Form CA-2.2B – Demonstration of Eligibility

Enter the SF₆ emissions rate for the transmission and/or distribution entity. Enter the applicable emissions rate performance standard at 6 NYCRR Item 242-10.5(b)(1)(ii), Table 1 that applies to the transmission and/or distribution entity.

Baseline SF₆ Entity-wide Emissions Rate

Applicable Performance Standard Emissions Rate

If the entity-wide emissions rate is less than the applicable emissions rate performance standard, then Form CA-2.2B is complete.

If the entity-wide emissions rate is greater than the applicable emissions rate performance standard, check the applicable boxes below to indicate that documentation of the following is attached:

- A. The project is being implemented at a transmission and/or distribution entity serving a predominantly urban service territory; and

At least two of the following factors prevent optimal management of SF₆:

- B. The entity is comprised of older than average installed transmission and distribution equipment in relation to the national average age of equipment.
- C. A majority of the entity's electricity load is served by equipment that is located underground, and poor accessibility of such underground equipment precludes management of SF₆ emissions through regular ongoing maintenance.
- D. Inability to take a substantial portion of equipment out of service, as such activity would impair system reliability.
- E. Required equipment purpose or design for a substantial portion of the entity's transmission and distribution equipment results in inherently leak-prone equipment.

Each attachment must include a header that indicates it is an attachment to Form CA-2.2B and identifies the offset project name and offset project ID code.
