EXECUTIVE SUMMARY

Brydges Engineering in Environment and Energy (BE3) completed a Phase I Environmental Site Assessment (ESA) for ten (10) separate parcels including: 23 and 31 East Huron Street; 264 Oak Street; 348, 357, 367, 375, 379, 383 and 391 Ellicott Street in the City of Buffalo, Erie County, New York (refer to attached figures in Appendix A) The Phase I was completed for **Douglas Development Corporation** in support of a due diligence property acquisition.

The properties are located less than a half mile southwest of City Hall. The elevation ranges from 640 to 606 feet above sea level sloping south-southwest. The general middle of the parcels is located at latitude 42° 53' 18.55" N; Longitude 78° 52' 14.49" W. The immediate area around the ten (10) properties is mainly commercial.

The Phase I ESA Practice E 1527-13 (ASTM Standard) meets the Environmental Protection Agency (EPA) All Appropriate Inquiries (AAI) rule requirements. This Phase I ESA meets the EPA AAI rule requirements. The goal of the process established by the ASTM Standard is to identify to the extent feasible pursuant to the ASTM process recognized environmental conditions relating to the property. The standard defines **Recognized Environmental Conditions (RECs)** as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property. A **Historical Recognized Environmental Condition (HREC)** is defined as a past release of any hazardous substances or petroleum products that has occurred relating to the property and has been addressed meeting the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by the applicable regulatory authority without any required controls in place. A **Controlled Recognized Environmental Condition (CREC)** is defined as a release that has been addressed but where the hazardous substances or petroleum products have been allowed to remain in place with controls. The standard also identifies **De Minimis Conditions**, which generally do not present a threat to human health or the environment and would not be the subject of an enforcement action (i.e., not RECs or CRECs). The non-scope considerations portion of the standard defines **Business Environmental Risks (BERs)** as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate.

In addition, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions - ASTM E 2600-10 - was also followed regarding Tier 1 vapor intrusion screening. Tier 1 is an initial screening which primarily includes a database review within certain search radii of the subject property to identify sites where the conditions are such that vapor intrusion may likely be an issue of concern in connection with the property.

All the properties are currently commercial buildings or asphalt parking lots located in the City of Buffalo. **A summary of each lot is as follows:**

23 East Huron Street -The 23 East Huron Street property is approximately 0.13-acres and is located at the western end of the group of ten properties. The property is immediately to the west of the 31 East Huron Street property. The property abuts East Huron Street and is currently the Burns Building. The Burns Building is a Class C office building that was completed in 1925. It was home to a fabrics company in 1930 (La France Industries Upholsters) and a photocopy company from 1955-1970 (Wilder Photocopy Co Inc.). it now has 121 office spaces for lease in the downtown buffalo neighborhood. East of the property is Ellicott Street and west is Washington Street.

31 East Huron Street -The 31 East Huron Street property is approximately 0.20-acres and is located immediately east of the 23 East Huron Street property and west of the Slyboots School of Music and Arts. The property is currently a parking lot that formerly contained a two-story commercial building. The city

directory shows a soft drink manufacturer (BRANDT Wm H soft drinks) located at this property starting in 1925.

264 Oak Street -The 264 Oak Street property is approximately 0.10-acres and is located east of the 383 Ellicott Street. The property is currently a one story storage warehouse. In 1904 this property was home to the Buffalo Turn Verein INC which hosted gymnastics until being moved to Ellicott Street in 1912. The 1925 Sanborn map shows the property as a sign making and printing company.

348 Ellicott Street -The 348 Ellicott Street property is approximately 0.04-acres and is located directly east of the 31 East Huron Street. The property is currently a three-story vacant building with a basement. The property was identified as Buffalo Advertising Artists from at least 1951 on historic Sanborn maps.

357 Ellicott Street -The 357 Ellicott Street property is approximately 0.08-acres and is located just south of the 367 Ellicott Street. The property is currently a two-story building used for storage of electrical equipment for the Simon Electric Co located at 367 Ellicott Street.

367 Ellicott Street -The 367 Ellicott Street property is approximately 0.06-acres and is located north of 357 Ellicott Street and south of 375 Ellicott Street properties. The property is currently a two-story building known as Simon Electric Company. Historic street directories identify this property as Simon Electric Construction Co Electric Controllers starting in 1935.

375 Ellicott Street -The 375 Ellicott Street property is approximately 0.05-acres and is located north of 367 Ellicott Street and south of 379 Ellicott Street. The property is currently a vacant asphalt covered parking lot. The property was identified as an Auto Parking Lot from at least 1951 on historic Sanborn maps.

379 Ellicott Street -The 379 Ellicott Street property is approximately 0.17-acres and is located north of 375 Ellicott Street and is south of 383 Ellicott Street. The property is currently occupied by a one story brick building. A service station/possible gas station (Ellicott Simonizing & Service Station) was identified on this property in historic street directories in 1935 and 1940. City records indicate that 379 Ellicott Street had a 1,200 and 1,100 gallon steel tank for gasoline storage.

383 Ellicott Street -The 383 Ellicott Street property is approximately 0.25-acres and is located north of 379 Ellicott Street, south of 391 Ellicott Street, and directly west of 264 Oak Street. The property is currently a stone and asphalt covered lot. A service station/possible gas station (Market Service Station) was identified on this property in historic street directories from 1935 through 1960. City records indicate that 383 Ellicott Street had three 1,000 and two 550 gallon steel tank for gasoline storage on site.

391 Ellicott Street -The 391 Ellicott Street property is approximately 0.10-acres and is located at the most northern end of all 10 properties, just north of the 383 Ellicott Street property. The property is currently occupied by the former Eden Lounge Nightclub building.

A more detailed summary of each property is covered in the body of the report.

Most of the adjacent and nearby area is and has been historically commercial. There were a number of gas stations/auto repair shops and a few historic dry cleaner's database reports for properties in the area.

Phase I ESA tasks included agency interviews, reconnaissance of the properties and general areas, and a review of government and historical records. A review of readily available government agency records was conducted by BE3 using the government records search firm, EDR. The typical ASTM search radius was altered for this Phase I ESA to accommodate the enlarged nature of the area. This was done by extending the area by using points near the farthest out properties to ensure proper coverage. A review of government records was performed. The subject property at 23 East Huron Street was identified as a steel engraving company in the 1925 City directory records (Michel Wiegand & Dougherty Inc). None of the

other subject properties were identified in the database search.

A review of governmental records of properties within the expanded ASTM radius indicated a total of (293) database records were found in the radius completed for the area. These include: two (2) SEMA-ARCHIVE sites; three (3) CORRACTS sites; four (4) RCRA-LQG sites; four (4) RCRA-SQG sites; nine (9) RCRA-VSQQ sites; three (3) NY SHWS sites; one (1) NY SWF/LF sites; thirty three (33) NY LTANKS sites; seventeen (17) NY UST sites; ten (10) NY AST sites; three (3) NY ENG CONTROLS sites; four (4) NY INST CONTROLS sites; seven (7) NY BROWNFIELDS sites; eight (8) US BROWNFIELDS sites; one (1) NY SWTIRE sites; twenty Four (24) NY SPILLS sites; forty four (44) RCRA NonGen/NLR sites; one (1) FINDS sites; one (1) ECHO sites; one (1) NY HSWDS sites; fifty (50) NY MANIFEST sites; one (1) PA MANIFEST sites, one (1) NJ MANIFEST sites; two (2) EDR MGP sites; forty (40) EDR HIST AUTO sites; and seventeen (17) EDR HIST CLEANER sites.

This Phase I ESA assessed the need for a vapor intrusion assessment (VIA) of the properties with regard to contaminants of concern (COC) that may migrate as vapors into existing or planned structures on a property. A vapor intrusion screen was performed using EDR's vapor intrusion database report and ASTM radius report as well as a review of the historical documentation. A report was generated for the areas described above (refer to Appendix E). The potential for vapor intrusion exists on the 379 and 383 Ellicott Street properties as they were identified as gasoline service stations in the street directories from 1935 through 1960. Also, other nearby property uses for cleaners or auto repair may result in vapor issues.

Findings Summary (note, these will be repeated in the conclusion section of this report)

This Phase I ESA was completed for ten (10) separate parcels including: 23 and 31 East Huron Street; 264 Oak Street; 348, 357, 367, 375, 379, 383 and 391 Ellicott Street in the City of Buffalo, Erie County, New York (refer to attached figures in Appendix A). The Phase I was completed for Douglas Development Corporation in support of a due diligence property acquisition.

BE3 did not find any records or make any observations indicating significant use or storage of petroleum or hazardous waste on the properties either currently or in the past other than on the 379 and 383 Ellicott Street properties. City records indicate that 379 Ellicott had a 1,200 and 1,100 gallon steel tank for gasoline storge, and 383 Ellicott had three 1,000 and two 550 gallon steel tank for gasoline storge on site.

With the possible exception of 379 and 383 Ellicott Street, the target properties are low risk in terms of environmental impairment based on past use, adjacent property use, and the physical setting. Nearby properties within the ASTM radius have been linked to petroleum storage or dry-cleaning but most are not believed to be impacting the subject properties because of distance or migration pathway gradient.

A lien search was only completed for one of the parcels (23 East Huron Street) at the request of the client. No environmental liens were identified for the 23 East Huron Street property. There is no indication based on historical records that any of these parcels are related to environmental cleanup or would indicate environmental liens.

Data Gaps

The ASTM standard requires that significant data gaps that affect the ability of the environmental professional to identify RECs be identified and that the sources of information that were consulted to address the data gaps be identified.

- Environmental Lien searches were not completed for nine of the properties at the client's request.
- FOIL Information has not been returned as of writing this.
- User questionnaires have not been returned as of writing this.

- Access inside structures located on the 379 and 391 Ellicott Street parcels was not available at this time

Conclusions/ Recommendations

BE3 has completed a Phase I ESA in conformance with the scope and limitations of the ASTM Practice E1527 for the identified set of properties located in the City of Buffalo, Erie County, New York. Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 1.5 and data gaps are identified above. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the properties except for the following:

- The 379 Ellicott Street property was identified as a gasoline and oil service station in historic street directories in 1935 and 1940. City records indicate that 379 Ellicott formerly had a 1,200 and 1,100 gallon steel tank for gasoline storage.
- The 383 Ellicott Street property was identified as a gasoline and oil service station in historic street directories in 1935 and 1960. City records indicate that 383 Ellicott had three 1,000 and two 550 gallon steel tank for gasoline storage on site.
- Nearby properties such as auto repair shops/fueling stations may have released petroleum or chemicals to the environment resulting in a plume and possibly vapor intrusion issues. These include historical auto repair and/or potential gas station use at 341 and 381 Ellicott Street, 25 East Huron Street, 262 Oak Street, and cloths cleaners at 352 Ellicott Street.

1.0 INTRODUCTION

1.1 PURPOSE

Brydges Engineering in Environment and Energy (BE3) completed a Phase I Environmental Site Assessment (ESA) for ten (10) separate parcels including: 23 and 31 East Huron Street; 264 Oak Street; 348, 357, 367, 375, 379, 383 and 391 Ellicott Street in the City of Buffalo, Erie County, New York (refer to attached figures in Appendix A which shows the parcel locations). The Phase I was completed for the **Douglas Development Corporation** in support of a due diligence property acquisition.

The properties are located less than a half mile southwest of City Hall. The elevation ranges from 640 to 606 feet above sea level sloping south-southwest. The general middle of the parcels is located at latitude 42° 53' 18.55" N; Longitude 78° 52' 14.49" W. The immediate area around the ten (10) properties is mainly commercial.

The ASTM standard practice defines a customary process for conducting an ESA on a parcel of commercial land with respect to CERCLA contaminants and petroleum products. Accordingly, the goal of the process is to identify recognized environmental conditions relating to the property through all appropriate inquiries into the current conditions and previous ownership and activities at the property and adjacent properties. The standard defines specific environmental conditions as follows:

Recognized Environmental Conditions (RECs) are defined in the ASTM Standard as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

Historical Recognized Environmental Condition (HREC) is defined as a past release of any hazardous substances or petroleum products that has occurred relating to the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, ICs, or ECs). Before calling the past release an HREC, it must consider if the past release is a REC at the time the current Phase I ESA (e.g., if regulatory criteria has changed).

Controlled Recognized Environmental Condition (CREC) is defined as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, ICs, or ECs).

The standard also identifies a **De Minimis Condition** as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs or CRECs.

The non-scope considerations portion of the standard also defines a **Business Environmental Risk (BER)** as a risk that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate.

1.2 PROPERTY LOCATION AND LEGAL DESCRIPTION

	ADDRESS	SBL	ACRES	OWNER
1	23 East Huron Street	111.46-8-1	0.130	Simon Reality Group LP
2	31 East Huron Street	111.46-8-2.1	0.209	Simon Bert W JR.
3	264 Oak Street	111.46-5-9	0.105	Simon Reality Group LP
4	348 Ellicott Street	111.46-8-5	0.042	Simon Reality Group LP
5	357 Ellicott Street	111-46-5-19	0.083	Simon Reality Group LP
6	367 Ellicott Street	111.46-5-20	0.049	Simon Reality Group LP
7	375 Ellicott Street	111.46-5-15.1	0.079	Simon Bert W JR.
8	379 Ellicott Street	111.46-5-23	0.172	Simon Bert W JR.
9	383 Ellicott Street	111.46-5-24	0.259	Simon Reality Group LP
10	391 Ellicott Street	111.46-5-25	0.180	Simon Reality Group LP

Refer to Section 4.3 for a more detailed parcel description and **Appendix I** for further assessment information on the parcels. See **Appendix A** for property location maps.

1.3 SCOPE OF SERVICES

The scope of services for this ESA was performed in accordance with American Society for Testing and Materials (ASTM) Standard E-1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" that incorporates the EPA All Appropriate Inquiries (AAI) rule and allows the user to qualify for landowner liability protections (LLPs). Specifically, the Phase I ESA included the following for the target properties and adjacent properties, as applicable:

- research of the current land-use within 0.5 mile of the site (see Section 3.0)
- identification of known environmental problems within 1 mile of the site (see Section 3.0)
- a property reconnaissance that included visual observations of site and surrounding area
- research conducted at municipal offices
- acquisition and review of aerial photographs and historic maps and information
- acquisition and review of available local, state and city records and documents
- completion of a vapor encroachment screen

1.4 SIGNIFICANT ASSUMPTIONS

The following items were assumed during the completion of this Phase I ESA:

- Information obtained from third parties is essentially complete and correct, or stipulated otherwise within the report;
- This report relates to assessment of environmental conditions on or affecting the subject parcel or parcels; and
- As applicable to a property transaction, an inquiry into the ownership and previous uses of the property will qualify an individual for one of the threshold criteria for satisfying the LLPs (assuming compliance with the other CERCLA elements of defense); in addition, an inquiry should not be construed as not 'all appropriate' because it did not identify a REC associated with the property.

1.5 LIMITING CONDITIONS, DEVIATIONS AND EXCEPTIONS

1.5.1 Limiting Conditions

This report is based on information from field reconnaissance and visual observations of the subject properties or parcels and the properties immediately surrounding; as well as interpretation of the available information and documentation reviewed and provided. The properties and this site assessment are limited to the footprint of the subject parcels. This report is intended for the sole use of the Douglas Development Corporation. The scope of services performed in this assessment may not be appropriate to satisfy the needs of other entities associated with the target properties, and any re-use of this document or the findings, conclusions, or recommendations presented, is at the sole risk of the user.

The conclusions set forth in this report are based upon and limited by the government data and other available information. As such and within the scope of the project, the accuracy of all data supplied by government entities and third parties could not always be verified. Therefore, we are not responsible for any conclusion contained in this report that is based on, in whole or in part, upon inaccurate data obtained from third parties.

It should be noted that all surface environmental assessments are inherently limited in the sense that conclusions are drawn, and recommendations developed from information obtained from limited research and site evaluation at a specific time. The passage of time may result in unknown site changes that have not been evaluated, and therefore a change in environmental circumstances at this site and surrounding properties or beneath the surface that may be present but undetectable during this Phase I ESA.

1.5.2 Deviations

As stated in the ASTM standard 1527-13, all appropriate inquiry does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained, or the time required to gather it outweighs the usefulness of the information. One of the purposes completing the Phase I ESA in accordance with the standard is to identify a balance between competing goals of limiting the costs and time demands inherent in performing ESAs and the reduction of uncertainty about unknown conditions resulting from additional information.

Professional legal or title insurance services are not provided by completing this document, and no guarantee explicit or implied has been made that the property assessment represents a comprehensive delineation of past site ownership or tenancy, land title, or lien records. The work performed in conjunction with this assessment and the data developed are intended as a description of available information at the dates and locations given.

Formal interviews of all state/local governments, occupants, owners, operators, and adjacent landowners were not conducted, and all adjacent structures or vacant properties were not observed/surveyed during the site reconnaissance as there were locations of inaccessibility. Based on the extent of the other information covered in this ESA, it is believed that the noted deviations do not impair the user's LLPs.

1.5.3 Exceptions

The only exceptions beyond the standard Phase I ESA scope that were assessed in this report include information provided on radon, mold, asbestos-containing materials, lead-based paint, and handling/disposal of PCB containing equipment. Additional considerations beyond the scope of this ASTM practice may be addressed in other documents, such as cultural and historic resources. The quality and quantity of material covered meets or exceeds the practice except where otherwise noted.

1.6 USER RELIANCE

This report is intended for the sole use of Douglas Development Corporation, who can use for reference and rely upon the information, findings, and conclusions contained in this report. Only at the user's request will this report be granted to other parties for reliance.

2.0 USER PROVIDED INFORMATION

If applicable and available to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the user must provide information for use in this report. Failure to provide available information could result in a determination that all appropriate inquiry is not complete. The user is defined as the party seeking to use Practice E 1527 to complete an ESA of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.

BE3 obtained information from EDR as well as various departments within the city. BE3 believes the information obtained during the Phase I ESA together with all other information assessed for this report qualifies the user for LLPs. However, at the request of the client, BE3 did not perform lien searches for 9 of the 10 parcels. User provided information is shown in **Appendices B and C**.

2.1 TITLE RECORDS

Land title records were not provided. A lien Search was completed for the 23 East Huron Street property through EDR. No environmental liens were identified on the parcel.

2.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien search was only obtained for 23 East Huron Street. Douglas Development Corporation was questioned regarding any Liens, AULs such as engineering controls, land use restrictions or institutional controls that are in place at the properties and/or have been filed or recorded in a registry under federal, tribal, state, or local law. No information was provided to BE3 concerning environmental liens or activity and use limitations for the subject property.

2.3 SPECIALIZED KNOWLEDGE

No additional specialized knowledge was indicated. The property user was questioned regarding any knowledge or experience of any environmental lien or AULs encumbering the property or in connection with the property or nearby properties. No environmental liens or activity and use limitations were reported for the subject property. No other information was provided to BE3 which would suggest environmental liens or AUL.

2.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Douglas Development Corporation was questioned regarding any knowledge of any commonly known or reasonably ascertainable information within the local community about the property that is material to recognized environmental conditions in connection with the property. No additional information was provided to BE3 concerning any recognized environmental conditions.

2.5 OTHER USER INFORMATION

This Phase I ESA is being performed for due diligence purposes and to obtain a certain degree of liability protection regarding business environmental risk as contractor for future site development. The user has provided additional records and information pertaining to the property.

3.0 RECORDS REVIEW

A summary of the ASTM record search is provided below and in **Appendix D** - Refer to page 2-16 of the radius reports.

3.1 STANDARD REGULATORY/TRIBAL ENVIRONMENTAL RECORDS

A review of government records was performed. The subject property at **23 East Huron Street** was identified as a Steel Engraving company in the 1925 City directory records (Michel Wiegand & Dougherty Inc). None of the other subject properties were identified in the database search. A review of governmental records of properties within the expanded ASTM radius indicated a total of (293) database records were found in the radius completed for the area. These include: two (2) SEMA-ARCHIVE sites; three (3) CORRACTS sites; four (4) RCRA-LQG sites; four (4) RCRA-SQG sites; nine (9) RCRA-VSQQ sites; three (3) NY SHWS sites; one (1) NY SWF/LF sites; thirty three (33) NY LTANKS sites; seventeen (17) NY UST sites; ten (10) NY AST sites; three (3) NY ENG CONTROLS sites; four (4) NY INST CONTROLS sites; seven (7) NY BROWNFIELDS sites; eight (8) US BROWNFIELDS sites; one (1) NY SWTIRE sites; twenty Four (24) NY SPILLS sites; forty four (44) RCRA NonGen/NLR sites; one (1) FINDS sites; one (1) ECHO sites; one (1) NY HSWDS sites; fifty (50) NY MANIFEST sites; one (1) PA MANIFEST sites, one (1) NJ MANIFEST sites; two (2) EDR MGP sites; forty (40) EDR HIST AUTO sites; and seventeen (17) EDR HIST CLEANER sites.

3.2 ADDITIONAL ENVIRONMENTAL RECORDS

3.2.1 City Offices

The City of Buffalo offices were visited and contacted through the FOIL process for this ESA as follows:

- City of Buffalo Fire Prevention Office: This office maintains information on USTs and fire code violations.
- City of Buffalo Assessors Office: Real property and assessment information was obtained online.
- City of Buffalo Building Department: This office maintains building and general files for these properties.

Records from the Buffalo Fire Prevention Office and Building Department pertaining to AST/USTs are reviewed in Section 4.3.3. City of Buffalo Department of Permits and Inspections Services was contacted via the FOIL process. City records revealed that the 379 Ellicott Street parcel formerly had a 1,200 and 1,100 gallon steel tank for gasoline storage and the 383 Ellicott Street parcel formerly had three 1,000 and two 550 gallon steel tank for gasoline storage on site. Refer to **Appendix E** for copies of the building permits, Fire Department records, and FOIL information obtained.

3.2.2 County Offices

County and City GIS was reviewed to obtain some information concerning parcels. County Assessment information was reviewed at the following web page: <http://gis1.erie.gov/GC/ErieCountyNY/default.htm>

Information obtained is presented in Section 1.2 and included in **Appendix I**.

3.2.3 New York State Department of Environmental Conservation

NYSDEC records were requested through their FOIL system. No records were obtained as of this writing; however, government and historical database records were obtained from a property due diligence service, which would contain the information available through FOIL. This information is provided in various sections in this report.

3.2.4 Previous Environmental Studies/Historical Data

BE3 was not provided with, and did not find any specific environmental reports or data on the properties beyond the historical information described in other sections of this report.

3.3 PHYSICAL SETTING SOURCES

Current and historical topographic maps that show the area of the target property were reviewed and are presented in **Appendix F**. These maps and the additional physical setting sources from the Radius Map Report provide details of geologic, hydrogeologic, hydrologic, and topographic characteristics of the target property and surrounding area to assess the impact of potential RECs relating to the target property.

3.3.1 Topography and Drainage

Property surface features and drainage were determined through a combination of site reconnaissance, previous environmental reports and a review of both aerial photographs and topographic maps.

The properties are generally flat and gently sloping south-southwest. Surface and shallow groundwater flow most likely has been impacted over time by the various developments and fills as well as foundations, street beds, and utility lines. Surface water is directed to City streets and low spots in properties. In general groundwater most likely flows southwest towards Lake Erie.

3.3.2 Site Geology and Hydrogeology

Hydrogeology. The project area is situated within the Erie Lake Plain physiographic province, one of the two physiographic provinces of Erie County (the Allegheny Plateau is the other). The lake plain province is located along Lake Erie and its topography is typical of an abandoned lakebed with little significant relief except for narrow ravines carved by the area's streams. Although the project area is relatively flat, this topography is not natural. The current landscape is a result of nearly two centuries of alteration and development.

Geology. The soils map of the City of Buffalo identifies this area as Urban Land (Ud). The term urban soil refers to soils in areas of high population density in the largely built environment. These soils can be significantly changed human-transported materials, human-altered materials, or minimally altered or intact "native" soils. Soils in urban areas exhibit a wide variety of conditions and properties and may have impervious surfaces, such as buildings and pavement.

3.3.3 Hydrology and Waterbodies

Various agencies are involved with wetlands and surface water bodies at the Federal and State levels, such as FEMA, NYSDEC, and US Fish and Wildlife. In general, vegetation and saturated soil are observed as critical items for sensitive areas, including the presence of hydric soils that are defined as soils saturated or

flooded at least one week during the growing season that develop anaerobic conditions. For the target property, no surface water bodies, or wetland areas are located within the property area. The nearest waterbody is towards Lake Erie about 0.75 miles southwest of the properties. Topography also suggests runoff generally flows towards the south-southwest and to adjacent streets and low spots on the property.

3.4 HISTORICAL USE INFORMATION

Several sources were used to develop a historical use profile for the property discussed in this report, and included:

- Aerial photographs
- Fire insurance or Sanborn maps
- Recorded land title records
- USGS topographical maps
- Local street directories
- Building department records
- Land/zoning use records
- Other sources from the NYSDEC or additional city departments

3.4.1 General Current Characteristics

The subject parcels located at 391, 379, 367, 357, 348 Ellicott Street; 264 Oak Street; and 23 East Huron Street are occupied by commercial buildings while the parcels located at 383, 375 Ellicott Street; and 31 East Huron Street are currently vacant former commercial parcels. 383 Ellicott Street was historically known as a gas station (Market Service Station) from 1935 through 1960s. City records indicate that 383 Ellicott Street had three 1,000 and two 550 gallon steel tank for gasoline storage on site. 379 Ellicott Street was historically known as a gas station (Ellicott Simonizing & Service Station) from 1935 to 1940. City records indicate that 379 Ellicott had a 1,200 and 1,100 gallon steel tank for gasoline storage. 367 Ellicott Street is currently occupied by a two story building known as Simon Electric Company and currently repairs and sells electric equipment. 357 Ellicott Street is currently a two-story building used for storage of electrical equipment for the Simon Electric Company located directly north. 348 Ellicott Street is currently occupied by a three-story vacant building with a basement formerly known as Buffalo Advertising Artists. 264 Oak Street is currently occupied by a one story storage warehouse. Located inside this storage warehouse was multiple drums which were empty with small amounts of residual oil in the bottom of them. 23 East Huron Street is currently the Burns Building which is a Class C office building that was completed in 1925. It was home to a fabrics company in 1930 (La France Industries Upholsters) and a photocopy company from 1955-1970 (Wilder Photocopy Co Inc.).

3.4.2 Target Property Use Summary

The target properties were previously commercial as noted above.

3.4.3 Adjacent Property Use

Most of the adjacent and nearby area is and has been historically commercial. There were a number of gas stations/auto repair shops and one historic dry cleaner's database report for properties in the area. Demolition of major buildings between 1951 and 1981 led to more parking lots. Public School Number 13 is located just northeast of the subject property at 264 Oak Street.

3.4.4 Aerial Photographs

Aerial Photographs for the following years were obtained from EDR, Bing and Google Maps:

1938, 1951, 1959, 1962, 1966, 1970, 1978, 1983, 1985, 1995, 2006, 2009, 2013, and 2017.

A review of street directories, Sanborn maps, and historical aerial photographs suggest that the properties were all commercial. Additional discussion on specific observations is described under Section 3.4.5 below. The aerial photographs are contained in **Appendix G**.

3.4.5 Sanborn Maps

Historical Sanborn maps and topographic maps of the area covering the properties were obtained through Environmental Data Resources, Inc. (EDR), an environmental risk management firm. Historical Sanborn maps for this property and adjacent properties were available for the following years: 1889, 1899, 1925, 1951, 1981, and 1986. Sanborn Maps are in **Appendix H**.

1889-1899 Sanborn Maps

The properties are all shown as commercial properties/structures. Public School Number 13 is located just northeast of the subject properties on Oak Street.

1925 Sanborn Map

Most of the parcels are commercial other than subject properties listed at 357 and 367 Ellicott Street. The 357 Ellicott Street property was known as the Huron Inn and the 367 Ellicott Street property was a residential loft. Other than 357 and 376 Ellicott Street all surrounding properties appeared commercial. Some of these commercial properties were jewelry manufacturing, printing and sign making companies, clothing manufactures, light manufactures, paint and varnish manufactures, garages, and Public School 13.

1951 Sanborn Map

Most of the parcels are commercial other than one of the subject properties listed at 367 Ellicott Street. Some commercial properties were demolished and now are parking lots and parking garages. Public School 13 still resides northeast of the target properties however it is now Central Continuation School.

1981-1986 Sanborn Map

Most of the parcels are commercial. Demolition of major buildings between 1951 and 1981 led to more parking lots. Central Continuation School still located northeast of target properties however, it is now referred to as Boys Vocational High School. Niagara Mohawk Power Corp Electric Building is now located on East Huron but most of the other manufacturing companies moved out.

3.4.6 Property Title, and Lien Information

Current/Recent Title and tax assessor information was reviewed online at the County and City web site. An environmental lien search was completed for 23 East Huron Street. No other lien or title information was obtained for the remaining parcels as requested by the client.

3.4.7 USGS Topographical Maps

BE3 obtained a series of historic topographic maps of the general area from EDR including ones from

2013, 1965, 1950, 1946-1949, 1901, and 1894. These maps do not offer any additional information concerning the properties.

3.4.8 Local Street Directories & Historical Use

Historic Street directories for the target properties were reviewed (see **Appendix J**). Some commercial uses included:

- 264 Oak Street was a new distributing company in 1935 and a vacant lot in 1985.
- 23 East Huron Street was a steel engravers in 1925 and Superior Printing Inc. in 1994.
- 31 East Huron Street was BRANDT Soft drinks in 1925.
- 348 Ellicott Street was a gas steam heating system distributor in 1925.
- 367 Ellicott Street was an electric construction and appliance company in 1935.
- 375 Ellicott Street was a liquid Veneer Corp polish manufacturer in 1930.
- 379 Ellicott Street was gas and service station in 1940 and Cellular telephones of WNY in 1992.
- 383 Ellicott Street was a garage company in 1930 and converted into a parking lot in 1935.
- 391 Ellicott Street was an electrical appliance company in 1946 and the Salvation Army in 1960.

A copy of street directories compiled by EDR is presented in Appendix F.

3.4.9 Building Department and Land/Zoning Records

Information from the City of Buffalo Permits and Fire Prevention Bureau Building Department were reviewed and offered information on gasoline storage tanks on the 379 and 383 Ellicott Street properties.

4.0 SITE RECONNAISSANCE

4.1 OBJECTIVES, OBSERVATIONS, AND METHODOLOGY

A site reconnaissance was conducted to inspect physical features and make general observations regarding the target property and vicinity with respect to the likelihood of identifying REC's. The following tasks were completed:

- visual inspection of the properties and surrounding properties was conducted to identify potential environmental impacts existing on the property or from adjacent areas;
- various property features were photographed as the accessible portions of the site were systematically walked to obtain as close to 100% coverage as possible; and
- visual surface observations were made to identify any evidence of spills, such as stained soil/concrete or vegetative stress;

The results of the reconnaissance are summarized below to provide a representation of property uses and conditions at the time of the site visit. Any limitations that existed during the reconnaissance such as physical obstructions were documented. A photographic record of the site visit is included in **Appendix K**.

4.2 GENERAL SITE SETTING

With the exception of a few parcels, the subject properties are typical commercial parcels in this section of the City of Buffalo which included mostly commercial manufacturing business in early 1900s.

4.3 SUMMARY OF EXTERIOR AND INTERIOR OBSERVATIONS

A brief description of the properties follows - please (refer to Photographs in Appendix K). A summary of observations and current conditions are summarized below. Note, there was some subsidence noted

across the properties indicating some C&D debris buried. The following is a summary of each property:

23 East Huron Street -The 23 East Huron Street property is approximately 0.13-acres and is located at the western end of the group of ten properties. The property is immediately to the west of the 31 East Huron Street property. The property abuts East Huron Street and is currently the Burns Building. The Burns Building is a Class C office building that was completed in 1925. It was home to a fabrics company in 1930 (La France Industries Upholsters) and a photocopy company from 1955-1970 (Wilder Photocopy Co Inc.). it now has 121 office spaces for lease in the downtown buffalo neighborhood. East of the property is Ellicott Street and west is Washington Street.

31 East Huron Street -The 31 East Huron Street property is approximately 0.20-acres and is located immediately east of the 23 East Huron Street property and west of the Slyboots School of Music and Arts. The property is currently a parking lot that formerly contained a two-story commercial building. The city directory shows a soft drink manufacturer (BRANDT Wm H soft drinks) located at this property starting in 1925.

264 Oak Street -The 264 Oak Street property is approximately 0.10-acres and is located east of the 383 Ellicott Street. The property is currently a one story storage warehouse. In 1904 this property was home to the Buffalo Turn Verein INC which hosted gymnastics until being moved to Ellicott Street in 1912. The 1925 Sanborn map shows the property as a sign making and printing company.

348 Ellicott Street -The 348 Ellicott Street property is approximately 0.04-acres and is located directly east of the 31 East Huron Street. The property is currently a three-story vacant building with a basement. The property was identified as Buffalo Advertising Artists from at least 1951 on historic Sanborn maps.

357 Ellicott Street -The 357 Ellicott Street property is approximately 0.08-acres and is located just south of the 367 Ellicott Street. The property is currently a two-story building used for storage of electrical equipment for the Simon Electric Co located at 367 Ellicott Street.

367 Ellicott Street -The 367 Ellicott Street property is approximately 0.06-acres and is located north of 357 Ellicott Street and south of 375 Ellicott Street properties. The property is currently a two-story building known as Simon Electric Company. Historic street directories identify this property as Simon Electric Construction Co Electric Controllers starting in 1935.

375 Ellicott Street -The 375 Ellicott Street property is approximately 0.05-acres and is located north of 367 Ellicott Street and south of 379 Ellicott Street. The property is currently a vacant asphalt covered parking lot. The property was identified as an Auto Parking Lot from at least 1951 on historic Sanborn maps.

379 Ellicott Street -The 379 Ellicott Street property is approximately 0.17-acres and is located north of 375 Ellicott Street and is south of 383 Ellicott Street. The property is currently occupied by a one story brick building. A service station/possible gas station (Ellicott Simonizing & Service Station) was identified on this property in historic street directories in 1935 and 1940. City records indicate that 379 Ellicott Street had a 1,200 and 1,100 gallon steel tank for gasoline storage.

383 Ellicott Street -The 383 Ellicott Street property is approximately 0.25-acres and is located north of 379 Ellicott Street, south of 391 Ellicott Street, and directly west of 264 Oak Street. The property is currently a stone and asphalt covered lot. A service station/possible gas station (Market Service Station) was identified on this property in historic street directories from 1935 through 1960. City records indicate that 383 Ellicott Street had three 1,000 and two 550 gallon steel tank for gasoline storage on site.

391 Ellicott Street -The 391 Ellicott Street property is approximately 0.10-acres and is located at the most northern end of all 10 properties, just north of the 383 Ellicott Street property. The property is currently occupied by the former Eden Lounge Nightclub building.

4.3.1 Treatment, Storage, or Disposal Facilities (TSDF)

Other than the 379 and 383 Ellicott Street properties, the target properties are not associated with a TSDF and no areas characteristic of the same were observed. City records indicate that 379 Ellicott had a 1,200 and 1,100 gallon steel tank for gasoline storage, and 383 Ellicott had three 1,000 and two 550 gallon steel tank for gasoline storage on site.

4.3.2 Hazardous Waste/Substances/Drums/Containers

No hazardous waste or substances were observed. See photos in **Appendix K**.

4.3.3 Aboveground/Underground Chemical/Petroleum Storage Tanks (AST/UST)

No evidence of AST/USTs were found during the site walk over. However, there are records of USTs as described in section 4.3 above.

4.3.4 PCB Containing Equipment

Buildings had florescent light fixtures which have been known to contain PCBs.

4.3.5 Stains, Spills, Stressed Vegetation

No stains/spills were noted.

4.3.6 Landfills/Dumping Activities/Solid Waste/Wastewater

There is no history or suggestion that any of the properties have been significantly filled, however, there may be C&D debris from the previous demolition of the former structures.

4.3.7 Pits, Sumps, and Wells

No Pits, sumps, or wells were observed in the areas walked during the site visit and there is not history or records of these associated with the properties.

4.3.8 Ponds and Lagoons

No ponds or lagoons are associated with the properties.

4.3.9 Coastal Areas

The properties are not associated with a coastal area.

4.3.10 Odors and Vapor Intrusion Assessment

Odor was not noted on the properties. A vapor encroachment screen is addressed below.

4.3.11 Potable Water Supply

Potable water supply is from the City of Buffalo.

4.3.12 Sewage Disposal System

Sewage is assumed to run to municipal combined sewer system.

4.3.13 Heating/Cooling

The buildings located on 391, 379, 367, 357, 348 Ellicott Street; 264 Oak Street; and 23 East Huron are assumed to be heated using a furnace. 383, 375 Ellicott Street; and 31 East Huron Street are currently vacant lots.

4.4 VAPOR ENCROACHMENT SCREEN

Vapor intrusion is an indoor air quality issue that develops when volatile chemicals from impacted soil or groundwater evaporate into the air of overlying buildings. This is very similar to the process through which naturally occurring radon gas seeps into structures and buildings. Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions - ASTM E 2600-10 is the guideline used to assess the need for a vapor intrusion assessment (VIA) of a property. The goal of a VIA is to identify whether a vapor intrusion condition (VIC) exists or is likely to exist on the property (i.e., presence or likely presence of a COC in indoor air from the vapor of a contaminated soil or groundwater at a concentration that presents or may present an unacceptable health risk to occupants). This should not include de minimis conditions that are trace concentrations or do not normally represent an unacceptable risk and that generally would not be subject of enforcement actions.

A vapor intrusion screen was performed using EDR's vapor intrusion database report and ASTM radius report as well as a review of the historical documentation. A report was generated for the areas described above (refer to Appendix E). The potential for vapor intrusion exists on the 379 and 383 Ellicott Street properties as they were identified as gasoline service stations in the street directories from 1935 through 1960. Also, some other nearby property uses for dry cleaners or auto repair may result in vapor issues.

5.0 INTERVIEWS CONDUCTED

5.1 OWNER

Many discussions were conducted regarding the property with **Douglas Development Corporation** and the organization was given a detailed questionnaire (refer to **Appendix C**).

5.2 SITE MANAGER

Douglas Development Properties

5.3 OCCUPANTS

See Above

5.4 LOCAL GOVERNMENT OFFICIALS

Information was obtained from the city, state and county representatives as summarized in Section 3.2. Additional information will be amended to this report as appropriate and as further obtained from City and County personnel.

5.5 OTHERS/ADJACENT PROPERTY OWNERS

Owners and owner's representatives of adjacent properties were not contacted. Adjacent properties were commercial. Due to the nature of the types of adjacent properties and the past and current use of the property as well as the property size, no adjacent property individuals or other individuals were interviewed.

6.0 FINDINGS, OPINIONS, AND CONCLUSIONS

This Phase I ESA was completed for ten (10) separate parcels including: 23 and 31 East Huron Street; 264 Oak Street; 348, 357, 367, 375, 379, 383 and 391 Ellicott Street in the City of Buffalo, Erie County, New York (refer to attached figures in Appendix A). The Phase I was completed for Douglas Development Corporation in support of a due diligence property acquisition.

BE3 did not find any records or make any observations indicating significant use or storage of petroleum or hazardous waste on the properties either currently or in the past other than on the 379 and 383 Ellicott Street properties. City records indicate that 379 Ellicott had a 1,200 and 1,100 gallon steel tank for gasoline storage, and 383 Ellicott had three 1,000 and two 550 gallon steel tank for gasoline storage on site.

With the possible exception of 379 and 383 Ellicott Street, the target properties are low risk in terms of environmental impairment based on past use, adjacent property use, and the physical setting. Nearby properties within the ASTM radius have been linked to petroleum storage or dry-cleaning but most are not believed to be impacting the subject properties because of distance or migration pathway gradient.

A lien search was only completed for one of the parcels (23 East Huron Street) at the request of the client. No environmental liens were identified for the 23 East Huron Street property. There is no indication based on historical records that any of these parcels are related to environmental cleanup or would indicate environmental liens.

Data Gaps

The ASTM standard requires that significant data gaps that affect the ability of the environmental professional to identify RECs be identified and that the sources of information that were consulted to address the data gaps be identified.

- Environmental Lien searches were not completed for nine of the properties at the client's request.
- FOIL Information has not been returned as of writing this.
- User questionnaires have not been returned as of writing this.
- Access inside structures located on the 379 and 391 Ellicott Street parcels was not available at this time

Conclusions/ Recommendations

BE3 has completed a Phase I ESA in conformance with the scope and limitations of the ASTM Practice E1527 for the identified set of properties located in the City of Buffalo, Erie County, New York. Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 1.5 and data gaps are identified above. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the properties except for the following:

- The 379 Ellicott Street property was identified as a gasoline and oil service station in historic street directories in 1935 and 1940. City records indicate that 379 Ellicott formerly had a 1,200 and 1,100 gallon steel tank for gasoline storage.

- The 383 Ellicott Street property was identified as a gasoline and oil service station in historic street directories in 1935 and 1960. City records indicate that 383 Ellicott had three 1,000 and two 550 gallon steel tank for gasoline storage on site.
- Nearby properties such as auto repair shops/fueling stations may have released petroleum or chemicals to the environment resulting in a plume and possibly vapor intrusion issues. These include historical auto repair and/or potential gas station use at 341 and 381 Ellicott Street, 25 East Huron Street, 262 Oak Street, and cloths cleaners at 352 Ellicott Street.

7.0 NON-SCOPE SERVICES

7.1 Radon

Radon is a naturally occurring radioactive gas that is a daughter product within the uranium-238 decay chain and has been associated with increased risk of developing lung cancer. It is colorless, odorless, and tasteless and can be found in high concentrations in soils and rock in the subsurface. Radon can migrate through small fractures into structures through floors and walls, drains, sump pipes and pores. The concentrations that occur within structures are dependent upon source quantity, radioactive decay, and ventilation.

Surveys across the US indicate that as many as 21 percent of homes may exceed the maximum radon level suggested by the U.S. Environmental Protection Agency (EPA). Exposure levels can be quite variable depending on the amount of time spent in the home and the percentage of that time spent in the high-radon areas. Outdoor concentrations of radon gas tend to be minimal. Radon exposure is typically measured in picocuries per liter (pCi/L). The EPA and NYSDOH strongly recommend that property owners take remedial action if the levels recorded are higher than 4 pCi/L.

The subject properties are located within the City of Buffalo, Erie County, New York. As of December 2020, The New York State Health Department reports that a total 1093 homes have been screened for radon in the City of Buffalo. The average radon level in the City of Buffalo is reported as 1.14 pCi/L. Further, only 1,048 of the homes screened were less than 4 pCi/L, 53 had levels from 4 to 20 pCi/l and only 3 were greater than 20 pCi/L. (source: www.health.state.ny.us/nysdoh/radon/towns.htm)

7.2 Mold

Mold can germinate and colonize when a food source (drywall, wood, insulation, paper, etc.) is present accompanied by ideal temperatures and moisture content. Structural leaks often lead to accelerated mold growth, and the odor commonly associated with mold is from Microbial Volatile Organic Compounds (mVOCs). Some mold produces various mycotoxins that are considered toxic and may have negative health effects on humans.

The buildings located on 391, 379, 367, 357, 348 Ellicott Street; 264 Oak Street; and 23 East Huron have the potential for mold growth however it was not observed. 383, 375 Ellicott Street; and 31 East Huron Street are currently vacant lots.

7.3 Asbestos Containing Material/Lead-Based Paint

Asbestos is a naturally occurring material fiber that was once widely used in building materials and products for its thermal insulating properties and fire resistance. EPA defines asbestos- containing material (ACM) as material that contains more than 1% asbestos.

Lead is a soft, bluish metallic element that has been used in a variety of products. According to EPA, paint manufacturers frequently used lead as a primary ingredient in many oil-based interior and exterior house paints through the 1940s and generally decreased its use in the 1950s and 1960s as latex paints became more wide-spread. The federal Department of Housing and Urban Development (HUD) estimated that 75 percent of the houses built in the United States before 1978 contain some lead-based paint. Lead from paint, chips, and dust can pose health hazards if not properly managed.

There buildings located on 391, 379, 367, 357, 348 Ellicott Street; 264 Oak Street; and 23 East Huron. Since they were built before 1978 there is potential it has asbestos containing material and lead- based paint. 383, 375 Ellicott Street; and 31 East Huron Street are currently vacant lots

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in 312.10 of 40CFR312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the target property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Peter J. Gorton, MPH, Certified Hazard Control Manager Masters Level **Date** 11/10/2021
Total Years of Environmental Work Experience – Over 30

In accordance with the ASTM Standard, A Phase I Environmental Assessment must be performed by an environmental professional meeting certain minimal requirements. BE3 credentials far exceed these minimum credentials. Resumes for individual that developed this Phase I Environmental Assessment are provided in **Appendix M**.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 8 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
C F C CORP 23 E HURON ST BUFFALO, NY 14203	RCRA NonGen / NLR EPA ID:: NYD054093208 FINDS Registry ID:: 110004359426 ECHO Registry ID: 110004359426 NY MANIFEST EPA ID: NYD054093208	NYD054093208

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BUFFALO NE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
10	1/2 - 1 Mile WNW	N
2G	1/2 - 1 Mile WNW	N

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 54 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Urban

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 54 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of BE3 on May 24, 2021.

TARGET PROPERTY

23 East Huron
Buffalo, NY 14203

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by BE3 were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

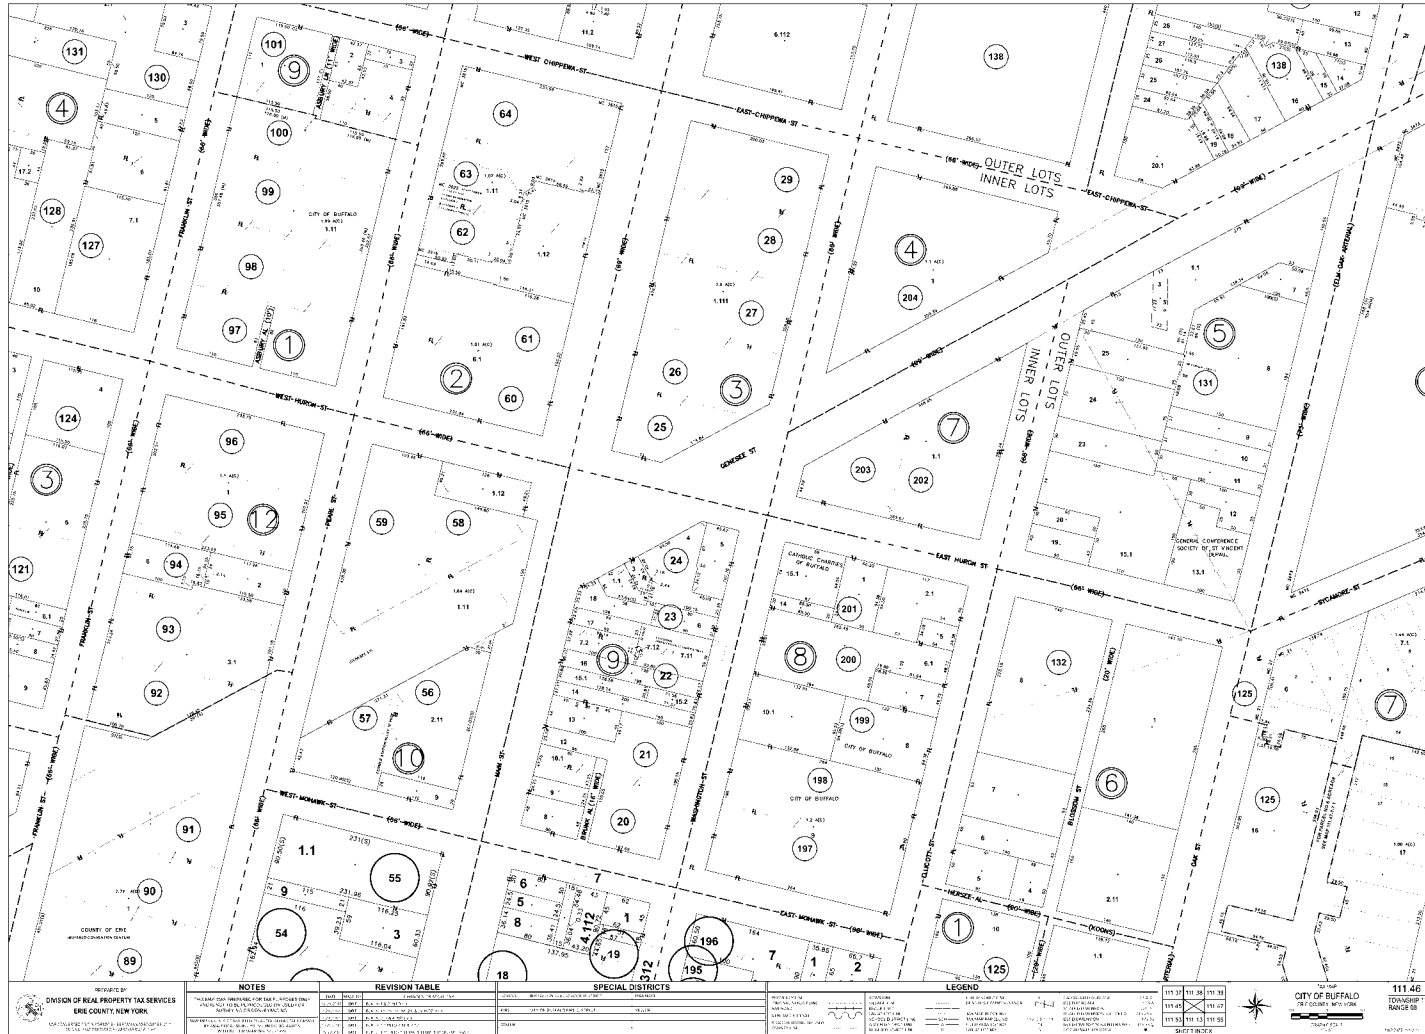

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1925 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Update By: MLDOSTER
Site Description: "The site was a parking lot connected to an office building located at 535 Washington Street, City of Buffalo, Erie County, New York. The site is located in downtown Buffalo. Petroleum Bulk Storage (PBS) registration information currently consists of two, 275 gallon above ground storage tanks (AST) containing fuel oil, and one 800 gallon diesel fuel AST. Historically, three underground storage tanks (UST) were located beneath the parking area of the east side of the Electric Building. The three tanks were removed from the site nearly 10 years ago. During a previous Phase II investigation petroleum

MAP FINDINGS

ELECTRIC TOWER, 535 WASHINGTON STREET, BUFFALO, NY 14203 (Continued)

contaminated soil was detected in the location of the removed USTs.

The open spill number for this site is 0311417. A cleanup was conducted in 2005. The spill was made inactive on June 29, 2005. The site was not accepted into the Brownfield Cleanup Program."

Env Problem: "The primary contaminants are petroleum contaminated soils which contain Volatile Organic Compounds (VOCs) and Semi-Volatile Organic Compound (SVOCs) that exceed guidance values. There is no evidence of off site migration of contaminants."

DEC Region:	9
DER Facility ID:	259271
DEC Memo:	<p>"Prior to Sept, 2004 data translation this spill Lead_DEC Field was JDC 7/2/96: JDC ON SITE AND MET W/ MR DENNIS GARRISON, AND JOHN ORTLANI OF CARTON-CRAFT. ENASCO HIRED TO OVERSEE TANK REMOVAL, PHIL HERTEL ON SITE. INSPECTED TANK AREAS AND FOUND SOME MINOR EVIDECE OF PETROLEUM CONTAMIATION TO FUEL OIL TANK AREA. ISO/ ACETONE EXCAVATIONS WERE FREE OF ANY FIELD DETECTABLE CONTAMINATION. SOILS BEING REMOVED FROM FUEL OIL EXCAVATION FOR DISPOSAL. ANALITICAL WILL INCLUDE 8270 AND 8240 FOR POST TEST. 7/2/96: MEMO WRITTEN TO PETER BEUCHI TO FOLLOWUP ON SITE INVESTIGATION PER ACETONE CONTAMINATION POTENTIAL. 8/23/96: TANK CLOSURE REPORT INDICATED HIGH LEVELS OF ACETONE AND TEX CONTAMIONATION. TELCON W/ PHIL HERTEL AND DENNIS GARRISON AND REQUESTED SITE BE RESAMPLED. 9/6/96: JDC TELCON W/ DENNIS GARISON AND CONFIRMED RESAMPLING BE DONE. SPOKE MARTY DOSTER, HAZ. WASTE REMEDIATION AND CONFIRMED A BASE LEVEL FOR CONTAMIATION W/ ACETONE OF 1PPM. 11/26/96: REVIEWED FILE AND FOUND RESAMPLE RESULTS FOR ACETONE EXCAVATION AT NON-DETECT. NO FURTHER ACTION SITE IS CLOSED. 9/21/01: MLD: Trustee for the bankruptcy submitted report by RSV Engineering which found acetone in soil and groundwater (B-2). 12/3/01: MLD: Telecon with Trustee - DEC advised trustee that additional study of groundwater is required. DEC suggested the VCP. 2/27/02: MLD: Telecon trustee - he has hired GeoMatrix to do additional study. 5/7/02: MLD: Newspaper article citing bankruptcy and closure of facility. 5/15/02: MLD: DEC rec'd report by GeoMatrix. Groundwater away from source area shows minimal impacts from acetone. Some soil contain acetone at levels twice industrial SCOs. "</p>

MAP FINDINGS

AEN PROPERTIES, 115 ASH ST, BUFFALO, NY 14202 (Continued)

Manifest Ref Number:	Not Reported
Alt Facility RCRA ID:	Not Reported
Alt Facility Sign Date:	Not Reported
MGMT Method Type Code:	Not Reported
Waste Code:	U002 - ACETONE
Waste Code:	Not Reported
Waste Code:	Not Reported
Waste Code:	Not Reported
Waste Code:	Not Reported
Waste Code:	Not Reported
Quantity:	79940
Units:	P - Pounds
Number of Containers:	001
Container Type:	DT - Dump trucks
Handling Method:	L Landfill.
Specific Gravity:	01.00

Environmental Professional Qualifications

PETER J. GORTON
Senior Scientist
Senior Hazardous Waste Specialist
Partner

EDUCATION

M.P.H., Public Health/Environmental Health/Science, Yale University School of Medicine, Department of Epidemiology and Public Health, 1979
B.S., Environmental Science, University of Massachusetts, 1977

SUMMARY OF QUALIFICATIONS

As a senior environmental scientist and project manager, Mr. Gorton's main duties include developing/managing field projects and performing hazardous and mixed waste assessments for the private sector as well as government clients over a broad spectrum of environmental-related disciplines which include industrial and hazardous waste remediation, Brownfield investigation and remediation, forensic assessments, health and safety, regulatory compliance, waste management, project management, spill response, erosion control, industrial hygiene, and preparation of procedures, plans, and manuals required to support all of the above areas. Mr. Gorton is also involved with remedial planning and innovative technologies.

Mr. Gorton has been involved with numerous recent construction and Brownfields projects which have included developing site and soil management plans, remedial investigations/alternative development and remedial actions. These projects have ranged from single parcels to projects involving the re-development of multiple city blocks and diverse geographic areas such as waterfront renewal areas and rural commercial/agricultural areas. This has resulted in extensive experience in the environmental review for a diverse set of projects.

Mr. Gorton has completed Brownfields assessments under both the New York State Bond Act and U.S. Environmental Protection Agency (USEPA) guidance and requirements; Conducted numerous cost-effective UST closure and remedial programs and performed forensic assessments for various clients.

EMPLOYMENT CHRONOLOGY

Brydges Engineering in Environment and Energy/Panamerican Environmental – 1997-Present - Partner

DAMES & MOORE, 1989-1996 - Project Manager and Group Manager for Facility Assessment/Geotechnical Services at the West Valley Demonstration Project (WVDP), West Valley, New York.

CAMP, DRESSER & McKEE, 1984-1989 - Field Investigation Manager and Regional Health & Safety Supervisor, Edison, New Jersey; New York, New York; and Western New York Operations.

ECOLOGY AND ENVIRONMENT, INC., 1979-1984 - Assistant Corporate Health and Safety Director and Hazardous Waste Team Member, Cheektowaga, New York.

PROJECT SPECIFIC EXPERIENCE

BRYDGES ENGINEERING IN ENVIRONMENT AND ENERGY/PANAMERICAN ENVIRONMENTAL Project Experience

Completed numerous petroleum spill investigations and remedial actions and functioned as lead scientist on a number of environmental forensic investigations at petroleum spill sites including program management, field assessment, historic data assessment and interpretation, report preparation, and developed expert briefs for legal cases.

Mr. Gorton has performed training on Phase I and Phase II environmental assessments under a USEPA Brownfields training grant in association with the University of Buffalo.

Mr. Gorton has been the Project Manager and/or lead investigation/field remedial manager for numerous Brownfield Investigation/Remediation Projects - BCP Projects – from and including application through remediation and certificate of completion (COC) including:

- Remington Rand/Remington Lofts (Site # C932142) – North Tonawanda, NY
- Former Crescent Puritan Laundry - 1630 Dewey Avenue (Site # C828163) – Rochester, NY
- 600 River Road Apartments (Site #C932161)– North Tonawanda, New York
- 4630 River Road Site (Site #C915258)– Tonawanda, New York
- 31 Tonawanda Street (Site #C915299) – Buffalo New York
- 68 Tonawanda Street (Site #C915316) – Buffalo New York
- 57-71 Tonawanda Street (Site #C915024) – Buffalo New York
- Main & Hertel (Site #C915318) – Buffalo New York
- 31 Water Street - Gateway Lofts (Site #C907046) – Jamestown New York
- Hawkeye Site (Site #C828203) Rochester NY
- Former Buffalo Forge Property (Site # C915280) Buffalo New York

Mr. Gorton was the Project Manager and/or lead investigation/remediation field manager for the following New York State Environmental Restoration Projects (ERP Program):

- 90 Hopkins Street (Site Number: E915181) – City of Buffalo
- Bush Industries (Site Number: E905029) – Village of Cattaraugus
- Former Randolph Foundry Site (Site Number: E905030) – Cattaraugus County

Mr. Gorton completed the following USEPA Brownfield Program Sites – Phase I and/or Phase II (selected sites – many more not listed) Site Assessments:

- Amadori Project Site Property, City of Lackawanna, New York

- Village Farm Site, South Park, Buffalo, New York
- Hazorb Site Property, City of Niagara Falls, New York
- Maryland/James Site property in the City of Niagara Falls, New York
- Union Carbide facility at 3625 Highland Avenue, Niagara Falls , New York
- 240 Kensington in the City of Buffalo, Erie County, New York
- Fargo Electric - 487-503 Seneca Street in the City of Buffalo
- 237 Kensington Avenue - Trinidad Park, City of Buffalo
- Former Lakefront Recycling, located at 2 North Steelawanna Street in the City of Lackawanna
- Friendship House - Former Spanish Club and located at 231 Ridge Road City of Lackawanna,
- Friendship House - Main Building, located at 100 Dona Street in the City of Lackawanna
- Former 39th Street Property, City of Niagara Falls
- Six Properties Along Buffalo Ave, Niagara Falls, New York

Mr. Gorton was the project manager and/or lead field investigation/assessment manager for the following Niagara County Specific EPA Brownfield Projects

- Phase Is for 4250 Witmer Road (Satarian Auto), Town of Niagara, New York
 - 4010 Lake Avenue (DeeJays), Town of Lockport, NY;
 - 2710 Main Street, Newfane, New York
 - Phase I/II for Commerce Square in Lockport,
 - Phase I at Gateway Point in North Tonawanda as well as
 - Phase I on the Krug Glazing property,
 - Phase I and II at the Competition Transmission
 - Phase I at the City Incinerator Building sites in the City of North Tonawanda;
 - Phase Is and Phase IIs at the 8101 and 7989 State Street properties in Royalton,
 - Phase I at the 39th Street School property;
 - A detailed Phase I and II at the Village Farm site;
 - Phase II at 4435 Military Rd site; and
 - Detailed Phase I on Tonawanda Island
-
- Brownfield Site Investigation and Remedial Alternatives, Design and Construction Oversight services for the Former Randolph Foundry Site - -Environmental Restoration Program Project - Cattaraugus County - ongoing
 - Brownfields Site Investigation/Remedial Alternatives Report and Design-Village of Cattaraugus -Environmental Restoration Program Project. For the Former Bush Site, Cattaraugus, New York - Villages of Cattaraugus - complete
 - Brownfields Site Investigation - Interim Remedial Measure and Remedial Alternative Report at 90 Hopkins Street in the City of Buffalo, New York - City of Buffalo - ongoing
 - Brownfields Site Investigation - Interim Remedial Measure and Remedial Alternative Report Trinidad Park in the City of Buffalo, New York - City of Buffalo - complete
 - Amadori Property Brownfields SI/RAR City of Lackawanna, New York - complete
 - Fargo Electric Brownfied Site Investigation/Remediation - City of Buffalo, New York - completed

- Maryland Ave. Brownfield SI/RAR - City of Niagara Falls, New York - completed
- Union Carbide Environmental Investigation Niagara Falls, New York City of Niagara Falls - completed
- Environmental Assessment - 240 Kensington in the City of Buffalo, Erie County, New York - City of Buffalo - completed.
- Niagara Strategic Brownfields Waterfront Plan - Niagara County - completed
- Phase I and Phase II Environmental Site Assessments (ESAs) for Brownfields Showcase Community Sites - Niagara County - completed
- Phase II Environmental Site Assessment Village Farm Site, City of Buffalo, New York - Niagara County - ongoing
- Phase I and Phase II Site Assessment - Triangle Area Site, Tonawanda, New York - Niagara County - completed
- Site Investigation / Remedial Program at the Zurbrick Road Site in Depew, New York - Village of Depew - completed
- Environmental Assessment, Sycamore/Jefferson Block - City of Buffalo – completed

Affordable Housing Projects

Mr. Gorton was the Project Manager and/or the lead field investigation/site assessment manager for numerous New York State Homes and Community Renewal (HCR) state affordable housing projects or other affordable housing projects across New York State:

Dunkirk Renovation and Ownership Program (SHARS Number: 20166046) – Mr. Gorton was the project manager and lead investigation/site assessment manager for Southern Tier Environments for Living (STEL, Inc.) affordable housing project in Dunkirk, New York. This project involved completing Phase I and specific Phase II Environmental Site Assessments for thirty five (35) scattered properties located in Dunkirk, New York. Mr. Gorton has also provided ongoing environmental technical consultation with regard to New York State Homes and Community Renewal (NYSHCR) requirements.

Mr. Gorton completed a Phase I ESA (ESA) for 414 Lake Street, Elmira, New York for Southern Tier Environments for Living (STEL, Inc.), Mid South Retirement Services, LLC and the Salvation Army. The total property is approximately 2.10 acres and contains a large 3-4-story main building, and two separate small two-story structures. The Phase I ESA was completed as part of a due diligence review in accordance with the Phase I Environmental Site Assessment Practice E 1527-13 (ASTM Standard). Phase I ESA tasks included interviews (when possible), reconnaissance of the property and general area, and a review of government and historical records.

Mr. Gorton completed a Phase I and Phase II Environmental Site Assessment for two adjacent properties - 382 Genesee and 117 Cherry Streets, Buffalo NY for Southern Tier Environments for Living (STEL, Inc.) and Evergreen Health. The purpose of the assessment was to obtain information and data for use in a NYSDEC Brownfields Cleanup Program (BCP) application.

Mr. Gorton completed a detailed Phase I ESA and follow-up staff oversight and OA/OC for the the Gateway Lofts Brownfields project, This is a multifamily affordable housing project located

at 31 Water Street, Jamestown, New York. The project will include 74 units of housing, 25 of which will be specifically set aside for homeless households who are also persons with a serious mental illness and/or substance use disorder who have a history of criminal offending or are at risk of offending. The project was for Southern Tier Environments for Living (STEL, Inc.) and Community Helping Hands.

Phase I Environmental Site Assessment - 77 Parcels - La Marketa Project Area, Rochester New York. Mr. Gorton completed a detailed Phase I ESA in three separate reports for the Ibero-American Development for 77 former residential /commercial scattered in the City of Rochester. Mr. Gorton supported the resulting Phase II ESA assessment completed on these properties.

School 57 – Mr. Gorton completed a Phase I Environmental Site Assessment (ESA) was completed for thirty-four separate (34) separate parcels including School 75 and various separate parcels surrounding the school.

AD Price – Mr. Gorton completed A Phase I and Phase II Environmental Site Assessment (ESA) for Norstar USA and the Buffalo Housing Authority on 35 parcels on Jefferson Avenue, Peckham Street, Spring Street; and Madison Street, in the City of Buffalo, Erie County, New York for a Norstar Development USA affordable housing project. A Phase II ESA was completed on selected properties including a UST and petroleum removal and vapor intrusion studies for residential re-development.

Shoreline Apartments/Waterfront/Niagara Square, Niagara Street, Buffalo, New York – Mr. Gorton completed Phase I and Phase II ESA, a Soils Management Plan (SMP) and SMP oversight including community air monitoring at the Shoreline/Waterfront/Niagara Square project for Norstar Development USA.

The Unity Park II Apartments development project located at Ninth Street, north of Garden Avenue Inn the City of Niagara Falls, New York. Mr. Gorton completed Phase I and Phase II ESA, a Soils Management Plan (SMP) and SMP oversight including community air monitoring and construction inspection. The project encompassed approximately 10-acres of former rail land that include soils elevated in PAHs and metals. The redevelopment project included the demolition of six existing apartment buildings and the importation of clean soil to construct new buildings.

Phase I-III Environmental Site Assessment (ESA) Center Court Hope VI project area , City of Niagara Falls, New York. Mr. Gorton was the Project manager and lead field person responsible for completing Phase I, Phase II and Phase III Environmental Assessment for the property within the Center Court Hope VI project area in the City of Niagara Falls, Niagara County, New York. The ESA was completed for Norstar Development USA, L.P. for affordable housing re-development. The environmental assessments completed on the property indicate that some soil has elevated levels of a few PAHs and metals above restricted residential use SCOs. To complete re-development of the property, Mr. Gorton developed a detailed Soils Management Plan that was reviewed and approved by the NYSDEC, NYSDOH, Niagara County of Health and other project stakeholders. The purpose of this SMP is to provide soil management strategies based on provisions of the ECL governing the remediation of Brownfields sites to

support protection of human health and the environment during re-development construction activities and during future use of the property.

Projects for Transportation Projects

Mr Gorton completed numerous project for the Niagara Frontier Transportation Authority (NFTA). Specific NFTA past projects include:

- Updated Spill Prevention Plans for various NFTA locations for 2013 and 2016
- St Gobain Property - an in-depth Environmental Due Diligence Review of the St Gobain Property at the Niagara Falls International Airport, Niagara Falls, New York
- Buffalo Airport Generic Environmental Assessment NEPA/SEQRA/FAA and Final Baseline Environmental Data Report Buffalo Niagara International Airport, Cheektowaga, New York
- Generic Environmental Impact Assessment (NFIA-EIA) Niagara Falls International Airport, Niagara Falls, New York
- Niagara Falls Transportation Center (NFITC) - NFTA Bus Terminal – NEPA scoping support
- FAA Environmental Evaluation Form AC@ - Airport Commerce Park, 455 Cayuga Road, Buffalo Niagara International Airport, Cheektowaga, New York
- John's Flaming Hearth Restaurant Phase I Environmental Assessment, Pre-Demolition Asbestos Survey and Follow-up Subsurface Assessment
- Phase II Surface Soil Assessment - 925 66th Street, Factory Outlet Blvd., Niagara Falls, New York
- Phase II Sub-Surface Soil Sampling - Former Johnson Building Site -Three-Acre Property Located at 925 66th Street, Factory Outlet Blvd., Niagara Falls, New York
- Phase I Environmental Site Assessment (ESA) for the property located at 485 Cayuga Road in the Town of Cheektowaga, Erie County, New York.
- Phase I Environmental Assessmentc Filbin Building- 901 Fuhrmann, Buffalo, New York
- A Phase I Environmental Site Assessment (ESA) and Asbestos pre-renovation inspection for the Condor Aviation Site located at the Niagara Falls International Airport
- Sub-Surface Soil Sampling - Grossman's Building Supply Facility Site - 4.5-Acre Property Located at 2250 Third Avenue Street, Factory Outlet Blvd., Niagara Falls, New York

- Phase I Environmental Assessment of 30.2-Acre Property West of Niagara Falls Airport Runway Between Young, Porter and Packard Roads

Environmental Forensic Assessments - Petroleum Spill and Tank Closure Projects

DAMES & MOORE PROJECT EXPERIENCE - 1989-1996

Mr. Gorton was the Project and Group Manager for Facility Assessment/Geotechnical Services at the West Valley Demonstration Project (WVDP), West Valley, New York. As manager, responsibilities were to provide environmental assessment and geotechnical services for the West Valley Nuclear Services Company (WVNS), a wholly owned subsidiary of Westinghouse Electric Corporation. Duties included site characterization, assessment, environmental compliance, data evaluation, mixed waste sampling and management programs, pathway assessment, health and safety, real time air monitoring, procedure and plan development, and program management including budget and schedule management.

Selected projects are provided below:

Managed and assisted in the preparation of numerous sampling and analysis plans and data quality objectives (DQOs) for environmental assessments and underground storage tanks for the WVDP and industrial clients.

Managed site characterization, assessment, environmental compliance, data evaluation, mixed waste sampling and management programs, pathway assessment, health and safety, real time air monitoring, procedure and plan development, and program management including budget and schedule management.

Managed the preparation of Best Management Practices Plans and Pollution Prevention Plans for storm water management at the WVDP

Managed field efforts and prepared portions of two environmental information documents (EIDs) for WVNS to support an Environmental Impact Statement (EIS) including a radiological survey EID and a soil characterization EID.

Co-preparer of various West Valley project-controlling environmental documents such as sampling and analysis plans for soil and groundwater investigations for WVNS in support of an EIS and RCRA Facility Investigation (RFI) as well as the development of portions of an EIS,

RCRA integration plan, and facility unit historical review document.

Managed the investigations associated with the RCRA Facility Investigation (RFI) including preparation of work plans, interim measures plans, 9 RCRA RFI reports for 27 mixed waste and solid waste management units (SWMUs), as well as support during negotiations and quarterly progress meetings with the USEPA, NYSDEC, and DOE.

Managed and participated in the planning for and installation of monitoring wells, soil borings, and surface soil, water, and sediment sampling including a comprehensive sediment sampling of waste water lagoons, data validation, and management at WVDP.

Managed portions of a radiological groundwater plume delineation including the installation of 80 borings using cost-effective conventional and direct push methodology to reduce investigative-derived waste while sampling groundwater and soils. This program included a groundwater seep investigation, installation of recovery wells, and source identification.

Managed the installation of piezometers and wells at the WVDP to assist in monitoring the effectiveness of a groundwater interceptor trench.

Managed the development of initial waste management/closure plans for decommissioning

Conducted real time air monitoring for volatile organic compounds associated with spills and leaks.

Coordinated seminars on total cost control and data validation.

Responded to and managed the clean-up of a petroleum spill at an private industry that contaminated a creek in Orchard Park, New York.

CAMP, DRESSER & McKEE, 1984-1989

Mr. Gorton was the Field Investigation Manager and Regional Health & Safety Supervisor, Edison, New Jersey; New York, New York; and Western New York Operations. . **As field operations manager**, responsibilities were to market, supervise staff, coordinate and conduct environmental oversight and remedial investigations/remediation. **As regional health and safety supervisor**, responsibilities were to manage the health and safety policies of CDM, including medical monitoring, training, and health and safety plan development and approval for hazardous and mixed waste operations in accordance with OSHA industrial and construction industry standards Several examples of completed.

Key projects include:

Provided technical support for 20 large and small remedial Investigation/feasibility studies

(RI/FS) for the USEPA REMFIT program in New Jersey and New York ,

Completed environmental field management and sampling for major superfund sites in New York and New Jersey

Provided Health and Safety management, oversight, support, and training including the developed and/or approved of all health and safety plans for employees, subcontractors, and consultants at all New York and New Jersey hazardous waste and petroleum remediation projects.

Field manager of remediation of an acid spill at the Niagara Falls, New York, wastewater treatment plant.

Provided spill response, control and mitigation of a gasoline spill in North Tonawanda, New York.

For AT&T Bell Laboratories, Mr. Gorton managed the development of environmental compliance manuals for six major research and development facilities in New Jersey, Pennsylvania, Illinois, Massachusetts, Ohio, and Georgia.

ECOLOGY AND ENVIRONMENT, INC., 1979-1984

Mr. Gorton was the Assistant Corporate Health and Safety Director and Hazardous Waste Team Member for Ecology and Environment, Inc headquarters office, Buffalo, New York.

As assistant corporate health and safety director, responsibilities included coordinating the corporate OSHA health and safety program for over 300 employees engaged in hazardous waste RI/FS programs nationwide including site audits and training programs. This included training, and personnel protection coordination including medical examinations and respiratory protection fit testing.

As a member of the hazardous waste group, responsibilities included participation in over 100 waste site investigations, sampling projects, and spill responses across the country. Duties included field surveys and oversight including air monitoring surveys at waste sites, spills, industries, and public buildings as well as field assessment and sampling for unknown contaminants in surface and subsurface soil, surface and groundwater, drums, tanks, buildings, and lagoons; development of bid specifications, drilling support and supervision, and sample packaging and shipping. Several examples of completed projects are presented below:

Key projects included:

Member of the team that developed the original levels of personal protection and procedures for the original USEPA Field Investigation Team (FIT) contract which was the original hazardous waste field operations in the United States.

USEPA Oil and Hazardous Substances Spill Prevention and Emergency Response Team -

Supported the original USEPA Technical Assistance Team (TAT) chemical and petroleum spill contract and managed the special project fund for 12 regional TAT office across the US. Project included performing field audits, health and safety corporate management and management funds from USEPA for specific projects which required weekly interaction with TAT office managers across the US.

Managed the purchase of state-of-the art equipment to support nationwide investigations and remediation of uncontrolled waste sites.

Member of the emergency oil and waste spill response team and participated and/or audited over 10 oil, gas and chemical spill responses.

Planned and participated in a sampling program for dioxin contamination on Johnson Atoll in the Central Pacific.

Field Investigation, sample management and health and safety for a subsurface soil investigation at the Southern Pacific Railroad site in Sacramento, California

Field investigation and sample management at the Bowers Landfill, Circleville, Ohio

Site Safety coordination, sampling and real-time air monitoring at the Chemdyne site, Hamilton, Ohio

Field investigation, site safety and air monitoring at Envirochem site, Indianapolis, Indiana

Site safety and air monitoring at the Fultz landfill site, Cambridge, Ohio

Site safety and air monitoring at the Buckeye Landfill site, St. Clarksville, Ohio

Field investigation, safety and air monitoring at the New Lyme site, Ashtabula, Ohio

Field investigation, technical consultation, and audit at the Toftdahl-Davis Farm site, Clark County, Washington

OVA and HUN real time organic vapor monitoring training, Denver, Colorado

Technical advisor and site safety at Western Processing Site, Seattle, Washington

Team leader of groundwater investigation at Petro Processing site, Baton Rouge, La

Investigation leader, safety and air monitoring at Old Mill Site, Rock Creek, Ohio

Well sampling and site overland survey support, Full Brothers Landfill, Cheektowaga, New York
Air monitoring and safety audit at Hyde Park Landfill, Niagara falls, New York

Air monitoring and site safety support at Love Canal site, Niagara Falls, New York
