

# Presenting...

THE NEW YORK  
STATE TREE

# The Sugar Maple

## Special Features

Maple trees are found throughout New York State. They like cool regions best. Maples are hardwood trees that lose their leaves in the fall.

## Used by Animals

Seeds, buds and flowers are eaten by many animals including turkeys, songbirds, mice, porcupines, deer, rabbits and chipmunks.

## Used by Humans

Maple sugar and maple syrup are made from maple sap. The wood is used for furniture, floors and firewood.

Draw a picture of a tree.

Draw a picture of  
its leaf or seed.

List animals you have  
seen near or in it.
