BEGINNERS BIRDING CHALLENGE Find these 10 common New York birds

Birding is an activity enjoyed by many New Yorkers of all ages and abilities, and is a great way to connect with the outdoor world. Like people, different birds like to live in different places or habitats. The following common birds are typical of habitats in New York State. Use your observation skills and see if you can find these birds in their preferred habitats near your home. Successfully complete your challenge and you will be entered into a drawing for fun birding accessories. Open to NYS residents 16 years old and younger.

Bonus: Find five of these birds on New York State Birding Trail Sites and earn an extra entry. Find New York State Birding Trail sites at ibirdny.org.

Name of Birder:

Address: State: Zip: City: _____ Email: House Sparrow The house sparrow is one of the more common Date Sighted: Time: birds in the world. Challenge winners will be announced in October.

Age:

Blue Jay	Noisy, raucous, and aggressive at feeders, the blue jay is a bright blue bird with a noticeable crest atop its head. It has a grayish face and underside, and a black necklace. Common in woods and near homes, jays will mob hawks and owls to drive them away. Listen for its loud "Jay" call; you might hear it before you see it! Length: 11 to 12 inches	Date Sighted: Time: Town/City Sighted: Is this a NYS Birding Trail site? Yes No Habitat: Wooded Area Field Roadside Wetland Pond, Lake, Stream Ocean Birdfeeder Park Playground Other:
Black-capped Chickadee	Named after its distinctive chick-a-dee-dee-dee call, the chickadee is one of the friendliest birds around. They are very curious and will often fly right up to a person to investigate them and can sometimes be fed by hand. The chickadee has a black cap and throat with white cheeks. Length: 4 to 6 inches.	Date Sighted: Time: Town/City Sighted: Is this a NYS Birding Trail site? Yes No Habitat: Wooded Area Field Roadside Wetland Pond, Lake, Stream Ocean Birdfeeder Park Playground Other:
Mourning Dove	Similar to the chickadee, the mourning dove is named after its primary call - a gloomy cooing sound. Mourning doves are commonly seen picking up seeds and grit on the ground. When disturbed they take off like a rocket. Mourning doves are brown to pinkish tan in color with black spots on the wings and black tips on their pointed tail feathers. Length: 11 to 12 inches.	Date Sighted: Time: Town/City Sighted: Is this a NYS Birding Trail site? Yes No Habitat: Wooded Area Field Roadside Wetland Pond, Lake, Stream Ocean Birdfeeder Park Playground Other:
Red-tailed Hawk	The most popular hawk in North America, the red-tailed hawk can often be seen perched on a telephone pole or tree limb or slowly circling high in the air. Red-tailed hawks can be identified by their rusty red upper tail feathers. Length: 18 to 26 inches.	Date Sighted: Time: Town/City Sighted: Is this a NYS Birding Trail site? Yes No Habitat: Wooded Area Field Roadside Wetland Pond, Lake, Stream Ocean Birdfeeder Park Playground Other:
Red-winged Blackbird	Named after the distinctive red shoulder patches of the male, the red-winged blackbird is one of the most abundant birds in North America. Males like to be noticed and are very vocal, belting out a distinctive <i>konk-la-ree</i> call. Length: 7 to 9.5 inches.	Date Sighted: Time: Town/City Sighted: Is this a NYS Birding Trail site? Yes No Habitat: Wooded Area Field Roadside Wetland Pond, Lake, Stream Ocean Birdfeeder Park Playground Other:
Mallard Duck	Mallards are one of the most abundant ducks in the world and very popular with New York duck hunters. The male mallard can be identified by its gleaming green head and curled black tail feathers. The female is brown in color. Both sexes have a white-bordered blue patch on the wing. Length: 20 to 26 inches.	Date Sighted: Time: Town/City Sighted: Is this a NYS Birding Trail site? Yes No Habitat: Wooded Area Field Roadside Wetland Pond, Lake, Stream Ocean Birdfeeder Park Playground Other:
