks were used to store motor oil, heating oil, diesel fuel, and used oil. None of these tanks were registered with the NYSDEC, according to the reviewed databases at the time.

A sink within Outbuilding #5 was still discharging to a trench-type floor drain within the building, which was subsequently pumped to a catch basin outside the building. Peeling paint was still observed throughout various portions of the Site buildings at the time of the site visits. Based on the age of the Site buildings, paint present within the buildings may contain lead. Fluorescent light fixtures were observed throughout the Site buildings. The report noted that fluorescent light ballasts have the potential to contain PCB’s, and fluorescent lamps have the potential to be regulated as a hazardous waste. An updated asbestos survey was not conducted as a function of this assessment. While the former anhydrous ammonia refrigeration system was reportedly decommissioned by draining the ammonia in the late 1980's or early 1990's, not documentation was found for this activity.

The Site was still identified as a RCRA small quantity generator of hazardous waste for tenant Everett Road Storage & Handling (FRS ID: 110009480132; SQG (NYD986945228), and a RCRA "No Longer Regulated" facility for First Prize Center. One additional oil spill was reported on the Site - NYSDEC Spill No.0310007 – which occurred on November 25, 2003 and reportedly involved oil deposits on the asphalt/soil surfaces and in select catch basins on the eastern portion of the property, west of Outbuilding #2A. The cause of the spill was reported as potentially from overflowing catch basins adjacent to the Site. Therefore, there were five reported DEC spills that had occurred in relation to the Site as of the writing of this Report, all of which had been closed.

Storage of drums and containers of unidentified materials, and several flammable material storage cabinets containing reportedly abandoned chemical products were observed at the facility at the time of this Phase I inspection.

Storage of up to 55-gallon drums and containers of used oil, used antifreeze, waste adhesives, and used oil filters were observed at the facility in tenant areas at the time of the site visits.

Storage of several hundred drums and containers of General Electric Silicones products; drums of motor oils, hydraulic oil, latex-based adhesive products, transmission fluid, and antifreeze; and
containers of various lubricants, cleaners, chemicals, oils, degreasers, and fuel conditioners were still observed at the facility at this time.

Several instances of staining with the appearance of oil or petroleum products were observed at the site during the visits. These areas include concrete flooring at the Kendall Trucking garage in Area 101 of Outbuilding #1, Ashley Auto Sales garage in Area 104 of Outbuilding #1, staining on the surface of the motor oil and used oil above ground storage tanks, and on the concrete flooring throughout the Anastasi Construction and CMC Trucking garages in Area 101 of Outbuilding #2B, within the trench-type floor drain at the Empire State Landscaping garage in Area 101 of Outbuilding #2B, on the concrete flooring in the garage and within the trench-type floor drain at the Albany Light Truck & Car Repair garage in Area 102/103 of Outbuilding #2B, on the concrete flooring within Area 103 of Outbuilding #2B, on the concrete flooring within the Lily Transportation garage within Area 106 of Outbuilding #2A, and on the concrete flooring at the AFS Limousine Service garage in Area 108 of Outbuilding #2A. Sorbent materials were observed to be present covering the spills in some of the locations within these areas.

Additional areas of soil contamination and/or liquid discharges included the asphalt and gravel surface on the south side of the garage area occupied by Kendall Trucking (Area 101 of Outbuilding #1), asphalt and gravel surfaces in areas on the northeast and west sides of Outbuilding #3 (in the vicinity of vehicle and equipment storage areas), soil surrounding the 275 gallon diesel fuel storage tank located on the west side of Outbuilding #5, and widespread deposition of "Black Beauty" blasting agent used by Mapco Enterprises [into the soil surrounding Outbuilding #5.]

Several areas of apparent construction and demolition debris material, tires, wood, and household-type waste were observed on the western, southwestern and southern portions of the site. A collection of old equipment, rubbish, used storage containers, automotive batteries, and automotive parts were observed in the area immediately south of the Kendall Trucking garage (Area 101 of Outbuilding #1).

2. **Sampling Data**

   *See Exhibit F, Spider Maps containing Sampling Data Summaries from the GZA 2001 Investigation, and Section IV.10.F. Additionally, the electronic CD includes all environmental reports described above, and associated laboratory reports are contained therein. No soil vapor data has been obtained on this Site. The most recent Environmental Report on this Site was prepared in 2004 prior to the New York State Department of Health’s issuance of its first Guidance for Evaluating Soil Vapor Intrusion in October 2006.*

3. **Site Drawing**

   *See Exhibit F, Spider Maps containing Sampling Data Summaries from the GZA 2001 Investigation with boundaries with the tax parcel boundaries for Parcels 1, 2, and 3.*

4. **Past Land Uses**

   *See Section IV.10.D for full description of past land uses.*
SECTION IV – PROPERTY INFORMATION

1. Site Address, Size, Site Boundary and Tax Parcel Information

The 32.09-acre Site is made up of three Parcels. The tax parcel addresses and tax parcel information are described on the following chart.

<table>
<thead>
<tr>
<th>Parcel No.</th>
<th>Parcel Address</th>
<th>Section No.</th>
<th>Block No.</th>
<th>Lot No.</th>
<th>Sq. Ft. (according to Survey (See Exhibit G))</th>

</tbody>
</table>

The Site boundaries do correspond to the exterior tax map boundaries of Tax Parcels 1 and 2. See Exhibit G, Survey; and Albany County GIS Tax Map, Exhibit H. Tax Parcel 3 is an interior parcel located between Tax Parcels 1 and 2; and therefore, the boundaries of this tax parcel are interior to the exterior boundaries of the BCP Site. Note: the Albany County GIS Tax Map website lists different acreage for Parcels 1, 2, and 3 than the acreage calculated by the Surveyor, and shown above and on the Survey. Specifically, the Albany County GIS Tax Map website provides the following: Parcel 1: 15.5 acres; Parcel 2: 15.4 acres; and Parcel 3: 2.4 acres.

2. Property Map

The Site Location and Base Property Map are in Exhibit I.

3. En-Zone

Although a portion of the City of Albany Tax Parcel 2 and all of Parcel 3 are in the En-Zone Type B, Census Track 3, Albany County, the acreage associated with this portion of the BCP Site appears to be less than 50% of the BCP Site. See Exhibit I, En-Zone Map.

[Please refer to Questions 4-9 on the BCP Application Form]

10. Property Description Narrative

A. Site Location

See Response to Section IV.1 and IV.2 above. The Site is located in an urban setting characterized by adjacent industrial, commercial, and residential development. The area occupied by the lands of the First Prize Center totals approximately 32.09 acres. The Site is located on the southwest side of the intersection of Exchange Street and Everett Road and on the west side of Exchange Street in the City of Albany and Town of Colonie, Albany County, New York. Exchange Street forms the northern/ northeastern/ eastern subject site property boundary. The Patroon Creek is located approximately 400 feet southwest of the BCP Site, between the adjoining, out of use railroad tracks
to the southwest of the Site, and Interstate Route 90. The Patroon Creek flows southeast, south of the site and the railroad tracks. No water supply wells are known to exist in the vicinity of the BCP Site, as public water supplies are supplied to the City of Albany and Town of Colonie.

B. Site Features

The Site features include five building structures, parking areas (some paved, some gravel), and grassy/wooded areas. The Main Building is on the north/northeast portion of the Site. It is a two to four story masonry building. Outbuilding 1 is a one to two story masonry building on the southeast end of the Main Building and connected by a second story bridge to the southeast end of the Main Building. Outbuilding 2 is located to the southeast of Outbuilding 1, near the northeastern corner of the BCP Site, and was constructed in 1938. Outbuilding 3 is a one story masonry building located to the southwest of Outbuilding #2, in the southern corner of the Site. Outbuilding 4 currently exists as a concrete slab located northwest of Outbuilding 3, along the southwest portion of the Site. The building was demolished in the late 1980's or early 1990's as described above. Outbuilding 5 is located to the southwest of the Main Building, and is a one to two story masonry building. The northern portion of the Site previously contained ball fields, but the area is now vacant.

Various paved parking areas exist around the buildings. The Site has paved driveways from Exchange Street on the northeast and eastern sides of the Main Building. The south/ southeast portion of the Site has asphalt paved parking areas and driveways, and access roads surrounding the site buildings. Areas immediately south, west and northwest of the Main Building are also paved. A fenced-in approximately 2.3 acre partially paved parking area exists northwest of the main building (and was the subject of the 1987 C.T. Male Phase I ESA). The southwest portion of the Site is not paved, and consists of grassy to partially wooded land along the adjacent railroad tracks. A gravel driveway connects Outbuilding #5 to the remainder of the developed portions of the Site.

C. Current Zoning and Land Use

The Site is within the First Prize Center Redevelopment Overlay District (“First Prize District”), an Intermunicipal Overlay District between the Town of Colonie and the City of Albany. See Exhibit J, Chapter 191 of the Town of Colonie Code, created by Local Law No.3 of 2017, and Chapter 375-2(F)(7) of the City of Albany Code, created by Ordinance Number 27.31.17. See further details in Section X(1). The Site is currently used for a variety of commercial purposes, including offices, storage, vehicle storage and repair, and light industrial. The nearest residential area is across the street from the Site on Exchange Street, and down Russel Road. The title report provided in the 2004 C.T. Male Phase I ESA in Appendix C identified nine easements pertaining to the site, including ingress/ egress, temporary easements and utility easements.

D. Past Use of the Site

Prior to the development of the Site that began in 1924, the property was vacant land. Beginning in 1924 until the 1980s, the Site was used as a slaughterhouse and meat packing plant. Early historic uses may have included the manufacturing of fertilizers on the Site. Frederick M. Tobin purchased a controlling interest in Rochester Packing Co. in the 1920s, the predecessor to Tobin Packing Co., Inc., and construction began by 1924.1 According to a title report conducted in 2004, and described in the 2004 C.T. Male Phase I ESA, Consolidated Rendering Company owned the Site until October 30, 1953, when it sold the Property to Tobin. The title report did not indicate when this

company purchased the property. Consolidated Rendering Company manufactured fertilizers and glue; and operated rendering, wool pulling and scouring operations; and sold animal hides. Pesticides were identified exceeding SCOs on the Site, see Exhibit F Spider Maps, and Consolidated Rendering Company’s operations may have been the source.

Tobin’s animal slaughterhouse and meat packaging plant included cooler and freezer space, a boiler room, a laboratory, smoke rooms, warehouse space, offices, etc. On the southeast end of the main building is the former machine shop, hog pen area, and "cookers" room (i.e. were inedible waste was rendered). The garage building was used by Tobin for the storage and maintenance of their trucks. VOCs were identified on the Site exceeding SCOs and groundwater standards, see Exhibit F Spider Maps, and Tobin’s garage building operations, in addition to the numerous vehicle repair operations in this building following Tobin’s bankruptcy between the mid-1980s and the present, may have been the source.

Additionally, Tobin had two incinerators. The incinerator was located west of the main Tobin Plant and was used in the early years and up to the 1960s (exact dates unknown) to burn paper and wood refuse. The facility received complaints for the soot created in the area. Additionally, the ash/coal was reportedly disposed of in an open field area northwest of the main building. Selenium was identified on the Site exceeding groundwater standards. The Selenium exceedances were likely a result of the particulate deposits and/or ash/coal dumping from the incinerator.

After Tobin, the Site was renamed the First Prize Center, and has been used for a variety of commercial and industrial uses to the present date, including dry/cold/freezer storage, painting companies, laminating companies, vehicle storage, offices, a cement plant, vehicle repair, health care facilities, art studio, etc. See Exhibit E Previous Owners and Operators List.

E. Site Geology and Hydrogeology

The Site is generally level, with a slight slope present along the southwest portion of the Site down to the adjoining unused railroad tracks. Unpaved areas on the southwestern and western portion of the Site have reportedly been filled to make nearly level topography across the site, according to the site contact. According to the United States Geological Survey Topographic Map, the Site lies at approximately 200 to 205 feet above Mean Sea Level. Soils are mapped by the Albany County Soil Survey as urban land; nearly level to strongly sloping areas where asphalt, concrete, buildings or other impervious materials cover more than 85 percent of the surface. Surficial geology is mapped as dunes. Dunes are fine to medium sands which are permeable and range in thickness from 1 to 10 meters. Bedrock is mapped as Normanskill Shale.

Groundwater flows in an easterly-southeasterly direction, and has been identified in at least one report to be at about 6-8 feet bgs. The Patroon Creek is located approximately 400 feet southwest of the Site, between the adjoining railroad tracks to the southwest of the property and Interstate Route 90. No water supply wells are known to exist in the vicinity of the Site, as public water supplies are provided to the City of Albany and Town of Colonie. No State or Federal designated wetlands are present on the Site or on adjacent parcels according to available State wetlands mapping. [Note: The survey identified a small area with wetlands markers on the Site. See Exhibit G. The Site is not within a flood zone. See Exhibit K, Flood Map.]
F.  Environmental Assessment

Based on the investigations conducted to date, the primary contaminants of concern are VOCs, SVOCs, Metals, and Pesticides in soil, and VOCS, SVOCs, and Metals in groundwater, as further described below and on the Spider Maps attached as Exhibit F.

**Soil:**

**VOCs:** Unrestricted Use SCOs (“UUSCOs”) were exceeded for Acetone (result: 1,800 ug/kg; standard: 50 ug/kg) total xylenes (result: 1,800 ug/kg; standard 260 ug/kg) at GZ-SB-C5-S1; and Ethylbenzene (result: 5,800 ug/kg; standard: 1,000 ug/kg) and total xylenes (result: 23,000 ug/kg/standard 260 ug/kg) at GZ-SB-D4-S2. Both samples were located in the southeast portion of the Site.

**SVOCs:** Semi-volatile organic compounds, including Napthalene, Acenaphthene, Dibenzoofuran, Phenanthrene, Anthracene, Flouranthe, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)floranthene, Benzo(k)flouranthene, benzo(a)pyrene, and Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, were detected above NYSDEC UUSCOs, Restricted Use SCOs, or Commercial Use SCOs in four test borings that were converted into wells (GZ-Al5, GZ-SB-A3-S3, GZ-SB-C4-S1, and GZ-SB-C5-S1), located in the southeast and southwest portion of the Site.

**Pesticides:** Pesticides, inducing DDE, DDD, DDT, Gamma-chlordane, and Alpha-chlordane, were detected at five soil boring locations exceeding UUSCOs in the southeast and southwest portion of the Site.

**Metals:** Arsenic was detected in soil above the Commercial Use SCOs in GZ-SB-B4-S2 an SB-B6 (result range: 24.5-36.7 mg/kg; standard 16 mg/kg). Arsenic (1 sample), Selenium (9 samples), Lead (3 samples), Zinc (4 samples), Copper (2 samples), and Mercury (1 sample) were detected in soil above UUSCOs in the southeast and southwest portion of the Site.

**Groundwater:**

**VOCs:** Two locations on the southwest side of the Site had VOCs in groundwater at concentrations above their respective NYSDEC groundwater quality standard. At GZ-D3, the following nine VOCs were detected in groundwater at concentrations above their respective NYSDEC groundwater quality standard or guidance value: 1,2-Dichloroethane (result: 6.5 ug/l; standard 0.6 ug/l); benzene (result: 240 ug/l; standard 1 ug/l); toluene (result: 21 ug/l; standard 5 ug/l); ethylbenzene (result: 290 ug/l; standard 5 ug/l); m&p-Xylene (result: 150 ug/l; standard 5 ug/l); o-Xylene (result: 11 ug/l: standard 5 ug/l); Isopropylbenzene (result: 52 ug/l; standard 5 ug/l); n-propylbenzene (result: 130 ug/l; standard 5 ug/l); and 1,2,4-Trimethylbenzene (result: 6.4; standard 5 ug/l).

**SVOCs:** Groundwater samples were not analyzed for SVOCs; however Naphthalene is a SVOC that is detectable by the VOC analysis. Naphthalene was detected at three of the monitoring wells above its respective NYSDEC groundwater quality guidance value of 10 ug/l at a concentration of 92 ug/l (GZ-A15-northwest side of the Site), 190 ug/l (GZ-D3-southwest side of the Site), and 14 ug/l (GZ-D5-southwest side of the Site).

**Metals:** Exceedances of the NYSDEC groundwater standard for Selenium (15 locations ranging from 26.4 to 121 ug/l; standard: 10 ug/l) and Lead (6 locations ranging from 25.7 to 150 ug/l; standard 25 ug/l) were spread across the north and south portions of the Site. Antimony (result 138 ug/l; standard 3 ug/l), arsenic (result: 218 ug/l; standard 25 ug/l), and chromium (result: 89 ug/l; 50 ug/l) were detected above their respective NYSDEC groundwater quality standard in one well, GZ-
A3, located in the southwest portion of the Site. There was one exceedance of the NYSDEC groundwater standard for Cadmium (result 5.4 ug/l; standard 5 ug/l) on the northwest portion of the Site.

Soil Vapor:
No soil vapor data has been obtained on this Site. The most recent Environmental Report on this Site was prepared in 2004 prior to the New York State Department of Health’s issuance of its first Guidance for Evaluating Soil Vapor Intrusion in October 2006.

[Please refer to Questions 11-13 on the BCP Application Form]

SECTION V - ADDITIONAL REQUESTOR INFORMATION

See Section I, Requestor Information and responses in the Application form.

SECTION VI- CURRENT PROPERTY OWNER/OPERATOR INFORMATION

Exchange Street Associates LLC, located at 25 Mason Lane, Slingerlands, New York 12159 (“Owner”) is the owner of the three parcels which make up the Site, and are described above. The Owner has owned the parcels since March 31, 2015. See Exhibit C, Deeds. Requestor has no relationship with the current owner, other than a Site Access Agreement to investigate and remediate the Site. See Exhibit D.

A past owner and operator list is attached as Exhibit E. This Exhibit includes both current and previous property owners and operators by name, last known address, telephone number, and the Requestor’s relationship to each owner and operator (all of which are “None”). Exhibit E also includes the prior operators’ use of the Site, which generally included a variety of commercial uses, including offices, inside and outdoor storage, freezer storage, vehicle repair (including painting) and storage, art framing, retail, and light manufacturing.

SECTION VII- REQUESTOR ELIGIBILITY INFORMATION

[Please Refer to Questions 1-11 on the BCP Application Form]

REQUESTOR CERTIFICATION

The Requestor certifies it is a Volunteer, since it does not own the Site; and does not have nor has it ever had a relationship with any of the past owners or operators of the Site, nor did it have involvement with the Site at the time of disposal.
SECTION VIII- PROPERTY ELIGIBILITY INFORMATION

[Please refer to Questions 1-4, and 6 on the BCP Application Form]

See also Section VIII on the BCP Application Form. In addition to the responses on the application form, which clarify the Site is an eligible brownfield site pursuant to the brownfield site exceptions in ECL §27-1405, the following information further demonstrates this Site’s eligibility for the BCP.

The Site meets the definition of an eligible “brownfield site”, recently amended by statute in Environmental Conservation Law §27-1405(2) above as “any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by the department that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.” Environmental investigation results show evidence of impact from the Site’s previous commercial, manufacturing, and industrial uses, which can be linked to and caused Site contamination above the applicable cleanup standards. See Environmental Reports and Exhibit E, providing the data demonstrating exceedances of the cleanup standards for this Site. As a result, the Site meets the definition of a brownfield site pursuant to Environmental Conservation Law § 27-1405(2) above.

SECTION IX - CONTACT LIST INFORMATION

See Exhibit L for the Site Contact List, and Exhibit M for the Repository Letters.

SECTION X- LAND USE FACTORS

1. Current Zoning

   The Site is within the First Prize Center Redevelopment Overlay District ("First Prize District"), an Intermunicipal Overlay District between the Town of Colonie and the City of Albany. See Exhibit J, Chapter 191 of the Town of Colonie Code, created by Local Law No.3 of 2017, and Chapter 375-2(F)(7) of the City of Albany Code, created by Ordinance Number 27.31.17.

   The First Prize district was created because the site has been vacant since the closure of Tobin’s First Prize meat processing and packaging facility, and the Town and City each desire to facilitate the redevelopment of the Site. The intermunicipal zoning district encourages a mix of uses within multiple-story buildings and structures, encourages a high density of building structures and uses to create a village-like or urban setting, promotes pedestrian and other non-vehicular access between uses and provides sufficient separation and buffering from properties neighboring the zoning district to protect the existing character of existing land uses surrounding the district.

   The following uses are permitted in the First Prize District as of right with Site Plan approval:
   1) Hotels
   2) Banquet Centers
   3) Restaurants
   4) Retail
   5) Residential
   6) Theaters
   7) Health Clubs/ Indoor recreation
8) Entertainment  
9) Grocery stores/Supermarkets  
10) Amphitheaters and parks/cultural entertainment facilities  
11) Offices  
12) Parking and multi-level parking structures  
13) Any other use proposed which the Consolidated Zoning Board determines is consistent with and furthers the intent of this First Prize Center Redevelopment Overlay Zone

2. **Current Use**

This Site is currently used for a variety of commercial uses, including offices, inside and outdoor storage, freezer storage, vehicle repair (including painting) and storage, art framing, retail, and light manufacturing. The possible contaminant exceedances described in the environmental assessment are likely from past operators, such as Tobin, Goodyear, Consolidated Rendering Company, and the various vehicle painting and repair shops both previously and currently on the Property. A summary of current business operations and their uses is included on the Previous Owners and Operators list in Exhibit E. The surrounding land uses, as identified during the site visit, are described as follows:

- **Northeast** - Residential properties, a parking lot used by Stock Transportation for school bus parking, Colonie Business Machines, Pro Tech Automatic Lawn Sprinklers, and a Sunoco gasoline station lie to the northeast of the subject site, on the opposite side of Exchange Street.
- **Northwest** - Remaining vacant lands of the First Prize Center, a fenced-in storage yard occupied by Albany RV Sales & Rentals, and Town of Colonie baseball fields are located to the northwest of the site.
- **Southeast** - Residential areas and Everett Road lie to the southeast of the subject site.
- **Southwest** - Railroad tracks used by ConRail and Amtrak form the southwest property boundary. The Patroon Creek and Interstate Route 90 lie to the southwest of the railroad tracks.

3. **Intended Use Post Remediation**

Post remediation use of the Site will be a mixed-use community, with residential built over retail and commercial space. See Section II, Project Scope for a more detailed description.

4. **Do current historical and/or recent development patterns support the proposed use?**

Yes. The historical use of the Site and the surrounding area has been largely mixed-use manufacturing, commercial, and residential.

5. **Is the proposed use consistent with applicable zoning laws/maps?**

Yes. See response to Question I above in this Section. The proposed mixed use is consistent with the zoning in the First Prize Center Redevelopment Overlay District, an Intermunicipal Overlay District between the Town of Colonie and the City of Albany. See Exhibit J, Chapter 191 of the Town of Colonie Code, created by Local Law No.3 of 2017, and Chapter 375-2(F)(7) of the City of Albany Code, created by Ordinance Number 27.31.17.
6. **Consistent with the Master Plan?**

Yes. The project is consistent with the Comprehensive Plans for the Town of Colonie and the Common Council of the City of Albany, each of which desire to facilitate redevelopment of this vacant and deteriorating property. City of Albany Comprehensive Plan § 3.1 encourages ways to make the City attractive for business development to regional economic development practitioners, including the creation of new districts, and development patterns that include walkable streets, compact, mixed-use development, public spaces, and context sensitivity to historic design and development. Town of Colonie Comprehensive Plan § 3.3 mentions the Site as an underutilized industrial area to be revitalized, and a critical economic development area.

WRITTEN CONSENT

The undersigned, being a Member of First Prize Development Partners, LLC, does hereby certify as follows:

1. First Prize Development Partners, LLC is the prospective volunteer for the First Prize Center located at 68 Exchange Street, Town of Colonie (Tax Parcel No. Section 53.16 Block 1 Lot 23.1); Rear Russell Road, City of Albany (Section 53.59 Block 1 Lot No. 3.1, and Russell Road, City of Albany (Section 53.60 Block 1 Lot 1) (the “Site”).

2. The following person, Simon J. Milde, the Managing Member, has been authorized to execute any documents required by the New York State Department of Environmental Conservation on behalf of Brownfield Site Volunteer: First Prize Development Partners, LLC.

IN WITNESS WHEREOF, the undersigned has executed this Certificate on this 3rd day of August of 2017.

Bruce A Hidley, County Clerk
THIS INDENTURE, Made this 31st day of March, 2015

Between Albany County Industrial Development Agency, 112 State Street, Albany, NY 12207, Party of the first part, and

Exchange Street Associates, LLC, 39 Mohawk Trail, Slingerlands, NY 12159, Party of the second part,

WITNESSETH, that Party of the first part, in consideration of One Dollar ($1.00) lawful money of the United States, and other good and valuable consideration paid by the Party of the second part, do hereby grant and release unto the Party of the second part, its heirs, successors and assigns forever,

ALL THAT CERTAIN piece, parcel, and plot of land, together with the buildings and improvements situate thereon located both in the City of Albany and in the Town of Colonie, County of Albany, State of New York as more particularly described on Schedule “A” annexed hereto and made a part hereof.

Being a portion of the same premises conveyed to Albany County Industrial Development Agency by deed dated February 10, 1984 and recorded in the Albany County Clerk’s Office on June 21, 1984 in Liber 2263 of Deeds at P. 297.

Also being a portion of the premises in which a lease purchase right was acquired by the party of the second part pursuant to a Lease Purchase Agreement dated December 30, 1983 and recorded June 27, 1985 in Liber 2286 at p. 37, and assigned to Exchange Street Associates by Assignment dated November 30, 1987 and recorded December 1, 1987 in Liber 2351 at p. 1131.

This conveyance is made subject to any and all covenants, conditions, easements, and restrictions of record, any zoning and environmental protection laws; any existing tenancies, and unpaid installments of street and improvement assessments payable after the date of transfer of title to the premises and any state of facts which an inspection and/or accurate survey may show.

Together with the appurtenances and all the estate and rights of the Party of the first part in and to said premises,

To have and to hold the premises herein granted unto the Party of the second part, its heirs and assigns forever,

And said Party of the first part covenants as follows:

First, That the Party of the second part shall quietly enjoy the said premises;

Second, That said Party of the first part will forever WARRANT the title to said premises.
Third, That, in Compliance with Section 13 of the Lien Law, the grantor will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

In Witness Whereof, The Parties of the first part hereto have hereunto set their hands and seal the day and year first above written.

In Presence of

Albany County Industrial Development Agency

By: 

Gary W. Domalewicz, Chairman

STATE OF NEW YORK)
COUNTY OF ALBANY ) ss.:

On the 27th day of March, 2015 before me, the undersigned, a Notary Public in and for said State, personally appeared Gary W. Domalewicz, Chairman of ACIDA, personally known to me or proved to me on the basis of satisfactory evidence to be the individual whose name is subscribed to the within instrument and acknowledged to me that he executed the same in his capacity, and that by his signature on the instrument, the individual, or person upon behalf of which the individual acted, executed the instrument.

WALTER J. FORMAN
Notary Public, State Of New York
No. 4870407
Qualified in Albany County
Commission Expires September 2, 2018
EXHIBIT A

ALL THAT CERTAIN PIECE OR PARCEL OF LAND, with the buildings and improvements thereon, situate, lying and being partly in the City of Albany and partly in the Town of Colonie, County of Albany, State of New York being bounded and described as follows:

BEGINNING at a point in the southerly line of Exchange Street, said point being at the northerly corner of the lands now or formerly of Camarota; and

RUNNING THENCE South 47 degrees 13 minutes 07 seconds West, along the lands now or formerly of Camarota 239.04 feet to a point, at the northwest corner of said lands now or formerly of Camarota and in the division line between the Town of Colonie and the City of Albany;

THENCE South 42 degrees 34 minutes 53 seconds East, along said division line 37.70 feet to a point;

THENCE South 56 degrees 09 minutes 23 seconds West, along Everett Road Extension 198.16 feet to a point;

THENCE South 05 degrees 54 minutes 20 seconds East, along Everett Road Extension 55.87 feet to a point;

THENCE South 43 degrees 58 minutes 40 seconds West, 33.45 feet to a point in the easterly line of the lands now or formerly of New York Central Railroad;

THENCE North 42 degrees 49 minutes 15 seconds West, along the easterly line of said railroad 3103.60 feet to a point in the southerly line of the lands conveyed to the Town of Colonie by the Albany County Industrial Development Agency by deed dated March 1, 1989 and recorded April 19, 1989 in Liber 2389 cp 379;

THENCE along the lands of the Town of Colonie conveyed as aforesaid the following seven courses:

1) South 76 degrees 35 minutes 55 seconds East, 11.99 feet to a point;
2) North 43 degrees 01 minutes 59 seconds East, 30.00 feet to a point;
3) North 02 degrees 37 minutes 08 seconds West, and crossing the division line between the City of Albany and the Town of Colonie, 399.47 feet to a point;
4) North 54 degrees 25 minutes 16 seconds East, 440.10 feet to a point;
5) North 60 degrees 40 minutes 13 seconds, 56.29 feet to a point;
6) South 30 degrees 39 minutes 05 seconds East, 20.00 feet to a point; and
7) North 59 degrees 20 minutes 55 seconds East, 50.01 feet to a point in the southerly line of Exchange Street;

THENCE South 30 degrees 39 minutes 05 seconds East, along the southerly line of Exchange Street 1556.15 feet to a point;

THENCE CONTINUING along the southerly line of Exchange Street South 42 degrees 46 minutes 52 seconds East, 727.86 feet to the point and place of beginning.

TICOR TITLE INSURANCE COMPANY
The policy or policies to be issued will contain exceptions to the following (unless the same are disposed of to the satisfaction of this Company):

1. Persons in possession and lessees.
2. The amount of acreage or square footage is not insured.
3. Water and Sewer Rents, if any. Municipal department charges, if any, not returned to county tax enforcing officer for collection.
5. Right of Way - Liber 1036 cp 245.
6. Road and Drainage Easement - Liber 524 cp 284.
7. Covenants and Restrictions in Liber 1380 cp 273.
8. Rights and easements of others in and to and cost of maintenance of private road - Liber 573 cp 286.
10. Access between the premises herein and Everett Road.
11. Temporary Grading Easement Liber 2752 cp 963, Map No. 15 Parcel No. 15.
13. Temporary Easement Liber 2389 cp 381.
16. Terms, covenants, conditions and agreements contained in Lease dated September
The policy or policies to be issued will contain exceptions to the following:

(Unless the same are disposed of to the satisfaction of this Company):

17. Terms, covenants, conditions and agreements contained in Lease dated October 19, 1988 made by and between Exchange Street Associates, Lessor, and Polacsek Farms, Inc. Lessee, a Memorandum of which is recorded July 11, 1989 in Liber 2395 cp 659.

18. Any state of facts that an accurate current survey would show.

19. Exact location, courses and distances of premises described in Schedule "A" cannot be guaranteed without an accurate survey.

Re: Site Access to Perform Brownfield Cleanup Program Work
The First Prize Center
Exchange Street
City of Albany and Town of Colonie, Albany County, New York

Dear Frank:

As you are aware, First Prize Development Partners, LLC is submitting a Brownfield Cleanup Program ("BCP") Application to the New York State Department of Environmental Conservation to voluntarily investigate and remediate The First Prize Center located in the City of Albany and Town of Colonie, Albany County, New York known and designated as 76 Exchange Street (assessed as 68 Exchange Street, Town of Colonie, tax map number 53.16-1-23.1, Russell Road, City of Albany, tax map number 53.60-1-1, and Rear Russell Road, City of Albany, tax map number 53.59-1-3.1) (the “BCP Site”). As you obviously know, Exchange Street Associates, LLC owns the aforementioned parcels that make up the BCP Site. We need your written permission below to access your property for the purpose of performing environmental investigation and remediation work as a criteria for acceptance into the BCP.

If you agree to sign below, you are granting us what is known as a “temporary license” to allow an appropriate contractor we hire to enter the property to perform investigation and remediation work. We promise to provide you with copies of any information we generate about the property, and if we do accidentally damage your property in any way, we agree to repair the damages to restore the property to the way it was before we entered. Our contractor will also maintain insurance that would cover any accidents on the job. We promise to minimize any and all inconvenience to you in connection with this work, and will give you one week notice before the work begins. If you have any questions, please do not hesitate to call William M. Hoblock who is coordinating investigation and remediation at 518.786.7100. Otherwise, please sign below so that this work can proceed.
Thank you for your cooperation.

Sincerely,

[Signature]

First Prize Development Partners, LLC
By: Simon J. Milde
Managing Member

As a member of the site owner, I am authorized to grant this temporary license and agree to allow First Prize Development Partners, LLC and its agents to enter my property to perform the BCP investigation and/or remediation work required.

Ordinance Number 27.31.17 (as amended)

AN ORDINANCE AMENDING CHAPTER 375 OF THE CODE OF THE CITY OF ALBANY IN RELATION TO ENACTING A NEW ARTICLE XXI (ALBANY-COLONIE INTERMUNICIPAL OVERLAY), WITH CORRESPONDING OVERLAY MAP

The City of Albany, in Common Council convened, does hereby ordain and enact:

Section 1. The Common Council of the City of Albany in the County of Albany, New York does hereby enact this Ordinance under and pursuant to the General Municipal Law, the General City Law, the Second Class Cities Law and the Municipal Home Rule Law of the State of New York.

Section 2. Chapter 375 of the Code of the City of Albany is hereby amended by adding a new Article XXI (Albany-Colonie Intermunicipal Overlay District) to read as follows:

ARTICLE XXI
Albany-Colonie Intermunicipal Overlay District

§375-198. Legislative Purpose and Intent

The property, as described and/or depicted on the corresponding overlay map, has been a long vacant industrial property bisected by the municipal borders of the Town of Colonie and the City of Albany. The property formerly housed Tobin’s First Prize meat processing and packaging facility, where meat packing activities were conducted, and has been significantly deteriorating since its closure decades ago. Several redevelopment opportunities have been explored over the years with no tangible results. One of the primary reasons cited for the lack of interest and or ability to redevelop the site is the uncertainty that results from the property being located in two separate municipalities and subject to two separate and complex land use approval processes.

Consistent with their respective Comprehensive Plans, the Town Board of the Town of Colonie and the Common Council of the City of Albany each desire to facilitate redevelopment of this vacant and deteriorating property. Redevelopment, through replanning, and demolition and reconstruction where appropriate will promote and encourage the elimination of blight in this area and promote economic growth. Maximum flexibility for future redevelopment is to be encouraged.
City of Albany Comprehensive Plan §3.1, which encourages ways to make the City attractive for business development and appealing to regional economic development practitioners, states:

[Creation of new zoning or overlay districts, density evaluation and adjustment to bring about desired community vision, elimination of existing zoning districts that are obsolete or ineffective, and rezoning of areas of the City to existing or new districts. Form-based codes should be considered... and [p]romote development patterns that include walkable streets, compact, mixed use development, public spaces, and context sensitivity to historic design and development.

Town of Colonie Comprehensive Plan, §3.3, states:

Many opportunities exist within the Town of Colonie to regenerate and revitalize once vital industrial areas. Locations that are underutilized or even unused today, such as the First Prize Center ... could be returned to productive use. Trying to recreate value in these areas is consistent with the notion that the Town of Colonie cannot look at its remaining undeveloped land for all or most of its future development opportunities. The future revitalization of these areas should be viewed as a critical economic development opportunity... Success with this type of initiative will help the Town maintain its fiscal balance, making it possible to fund necessary services and desired quality of life improvements.

It is the purpose of this article to promote the health, safety, convenience and general welfare of the residents of the City and the Town by establishing a single intermunicipal zoning district applicable to the covered area which promotes and encourages economic development in both municipalities through an integrated mix of planned commercial and residential uses designed and constructed using smart growth principles. This intermunicipal zoning district encourages a mix of uses within multiple-story buildings and structures, encourages a high density of building structures and uses to create a village-like or urban setting, promotes pedestrian and other non-vehicular access between uses and provides sufficient separation and buffering from properties neighboring the zoning district to protect the existing character of existing land uses surrounding the district.

This article is intended to promote intergovernmental cooperation to increase coordination and effectiveness of comprehensive planning and land use regulation, make more efficient use of infrastructure and municipal revenues, as well as the enhanced protection of community resources, especially where such resources span municipal boundaries.
It is the intent of this article to create an intermunicipal overlay zoning district, and a set of self-contained regulations to apply to any future redevelopment that occurs within the zoning overlay district. The City of Albany and the Town of Colonie will accomplish this vision through creation of the Albany-Colonie Intermunicipal Overlay Zoning District.

The requirements of this article are intended to be the only land use requirements to apply within the zoning overlay district, except as provided in this article, and such requirements shall supersede any zoning requirements and other land use regulations that would otherwise apply in the absence of this article. The provisions of this article shall be broadly interpreted to promote the Town of Colonie’s and the City of Albany’s vision and goals as set forth herein, to ensure orderly development and to satisfy the legislative intent of this Article.

This article is adopted pursuant to, and in furtherance of, an Intermunicipal Agreement between the City of Albany and Town of Colonie.

This article may not be changed unilaterally by the Town of Colonie or the City of Albany. Any modification of this article shall be subject to Section 13 of the Intermunicipal Agreement.

A. The Common Council hereby creates an intermunicipal Zoning District entitled Albany-Colonie Intermunicipal Overlay Zoning District (“AC-O”).

B. The property depicted on the corresponding overlay map is hereby designated as the AC-O Zone and the City of Albany and Town of Colonie Zoning Maps are hereby amended accordingly.

C. The Town Board and the Common Council hereby adopt a concept redevelopment plan (“Concept Plan”) for the AC-O Zone as contained in an Intermunicipal Agreement executed between the City of Albany and Town of Colonie. Such Concept Plan may be amended from time to time as provided herein:

1) Subject to the limitations set forth in subsections (G), (H) & (I) of this section, the actual mix and location of uses and other features of the Concept Plan, including access drives, shall be proposed by the Applicant in connection with each Phase(s), subject to site plan review.

2) Establishment of uses other than those listed insubsections (G) & (H) of this section or changes to the boundaries of the Development
Envelope or the Buffer Area (except access drives approved as part of site plan review) shall not be permitted except by amendment to this chapter duly adopted by the Town and City.

3) Any changes made to the Concept Plan as provided herein, including approved Phase(s), shall become part of this article.

D. These regulations shall apply to all or any redevelopment, construction, erection, location or expansion of any use, including any building, structure or appurtenant system, as herein provided for in the AC-O as shown on the Concept Plan (hereinafter, all or any part of same, the “Project”).

E. No redevelopment shall be undertaken in the AC-O except in conformity this article, including the Concept Plan. The Concept Plan may be constructed or otherwise undertaken in one or more phases (hereinafter, “Phase” or “Phases”). This article contains the only zoning or land use requirements applicable in the AC-O. No other zoning or land use requirements or provisions of either the City or Town zoning or land use requirements shall apply, including, but not limited to any such requirements relating to subdivision, demolition and outdoor uses. In the event that the Town or City zoning and land use laws contain a zoning requirement or provision not otherwise contained in, or which is in conflict with, the AC-O, the requirements of this article shall govern.

F. Permits and/or approvals required. No use may be established and no development may be commenced without first obtaining site plan approval or other required permits and/or approvals pursuant to the requirements of the AC-O and the Intermunicipal Agreement, including, but not limited to compliance with applicable SEQRA requirements, and grading and clearing permits.

G. Permitted Uses

(1) The principal uses shown on the Concept Plan, which are the same as the principal uses listed in the Permitted Use Table below, shall be permitted as of right in the AC-O. If a use is not listed in the Permitted Use Table, it shall be prohibited. Multiple principal uses shall be permitted on a single lot, or multiple lots, and may be bisected by the Town/City municipal border.

(2) Permitted Use Table - The following uses are permitted:

(a) Hotels
(b) Banquet Centers
(c) Restaurants
(d) Retail
(e) Residential
(f) Theaters
(g) Health Clubs/Indoor recreation
(h) Entertainment
(i) Grocery stores/Supermarkets
(j) Amphitheaters and parks/cultural entertainment facilities
(k) Offices
(l) Parking and multi-level parking structures
(m) Any other use proposed which the Consolidated Zoning Board determines is consistent with and furthers the intent of this AC-O

H. Permitted accessory uses shall be as follows:

(1) All structures or uses which are subordinate to and serve a principal building or principal use shall be permitted.

I. Area and Bulk Requirements

(1) The Project shall be constructed within the overall development envelope shown on the Concept Plan ("Development Envelope"), and the remainder of the Site (except for access drives through such area to neighboring public streets) shall be utilized as a buffer from surrounding properties and uses ("Buffer Area"). Provided that the Buffer Area is maintained as provided for herein, there shall be no yard setback requirements, or building or structure coverage limitation, provided however, that in all areas of the AC-O where there is an internal roadway, a sidewalk meeting the requirements of the Town must be constructed between such roadway and the ground floor of such adjoining building or structure.

(2) Maximum building height: 185 feet

(3) Parking.

a. Parking shall be provided in accordance with the applicable industry standards and practices for mixed-use projects, taking into account the use or uses proposed in connection with each Phase. Such standards shall include shared parking facilities.

b. The applicant shall demonstrate the fact that adequate and convenient parking is being provided and accessible to the proposed uses in connection with each Phase.
c. The Consolidated Planning Board may waive the requirements and allow the number of spaces deemed necessary, and their location relative to the use in connection with each Phase.

d. Parking may be provided for any use or uses on one or more lots within the AC-O.

J. Landscaping. Landscaping for the particular Phase under review shall be subject to the standards and criteria set forth in 375-198(2)(L)(B)(5).

K. Powers of Consolidated Planning Board

(1) The Consolidated Planning Board shall have the powers set forth in the Intermunicipal Agreement.

(2) Each Phase of the Project, including the location and mix of uses, shall be subject to site plan review by the Consolidated Planning Board.

L. Site Plan Review Standards and Procedure

(1) Application for site plan review. An application for site plan review must be made to the Consolidated Planning Board on a prescribed Consolidated Planning Board application form. The application form shall be presumed the minimum required information and documentation, however, the Consolidated Planning Board may, at its discretion, require the submission of such additional information as it deems necessary to conduct its review, or waive information it determines is not needed. The Consolidated Planning Board shall have the authority to modify the application form in its discretion to further the purposes and intent of this Ordinance.

(2) Site Plan Review Standards and General Criteria. The Consolidated Planning Board shall review a site plan application in accordance with the requirements below:

(a) Conformance with the Concept Plan. The Phase must substantially conform with the Concept Plan.

(b) Traffic access and roads. All proposed intersections with public roads shall be adequate but not excessive in number;
adequate in width, paving, grade, alignment and visibility. Necessary traffic signalization, signs, dividers and other safety controls, devices and facilities shall be given proper consideration and duly provided wherever appropriate or warranted.

(c) Pedestrian safety and access. Safe, adequate and convenient pedestrian access and circulation shall be provided both within the Site and to adjacent public roads.

(d) Circulation and parking. Off-street parking shall be provided as set forth in §375-198(2)(I)(3). The interior circulation system shall be adequate to provide safe accessibility to, from and within all required parking areas. Parking on streets internal to the Site shall be permitted, subject to Consolidated Planning Board approval. The location and design of loading spaces shall not unreasonably interfere with neighboring off-site uses.

(e) Screening and landscaping. All structures and recreational, parking, loading, public and other service areas shall be reasonably landscaped and/or screened so as to provide adequate visual and noise buffers from neighboring off-Site uses. The scale and quality of the landscaping and screening on Site shall be harmonious with the character of the neighborhood abutting the landscaped and/or screened area.

(f) Drainage. A storm drainage system which demonstrates affirmative compliance with the form, scope and substance of all applicable design criteria shall be provided to accommodate expected loads from the tributary watershed. Drainage shall be conducted to a point of adequate and suitable disposal. Where appropriate, stormwater control shall be provided so as to retain the same rate of off-Site runoff as the existing condition.

(g) Water/Sewer. Each Phase shall be connected to the existing municipal water and sewer systems currently serving the Site. The applicant shall be required to construct the on-Site improvements necessary to assure that such systems are able to satisfactorily accommodate the use.
(h) Lighting. All site lighting shall be designed and installed so as not to unreasonably interfere with neighboring off-Site uses properties.

(i) Fire protection. All proposed structures, service areas, fire lanes, water distribution lines, hydrants, equipment and material shall be adequate and readily accessible for the protection of the proposed uses from fire. Sufficient water supply for fire-fighting purposes shall be provided.

(j) Impact of the Project on adjacent land uses. Adjacent and neighboring off-Site properties shall be protected against noise, glare, unsightliness or other objectionable features. Where a proposed use is nonresidential which would adjoin a residential area, the Planning Board shall minimize the impact of the proposed use on such off-Site residential properties.

(k) Signage. Signage for the particular Phase under review shall be as provided herein.

(i) Signage located on the south side of the AC-O and facing the highway (I-90) and/or Everett Road will be consistent with existing other signage along I-90.

(ii) Signage that faces internally within the AC-O may differ from other areas of the Site, as long as not visible from properties to the north of the AC-O.

(iii) Signage located on the north side of the AC-O and facing outward to Exchange Street will comply with the Town of Colonie regulations pertaining to signage.

(3). Waivers. An applicant may request, in writing, a waiver or modification of any of the site plan review standards herein. The Consolidated Planning Board may waive or otherwise modify such standards, or requirements, as the case may be, upon a finding that such action is appropriate to further the spirit and intent of this Ordinance.

M.Powers of Consolidated Zoning Board of Appeals

(1) The Consolidated ZBA shall have the powers set forth in the Intermunicipal Agreement.
(2) To the extent that the powers set forth in such laws are capable of differing interpretations, the Consolidated ZBA shall adopt and follow the interpretation that most furthers the purposes and goals of redeveloping the Site into the Project.

N. Administration and Enforcement

The provisions of this Ordinance shall be administered and enforced as provided herein.

O. Definitions

Residential Use: The use of all or a portion of a building or structure arranged, intended or designed to be occupied by three or more resident households living independently of each other. An apartment building and multiple or multifamily dwellings are the same type of structure. Residential use shall include owner-occupancy or for rent.

Health Clubs/Indoor Recreation: An establishment that offers facilities, equipment and programs for exercise, weight loss and/or body development provided that, in order to be within the scope of this definition, any such use that requires a license to operate must demonstrate that it has or is qualified to obtain such a license. Food items may be offered. Outdoor athletic courts and facilities are permitted and may be included with a health club and/or indoor recreation use.

Height: The vertical distance from the average ground level of the foundation of the building or structure to the highest point of the roof, unless otherwise specified herein, provided that chimneys, spires, towers, elevators, penthouses, tanks, HVAC, and similar projections shall be excluded from such calculation.

Hotel: A building in which lodging is provided and offered to the public, which is customarily open to transient guests, and which may include ancillary facilities and services such as restaurants, meeting rooms, entertainment, personal services, and recreational facilities. A hotel unit may contain a kitchen for extended stay lodgings. Outdoor athletic courts and other outdoor facilities are permitted and may be included with a hotel use.

Restaurant: A building or structure or portion thereof, arranged, intended or designed for the preparation and service of meals at tables or counters. A restaurant shall include banquet halls.
Retail: Establishments engaged in the sale of goods, merchandise and services to the public and rendering services incidental to the sale of such goods.

Theater: A building or space, or portion thereof, used for cultural education and experiences, motion pictures, live productions, or other entertainment, including, but not limited to, museums, art galleries, aquariums, amphitheaters, theaters, cultural entertainment facilities and performance halls.

Offices: Any building or part of a building where the principal use is the operation of a business, administrative, governmental, public utility, sales, professional, or other business or services.

Multi-level parking structures: A structure used for parking or temporary storage of motor vehicles on more than one floor.

Section 3  Supersession

This Ordinance shall supersede all other local laws and ordinances of the Town of Colonie and the City of Albany applicable to the Site that are inconsistent with the provisions of this Ordinance.

Section 4. If any clause, sentence, paragraph, word, section or part of this Ordinance shall be adjudged by any court of competent jurisdiction to be unconstitutional, illegal or invalid, such judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation of the clause, sentence, paragraph, or section or part thereof directly involved in the controversy in which such judgment shall have been rendered.

Section 5  This Ordinance shall take effect immediately.

First Assistant Corporation Counsel
Attachment 1
(Albany-Colonie Intermunicipal Overlay zoning district map)
TO: Gerald Campbell, City Clerk
FROM: , Council Member
RE: Request for Common Council Legislation
      Supporting Memorandum
DATE: February 24, 2017

ORDINANCE NUMBER 27.31.17
TITLE:
AN ORDINANCE AMENDING CHAPTER 375 OF THE CODE OF THE CITY OF ALBANY BY
ENACTING A NEW SECTION, 375-198(ALBANY-COLONIE INTERMUNICIPAL OVERLAY,
“AC-O”) AND AMENDING THE ZONING MAP ACCORDINGLY

GENERAL PURPOSE OF LEGISLATION
Creation of new zoning overlay district to eliminate the existing obsolete and ineffective zoning
district. The proposed zone change will prevent continued blight and promote development patterns
that include walkable streets, compact, mixed use development and public spaces.

NECESSITY FOR LEGISLATION AND ANY CHANGE TO EXISTING LAW
Amendments regarding zoning must be approved by the Council. Changing the zoning to AC-O
overlay classification allows for effective area redevelopment and elimination of existing blight.

FISCAL IMPACT(S)
Unknown at this time.

Local Law Filing

(Use this form to file a local law with the Secretary of State.)
Text of law should be given as amended. Do not include matter being eliminated and do not use italics or underlining to indicate new matter.

Town of Colonie
Local Law No. 3 of the year 2017

A local law establishing Chapter 191 of the Code of the Town of Colonie and the zoning map for the creation of the “First Prize Center Redevelopment Overlay Zoning District.”

Be it enacted by the Town Board of the Town of Colonie as follows:

SECTION 1. ENACTMENT.

A. The Town Board of the Town of Colonie in the County of Albany, New York does hereby enact this Local Law under and pursuant to the General Municipal Law, the Town Law and the Municipal Home Rule Law of the State of New York.

B. The Common Council of the City of Albany in the County of Albany, New York does hereby enact this Local Law under and pursuant to the General Municipal Law, the General City Law and the Municipal Home Rule Law of the State of New York.

SECTION 2. CREATION OF INTERMUNICIPAL OVERLAY DISTRICT.

Chapter 191 of the Town of Colonie Code and Chapter 375-2 (F)(7) of the City of Albany Code is hereby created as follows:

Chapter 191 - First Prize Center Redevelopment Overlay Zoning District

§191-1 - Legislative Purpose and Intent.
The property, as described and/or depicted on Attachment 1, has been a long vacant industrial property bisected by the municipal borders of Town of Colonie and the City of Albany. The property formerly housed Tobin’s First Prize meat processing and packaging facility, where meat packing activities were conducted, and has been significantly deteriorating since its closure decades ago. Several redevelopment opportunities have been explored over the years with no tangible results. One of the primary reasons cited for the lack of interest and or ability to redevelop the site is the uncertainty that results from the property being located in two separate municipalities and subject to two separate and complex land use approval processes.

Consistent with their respective Comprehensive Plans, the Town Board of the Town of Colonie and the Common Council of the City of Albany each desire to facilitate redevelopment of this vacant and deteriorating property. Redevelopment, through replanning, and demolition and reconstruction where appropriate will promote and encourage the elimination of blight in this
Consistent with their respective Comprehensive Plans, the Town Board of the Town of Colonie and the Common Council of the City of Albany each desire to facilitate redevelopment of this vacant and deteriorating property. Redevelopment, through replanning, and demolition and reconstruction where appropriate will promote and encourage the elimination of blight in this area and promote economic growth. Maximum flexibility for future redevelopment is to be encouraged.

City of Albany Comprehensive Plan §3.1, which encourages ways to make the City attractive for business development and appealing to regional economic development practitioners, states:

[Cr]eation of new zoning or overlay districts, density evaluation and adjustment to bring about desired community vision, elimination of existing zoning districts that are obsolete or ineffective, and rezoning of areas of the City to existing or new districts. Form-based codes should be considered… and [p]romote development patterns that include walkable streets, compact, mixed use development, public spaces, and context sensitivity to historic design and development.

Town of Colonie Comprehensive Plan, §3.3, states:

Many opportunities exist within the Town of Colonie to regenerate and revitalize once vital industrial areas. Locations that are underutilized or even unused today, such as the First Prize Center… could be returned to productive use. Trying to recreate value in these areas is consistent with the notion that the Town of Colonie cannot look at its remaining undeveloped land for all or most of its future development opportunities. The future revitalization of these areas should be viewed as a critical economic development opportunity… Success with this type of initiative will help the Town maintain its fiscal balance, making it possible to fund necessary services and desired quality of life improvements.

It is the purpose of this chapter to promote the health, safety, convenience and general welfare of the residents of the City and the Town by establishing a single intermunicipal zoning district applicable to the covered area which promotes and encourages economic development in both municipalities through an integrated mix of planned commercial and residential uses designed and constructed using smart growth principles. This intermunicipal zoning district encourages a mix of uses within multiple-story buildings and structures, encourages a high density of building structures and uses to create a village-like or urban setting, promotes pedestrian and other non-vehicular access between uses and provides sufficient separation and buffering from properties neighboring the zoning district to protect the existing character of existing land uses surrounding the district.

This chapter is intended to promote intergovernmental cooperation to increase coordination and effectiveness of comprehensive planning and land use regulation, make more efficient use of infrastructure and municipal revenues, as well as the enhanced protection of community resources, especially where such resources span municipal boundaries.

It is the intent of this chapter to create an intermunicipal overlay zoning district, and a set of self-contained regulations to apply to any future redevelopment that occurs within the zoning overlay
district. The City and the Town will accomplish this vision through creation of the First Prize Redevelopment Overlay Zoning District.

The requirements of this chapter are intended to be the only land use requirements to apply within the zoning overlay district, except as provided in this chapter, and such requirements shall supersede any zoning requirements and other land use regulations that would otherwise apply in the absence of this chapter. The provisions of this chapter shall be broadly interpreted to promote the Town’s and the City’s vision and goals as set forth herein, to ensure orderly development and to satisfy the legislative intent of this Local Law.

This chapter is adopted pursuant to, and in furtherance of, an Intermunicipal Agreement between the City of Albany and Town of Colonie, executed on the ___ day of ___, 2017 (the “Intermunicipal Agreement”).

This chapter may not be changed unilaterally by the Town of Colonie or the City of Albany. Any modification of this chapter shall be subject to Section 13 of the Intermunicipal Agreement.

§191-2 - Establishment of First Prize Center Redevelopment Overlay Zoning District.
A. The Town Board and Common Council hereby create an intermunicipal Zoning District entitled First Prize Center Redevelopment Overlay Zoning District (“Redevelopment Overlay Zone” or “Site”).

B. The property depicted on Attachment 1 is hereby designated as the Redevelopment Overlay Zone and the City and Town Zoning Maps are hereby amended accordingly.

C. The Town Board and the City Council hereby adopt a concept redevelopment plan (“Concept Plan”) for the Redevelopment Overlay Zone as contained in Attachment 2 hereto. Such Concept Plan may be amended from time to time as provided herein:

1) Subject to the limitations set forth in §191-2(C)(2) below, the actual mix and location of uses and other features of the Concept Plan, including access drives, shall be proposed by the Applicant in connection with each Phase(s), subject to site plan review.

2) Establishment of uses other than those listed in §191-4 or changes to the boundaries of the Development Envelope or the Buffer Area (except access drives approved as part of site plan review) shall not be permitted except by amendment to this chapter duly adopted by the Town and City.

3) Any changes made to the Concept Plan as provided herein, including approved Phase(s), shall become part of this chapter.
§191-3 - Applicability.

A. These regulations shall apply to all or any redevelopment, construction, erection, location or expansion of any use, including any building, structure or appurtenant system, as herein provided for in the First Prize Center Redevelopment Overlay Zone as shown on the Concept Plan (hereinafter, all or any part of same, the “Project”).

B. No redevelopment shall be undertaken in the First Prize Center Redevelopment Overlay Zone except in conformity this chapter, including the Concept Plan. The Concept Plan may be constructed or otherwise undertaken in one or more phases (hereinafter, “Phase” or “Phases”). This chapter contains the only zoning or land use requirements applicable in the First Prize Center Redevelopment Overlay Zone. No other zoning or land use requirements or provisions of either the City or Town zoning or land use requirements shall apply, including, but not limited to any such requirements relating to subdivision, demolition and outdoor uses. In the event that the Town or City zoning and land use laws contain a zoning requirement or provision not otherwise contained in, or which is in conflict with, the First Prize Center Redevelopment Overlay Zone, the requirements of this chapter shall govern.

C. Permits and/or approvals required. No use may be established and no development may be commenced without first obtaining site plan approval or other required permits and/or approvals pursuant to the requirements of the First Prize Center Redevelopment Overlay Zone and the Intermunicipal Agreement, including, but not limited to compliance with applicable SEQRA requirements, and grading and clearing permits.

§191-4 - Permitted Uses.

A. The principal uses shown on the Concept Plan, which are the same as the principal uses listed in the Permitted Use Table below, shall be permitted as of right in the First Prize Center Redevelopment Overlay Zone. If a use is not listed in the Permitted Use Table, it shall be prohibited. Multiple principal uses shall be permitted on a single lot, or multiple lots, and may be bisected by the Town/City municipal border.

B. Permitted Use Table - The following uses are permitted:

1) Hotels
2) Banquet Centers
3) Restaurants
4) Retail
5) Residential
6) Theaters
7) Health Clubs/ Indoor recreation
8) Entertainment
9) Grocery stores/Supermarkets
10) Amphitheaters and parks/cultural entertainment facilities
11) Offices
12) Parking and multi-level parking structures
13) Any other use proposed which the Consolidated Zoning Board determines is consistent with and furthers the intent of this First Prize Center Redevelopment Overlay Zone
C. Permitted accessory uses shall be as follows:
   1) All structures or uses which are subordinate to and serve a principal building or principal use shall be permitted.

§191-5 - Area and Bulk Requirements.
A. The Project shall be constructed within the overall development envelope shown on the Concept Plan ("Development Envelope"), and the remainder of the Site (except for access drives through such area to neighboring public streets) shall be utilized as a buffer from surrounding properties and uses ("Buffer Area"). Provided that the Buffer Area is maintained as provided for herein, there shall be no yard setback requirements, or building or structure coverage limitation, provided however, that in all areas of the First Prize Center Redevelopment Overlay Zone where there is an internal roadway, a sidewalk meeting the requirements of the Town must be constructed between such roadway and the ground floor of such adjoining building or structure.

B. Maximum building height: 185 feet

C. Parking.
   1) Parking shall be provided in accordance with the applicable industry standards and practices for mixed-use projects, taking into account the use or uses proposed in connection with each Phase. Such standards shall include shared parking facilities.
   2) The applicant shall demonstrate the fact that adequate and convenient parking is being provided and accessible to the proposed uses in connection with each Phase.
   3) The Consolidated Planning Board may waive the requirements and allow the number of spaces deemed necessary, and their location relative to the use in connection with each Phase.
   4) Parking may be provided for any use or uses on one or more lots within the First Prize Center Redevelopment Overlay Zone.

D. Landscaping
   Landscaping for the particular Phase under review shall be subject to the standards and criteria set forth in §191-7(B)(5).

§191-6 - Powers of Consolidated Planning Board.
A. The Consolidated Planning Board shall have the powers set forth in the Intermunicipal Agreement.

B. Each Phase of the Project, including the location and mix of uses, shall be subject to site plan review by the Consolidated Planning Board.

§191-7 - Site Plan Review Standards and Procedure.
A. Application for site plan review. An application for site plan review must be made to the Consolidated Planning Board on a prescribed Consolidated Planning Board application form. Attached as Attachment 3 is the application form to be utilized. The application form shall be presumed the minimum required information and documentation, however, the Consolidated Planning Board may, at its discretion, require the submission of such additional information as it deems necessary to conduct its review, or waive information it determines is not needed. The Consolidated Planning Board shall have the authority to modify the application form in its discretion to further the purposes and intent of this Local Law.

B. Site Plan Review Standards and General Criteria. The Consolidated Planning Board shall review a site plan application in accordance with the requirements below:

1) Conformance with the Concept Plan. The Phase must substantially conform with the Concept Plan.

2) Traffic access and roads. All proposed intersections with public roads shall be adequate but not excessive in number; adequate in width, paving, grade, alignment and visibility. Necessary traffic signalization, signs, dividers and other safety controls, devices and facilities shall be given proper consideration and duly provided wherever appropriate or warranted.

3) Pedestrian safety and access. Safe, adequate and convenient pedestrian access and circulation shall be provided both within the Site and to adjacent public roads.

4) Circulation and parking. Off-street parking shall be provided as set forth in §191-5(C). The interior circulation system shall be adequate to provide safe accessibility to, from and within all required parking areas. Parking on streets internal to the Site shall be permitted, subject to Consolidated Planning Board approval. The location and design of loading spaces shall not unreasonably interfere with neighboring off-site uses.

5) Screening and landscaping. All structures and recreational, parking, loading, public and other service areas shall be reasonably landscaped and/or screened so as to provide adequate visual and noise buffers from neighboring off-Site uses. The scale and quality of the landscaping and screening on Site shall be harmonious with the character of the neighborhood abutting the landscaped and/or screened area.

6) Drainage. A storm drainage system which demonstrates affirmative compliance with the form, scope and substance of all applicable design criteria shall be provided to accommodate expected loads from the tributary watershed. Drainage shall be conducted to a point of adequate and suitable disposal. Where appropriate, stormwater control shall be provided so as to retain the same rate of off-Site runoff as the existing condition.

7) Water/Sewer. Each Phase shall be connected to the existing municipal water and sewer systems currently serving the Site. The applicant shall be required to construct
the on-Site improvements necessary to assure that such systems are able to satisfactorily accommodate the use.

8) Lighting. All site lighting shall be designed and installed so as not to unreasonably interfere with neighboring off-Site uses properties.

9) Fire protection. All proposed structures, service areas, fire lanes, water distribution lines, hydrants, equipment and material shall be adequate and readily accessible for the protection of the proposed uses from fire. Sufficient water supply for fire-fighting purposes shall be provided.

10) Impact of the Project on adjacent land uses. Adjacent and neighboring off-Site properties shall be protected against noise, glare, unsightliness or other objectionable features. Where a proposed use is nonresidential which would adjoin a residential area, the Planning Board shall minimize the impact of the proposed use on such off-Site residential properties.

11) Signage. Signage for the particular Phase under review shall be as provided herein.
   
a. Signage located on the south side of the Redevelopment Overlay Zone and facing the highway (I-90) and/or Everett Road will be consistent with existing other signage along I-90.
   
b. Signage that faces internally within the Redevelopment Overlay Zone may differ from other areas of the Site, as long as not visible from properties to the north of the Redevelopment Overlay Zone.
   
c. Signage located on the north side of the Redevelopment Overlay Zone and facing outward to Exchange Street will comply with the Town of Colonie regulations pertaining to signage.

C. Waivers. An applicant may request, in writing, a waiver or modification of any of the site plan review standards herein. The Consolidated Planning Board may waive or otherwise modify such standards, or requirements, as the case may be, upon a finding that such action is appropriate to further the spirit and intent of this Local Law.

§191-8 - Powers of Consolidated Zoning Board of Appeals.

A. The Consolidated ZBA shall have the powers set forth in the Intermunicipal Agreement.

B. To the extent that the powers set forth in such laws are capable of differing interpretations, the Consolidated ZBA shall adopt and follow the interpretation that most furthers the purposes and goals of redeveloping the Site into the Project.
§191-9 - Administration and Enforcement.

The provisions of this Local Law shall be administered and enforced as provided herein.

§191-10 - Definitions.

RESIDENTIAL USE - The use of all or a portion of a building or structure arranged, intended or designed to be occupied by three or more resident households living independently of each other. An apartment building and multiple or multifamily dwellings are the same type of structure. Residential use shall include owner-occupancy or for rent.

HEALTH CLUBS/INDOOR RECREATION - An establishment that offers facilities, equipment and programs for exercise, weight loss and/or body development provided that, in order to be within the scope of this definition, any such use that requires a license to operate must demonstrate that it has or is qualified to obtain such a license. Food items may be offered. Outdoor athletic courts and facilities are permitted and may be included with a health club and/or indoor recreation use.

HEIGHT - The vertical distance from the average ground level of the foundation of the building or structure to the highest point of the roof, unless otherwise specified herein, provided that chimneys, spires, towers, elevators, penthouses, tanks, HVAC, and similar projections shall be excluded from such calculation.

HOTEL - A building in which lodging is provided and offered to the public, which is customarily open to transient guests, and which may include ancillary facilities and services such as restaurants, meeting rooms, entertainment, personal services, and recreational facilities. A hotel unit may contain a kitchen for extended stay lodgings. Outdoor athletic courts and other outdoor facilities are permitted and may be included with a hotel use.

RESTAURANT - A building or structure or portion thereof, arranged, intended or designed for the preparation and service of meals at tables or counters. A restaurant shall include banquet halls.

RETAIL - Establishments engaged in the sale of goods, merchandise and services to the public and rendering services incidental to the sale of such goods.

THEATER - A building or space, or portion thereof, used for cultural education and experiences, motion pictures, live productions, or other entertainment, including, but not limited to, museums, art galleries, aquariums, amphitheaters, theaters, cultural entertainment facilities and performance halls.

OFFICES - Any building or part of a building where the principal use is the operation of a business, administrative, governmental, public utility, sales, professional, or other business or services.
MULTI-LEVEL PARKING STRUCTURES - A structure used for parking or temporary storage of motor vehicles on more than one floor.

SECTION 3. SUPERSESSION.
This Local Law shall supersede all other local laws and ordinances of the Town of Colonie and the City of Albany applicable to the Site that are inconsistent with the provisions of this Local Law.

SECTION 4. SAVINGS CLAUSE.
If any clause, sentence, paragraph, word, section or part of this Local Law shall be adjudged by any court of competent jurisdiction to be unconstitutional, illegal or invalid, such judgment shall not affect, impair or invalidate the remainder, thereof, but shall be confined in its operation of the clause, sentence, paragraph, or section or part thereof directly involved in the controversy in which such judgment shall have been rendered.

SECTION 5. SEQR DETERMINATION.
The Town hereby determines that this amendment is a Type 1 action that will not have a significant effect on the environment and, therefore, no other determination or procedure under the State Environmental Quality Review Act ("SEQRA") is required.

SECTION 6. EFFECTIVE DATE.
This Local Law shall take effect immediately upon filing with the Secretary of State's Office.
(Complete the certification in the paragraph that applies to the filing of this local law and strike out that which is not applicable.)

1. (Final adoption by local legislative body only.)
I hereby certify that the local law annexed hereto, designated as local law No. 3 of 2017 of the Town of Colonie was duly passed by the Town Board on in accordance with the applicable provisions of law.

2. (Passage by local legislative body with approval, no disapproval or repassage after disapproval by the Elective Chief Executive Officer.*)
I hereby certify that the local law annexed hereto, designated as local law No. ___ of 2017 of the (County)(City)(Town)(Village) of was duly passed by the on 2017, and was (approved)(not approved)(repassed after disapproval) by the and was deemed adopted on 2017, in accordance with applicable provisions of law.

3. (Final adoption by referendum.)
I hereby certify that the local law annexed hereto, designated as local law No. ___ of 2017 of the (County)(City)(Town)(Village) of was duly passed by the on 2017, and was (approved)(not approved)(repassed after disapproval) by the and was deemed adopted on 2017. Such local law was submitted to the people by reason of a (mandatory)(permissive) referendum and received the affirmative vote of a majority of the qualified electors voting thereon at the (general)(special)(annual) election held on 2012, in accordance with the applicable provisions of law.

4. (Subject to permissive referendum and final adoption because no valid petition was filed requesting referendum.)
I hereby certify that the local law annexed hereto, designated as local law No. ___ of 2017 of the (County)(City)(Town)(Village) of was duly passed by the on 2017, and was (approved)(not approved)(repassed after disapproval) by the and was deemed adopted on 2017. Such local law was subject to permissive referendum and no valid petition requesting such referendum was filed as of 2017, in accordance with the applicable provisions of law.

*Elective Chief Executive Officer means or includes the chief executive officer of a county elected on a county-wide basis or, if there be none, the chairman of the county legislative body, the mayor of a city or village, or the supervisor of a town where such officer is vested with the power to approve or veto local laws or ordinances.
5. (City local law concerning Charter revision proposed by petition.)

I hereby certify that the local law annexed hereto, designated as local law No. of 2017 of the City of having been submitted to referendum pursuant to the provisions of section (36)(37) of the Municipal Home Rule Law, and having received the affirmative vote of a majority of the qualified electors of such city voting thereon at the (special)(general) election held on 2017, became operative.

6. (County local law concerning adoption of Charter.)

I hereby certify that the local law annexed hereto, designated as local law No. of 2017 of the County of State of New York, having been submitted to the electors at the General Election of November 2017, pursuant to subdivisions 5 and 7 of section 33 of the Municipal Home Rule Law, and having received the affirmative vote of a majority of the qualified electors of the cities of said county as a unit and of a majority of the qualified electors of the towns of said county considered as a unit voting at said general election, became operative.

(If any other authorized form of final adoption has been followed, please provide an appropriate certification.)

I further certify that I have compared the preceding local law with the original on file in this office and that the same is a correct transcript therefrom and of the whole of such original local law, and was finally adopted in the manner indicated in paragraph , above.

VIA FIRST CLASS MAIL

RE: Brownfield Cleanup Program Application
Applicant: First Prize Development Partners, LLC
Site Name: First Prize Center Site
Site Address: 68 Exchange Street, Town of Colonie; Rear Russell Road, City of Albany; and Russell Road, City of Albany.

Dear Mr. Stanford:

We represent First Prize Development Partners, LLC in its anticipated Brownfield Cleanup Program application for the above-referenced site at 68 Exchange Street, Town of Colonie; Rear Russell Road, City of Albany; and Russell Road, City of Albany, Albany County, New York. It is a requirement of the NYS Department of Environmental Conservation that we supply it with a letter certifying that the local library is willing and able to serve as a public repository for all documents pertaining to the cleanup of this property. To avoid significant use of your shelf space, all documents will be sent in CD format.

Please sign below and return the original in the enclosed stamped self-addressed envelope if you are able to certify that your library would be willing and able to act as the temporary public repository for this Brownfield Cleanup Program project.

Thank you.

Sincerely,

KNAUF SHAW LLP

LINDA R. SHAW

Yes, the Town of Colonie Public Library is willing and able to act as a public repository for documents related to the cleanup of 68 Exchange Street, Town of Colonie; Rear Russell Road, City of Albany; and Russell Road, City of Albany, Albany County, New York under the NYS Brownfield Cleanup Program.

William K. Stanford
Branch Manager
