Draft Investigation Work Plan for Brownfield Site Available for Public Comment

The public is invited to comment on a draft work plan being reviewed by the New York State Department of Environmental Conservation (NYSDEC) to investigate the Albany & Wrentham LLC site ("site") located at 520 Albany Avenue in the city of Kingston, Ulster County. Please see the map for the site location.

Draft Investigation Work Plan: The draft investigation work plan, called a "Remedial Investigation Work Plan," (RIWP) was submitted to NYSDEC under New York's Brownfield Cleanup Program. The investigation will be performed by Albany & Wrentham LLC ("applicant") with oversight by NYSDEC and the New York State Department of Health (NYSDOH).

How to Comment: NYSDEC is accepting written comments about the Draft RIWP for 30 days, from **May 19 through June 18, 2021**.

- Access the RIWP and other project documents online through the DECinfo Locator:
<https://www.dec.ny.gov/data/DecDocs/C356057/>.
- Documents also are available at the location(s) identified at left under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

Highlights of the Proposed Site Investigation: The investigation will define the nature and extent of contamination in soil, groundwater, soil vapor and any other parts of the environment that may be affected.

Previous investigations have detected volatile organic compounds (VOCs) in soil, groundwater, and soil vapor on site.

Key components of the investigation work include:

- Drilling and sampling soil borings to identify possible on-site sources of contamination;
- Collecting soil vapor, sub-slab soil vapor, and indoor air samples; and
- Sampling existing groundwater wells to monitor impacts from areas of concern both on-site and off-site.

BROWNFIELD CLEANUP PROGRAM

Next Steps: NYSDEC will consider public comments, revise the plan as necessary, and approve the work plan. NYSDOH must concur with the plan. After the work plan is approved, the activities detailed in the work plan will be implemented.

When the investigation is completed, a report will be prepared and submitted to NYSDEC that summarizes the results. NYSDEC will review the report, make any necessary revisions and, if appropriate, approve the report.

After the investigation, a proposed cleanup plan, called a "Draft Remedial Work Plan" will be developed. The cleanup plan will include an evaluation of the proposed site remedy, or recommend a no action or no further action alternative. The goal of the cleanup plan is to ensure the protection of public health and the environment. NYSDEC will present the proposed cleanup plan to the public for its review and comment during a 45-day comment period.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description: The site is a 0.74-acre rectangular shaped parcel bordered to the northwest by Albany Avenue and to the northeast by Wrentham Street. The site was historically used as an automotive repair garage and more recently a dry cleaner from the 1950s to the 1980s. The site currently contains an approximately 4,500 square foot single story commercial building out of which two commercial businesses operate.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database

(by entering the site ID, C356057) at:

<https://www.dec.ny.gov/cfm/xtapps/derexternal/index.cfm?pageid=3>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://www.dec.ny.gov/chemical/8450.html>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
