

## Stewardship

means managing and protecting our natural resources  
—wildlife, trees, plants, water and land—  
so people in the future will also be able to use and enjoy them.

**Stewardship begins with you!**

Write down some ways you can help natural resources in the campground.

## ANIMALS

1. I will sit quietly and watch for wildlife.  
My sudden movement will scare them away.
2. I'll let wild animals eat their own food, not mine!
- 3.

## LAKES, STREAMS & PONDS

1. I'll wash my hands, face and hair only in the bathroom.
2. I'm going to use steel sinkers for fishing because lead sinkers can poison ducks, geese and other water birds.
- 3.

## TREES & PLANTS

1. I'll bring my own firewood to the campground.
2. I'm going to leave flowers and plants along the trails so others can enjoy them like I did.
- 3.

## LANDS & TRAILS

1. I'll pick up any trash and litter I find in the campground, and recycle what I can.
2. I will always stay on the marked trails because I can cause erosion if I wander off the trail.
- 3.
