

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

Get site information faster and share it easily;

Receive information about all sites in a chosen county - read what you want, delete the rest;

It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Draft Investigation Work Plan for Brownfield Site Available for Public Comment

The public is invited to comment on a draft work plan being reviewed by the New York State Department of Environmental Conservation (NYSDEC) to investigate the 2424 Hamburg Turnpike site ("site") located at 2424 Hamburg Turnpike, Lackawanna, Erie County. Please see the map for the site location. Documents related to the cleanup of this site can be found at the location(s) identified below under "Where to Find Information."

Draft Investigation Work Plan

The draft investigation work plan, called a "Remedial Investigation Work Plan," was submitted to NYSDEC under New York's Brownfield Cleanup Program. The investigation will be performed by 2424 Hamburg Turnpike, LLC ("applicant(s)") with oversight by NYSDEC and the New York State Department of Health (NYSDOH).

How to Comment

NYSDEC is accepting written comments about the draft investigation work plan for 30 days, from **January 7, 2016** through **February 5, 2016**. The proposed plan is available for review at the location(s) identified below under "Where to Find Information." Please submit comments to the NYSDEC project manager listed under Project Related Questions in the "Who to Contact" area below.

Highlights of the Proposed Site Investigation

The investigation will define the nature and extent of contamination in soil, surface water, groundwater and any other parts of the environment that may be affected.

A remedial investigation will be completed across the Site to further assess potential impacts related to the historic use. The investigation will include the collection of soil, groundwater, and subslab vapor, indoor air and outdoor (ambient) air samples, which will be completed via excavation of exploratory test pits (TPs), the advancement of soil borings (SBs) and groundwater monitoring wells (MWs), as well as sub-slab sampling ports within the on-site building.

Next Steps

NYSDEC will consider public comments, revise the plan as necessary, and approve the work plan. NYSDOH must concur with the plan. The approved work plan will be made available to the public (see “Where to Find Information” below). After the work plan is approved, the activities detailed in the work plan will be implemented.

When the investigation is completed, a report will be prepared and submitted to the NYSDEC that summarizes the results. NYSDEC will review the report, make any necessary revisions and, if appropriate, approve the report.

After the investigation, a cleanup plan, called a “Remedial Work Plan” will be developed and a Decision Document will be proposed. The cleanup plan will include an evaluation of the proposed site remedy, or recommend a no action or no further action alternative. The goal of the cleanup plan is to ensure the protection of public health and the environment. NYSDEC will present the proposed cleanup plan to the public for its review and comment during a 45-day comment period. NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Background

Location:

The 2424 Hamburg Turnpike Site is located in a moderately developed mixed-use commercial, industrial and residential area of the City of Lackawanna, New York. The Site is located approximately 300 feet south of the intersection of Hamburg Turnpike and Holbrook Street.

Site Features:

The majority of the Site is covered with asphalt, concrete slabs and the existing buildings. The Site is currently unoccupied with two vacant commercial buildings consisting of a municipally condemned former automobile service building with four repair bays and eight (8) in-ground hydraulic lifts and one (1) shed with unknown contents.

Current Zoning and Land Use:

The Site is zoned mixed commercial and industrial. The Bethlehem Redevelopment area is located across the street to the west with residential properties located north and east of the Site beyond vacant/commercial properties.

Past Use of the Site:

The Site was utilized as an automobile filling and service station from 1957 to 1994. Three (3) 10,000-gallon underground storage tanks (USTs) associated with the filling station were closed/removed in 1994.

Site Geology and Hydrogeology:

Sub-surface soils generally consist of miscellaneous fill material varying in depth from 0-8 feet below ground surface (fbgs), overlying native soils consisting of clay, peat and sand to 16 fbgs. Groundwater was observed at approximately six (6) fbgs and flows westward towards Lake Erie.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's website at:

<http://www.dec.ny.gov/cfm/external/derexternal/haz/details.cfm?pageid=3&progno=C915296>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses.

A **brownfield** is any real property that is difficult to reuse or redevelop because of the presence or potential presence of contamination.

For more information about the BCP, visit: <http://www.dec.ny.gov/chemical/8450.html>
