

Make a Milk Box Boat & Help the Environment

When you recycle a milk carton, you can make a boat that really moves !

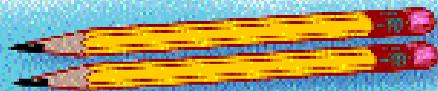

You'll Need:

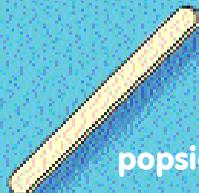

milk carton (pint)

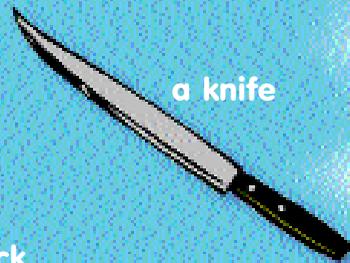

rubber band

2 long pencils

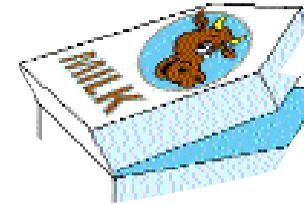

popsicle stick

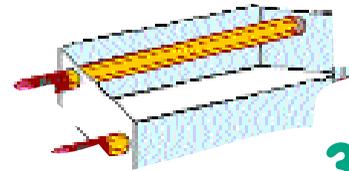

a knife

What To Do: (...and how to do it)

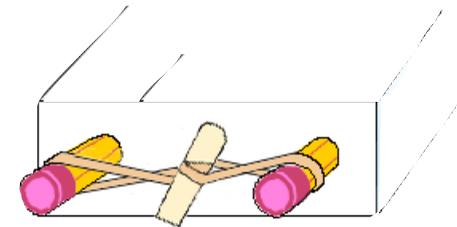

1. With the help of an adult cut a small milk carton (pint) and a popsicle stick in half. One milk carton can make two boats.

2. Insert the pencils just like in the picture.

3. Tie the popsicle stick in the middle of the rubber band. Stretch the rubber band around the pencils. The pencils must stick out far enough so the popsicle stick does not hit the carton when it's spinning.

4. Twist the stick around the rubber band and let go. The stick will spin like a propeller.

5. Put your boat in water and watch it go.

6. Recycle the milk carton when you're done!

... MAKE TWO BOATS AND HAVE RACES...
