

I NY BEGINNERS BIRDING CHALLENGE

Find these 10 common New York birds

Department of Environmental Conservation

Birding is a sport enjoyed by thousands of New Yorkers of all ages and abilities and is a great way to connect with the outdoor world. Like people — some of whom prefer to live in cities, others in the country — different birds like to live in different places or habitats. The following common birds are typical of various habitats in New York State. Be a bird detective and see if you can find these birds in their preferred habitats. Successfully complete your challenge and you will receive an official I BIRD NY certificate and bracelet and be entered into a drawing for fun birding accessories. Open to NYS Residents 16 yrs old and younger.

Name of Bird Detective: _____ Age: _____

Address: _____

City: _____ State: _____ Zip: _____

Email: _____

House Sparrow

The house sparrow is one of the more common birds in the world. Not native to this country, it was first introduced to the United States in Brooklyn in 1851. Male house sparrows have a gray cap on their heads framed by brown with white cheeks and a black neck.

Length: 5 to 7 inches.

Date Sighted: ___/___/___ Time: _____

Where Sighted: Town/City _____

Habitat: Wooded Area Field Roadside

Wetland Pond, Lake, or Stream Ocean

Birdfeeder Park Playground

Other: _____

American Robin

One of the first birds seen as spring arrives in New York, robins can often be seen hopping around the ground pulling earthworms. The robin's cheery call can be heard at first light. Robins can be identified by their rusty orange chest.

Length: 9 to 11 inches.

Date Sighted: ___/___/___ Time: _____

Where Sighted: Town/City _____

Habitat: Wooded Area Field Roadside

Wetland Pond, Lake, or Stream Ocean

Birdfeeder Park Playground

Other: _____

European Starling

Like the house sparrow, the starling is not native to this country. They were first introduced to North America in 1890 from Europe. Starlings can form large flocks in fall and winter. Starlings change color by season, from purplish green in the summer to brownish black with white spots in the winter.

Length: approx. 8 inches.

Date Sighted: ___/___/___ Time: _____

Where Sighted: Town/City _____

Habitat: Wooded Area Field Roadside

Wetland Pond, Lake, or Stream Ocean

Birdfeeder Park Playground

Other: _____

Northern Cardinal

The northern cardinal is one of the country's most distinguishable birds given the male's bright red color. The cardinal has slowly expanded its range northward and is now found in most states east of the Mississippi River. Male cardinals are bright red in color. Female cardinals are brownish-gray with red tinges on their crest (top of head), wings and tail.

Length: 8 to 9 inches.

Date Sighted: ___/___/___ Time: _____

Where Sighted: Town/City _____

Habitat: Wooded Area Field Roadside

Wetland Pond, Lake, or Stream Ocean

Birdfeeder Park Playground

Other: _____

Northern Mockingbird

As its name implies, the mockingbird is famous for imitating the calls of other birds. Mockingbirds like to make their presence known by perching on fence posts and other prominent areas. They are very aggressive toward other birds entering their territory. Mockingbirds are gray-brown with white patches on their wings and outer tail feathers.

Length: 8 to 11 inches.

Date Sighted: ___/___/___ Time: _____

Where Sighted: Town/City _____

Habitat: Wooded Area Field Roadside

Wetland Pond, Lake, or Stream Ocean

Birdfeeder Park Playground

Other: _____

Black-capped Chickadee

Named after its distinctive *chick-a-dee-dee-dee* call, the chickadee is one of the friendliest birds around. They are very curious and will often fly right up to a person to investigate them and can sometimes be fed by hand. The chickadee has a black cap and throat with white cheeks.

Length: 4 to 6 inches.

Date Sighted: ___/___/___ Time: _____
Where Sighted: Town/City _____
Habitat: Wooded Area Field Roadside
Wetland Pond, Lake, or Stream Ocean
Birdfeeder Park Playground
Other: _____

Mourning Dove

Similar to the chickadee, the mourning dove is named after its primary call - a gloomy cooing sound. Mourning doves are commonly seen picking up seeds and grit on the ground. When disturbed they take off like a rocket. Mourning doves are brown to pinkish tan in color with black spots on the wings and black tips on their pointed tail feathers.

Length: 11 to 12 inches.

Date Sighted: ___/___/___ Time: _____
Where Sighted: Town/City _____
Habitat: Wooded Area Field Roadside
Wetland Pond, Lake, or Stream Ocean
Birdfeeder Park Playground
Other: _____

Red-tailed Hawk

The most popular hawk in North America, the red-tailed hawk can often be seen perched on a telephone pole or tree limb or slowly circling high in the air. Red-tailed hawks can be identified by their rusty red upper tail feathers.

Length: 18 to 26 inches.

Date Sighted: ___/___/___ Time: _____
Where Sighted: Town/City _____
Habitat: Wooded Area Field Roadside
Wetland Pond, Lake, or Stream Ocean
Birdfeeder Park Playground
Other: _____

Red-winged Blackbird

Named after the distinctive red shoulder patches of the male, the red-winged blackbird is one of the most abundant birds in North America. Males like to be noticed and are very vocal, belting out a distinctive *konk-la-ree* call.

Length: 7 to 9.5 inches.

Date Sighted: ___/___/___ Time: _____
Where Sighted: Town/City _____
Habitat: Wooded Area Field Roadside
Wetland Pond, Lake, or Stream Ocean
Birdfeeder Park Playground
Other: _____

Mallard Duck

Mallards are one of the most abundant ducks in the world and very popular with New York duck hunters. The male mallard can be identified by its gleaming green head and curled black tail feathers. The female is brown in color. Both sexes have a white-bordered blue patch on the wing.

Length: 20 to 26 inches.

Date Sighted: ___/___/___ Time: _____
Where Sighted: Town/City _____
Habitat: Wooded Area Field Roadside
Wetland Pond, Lake, or Stream Ocean
Birdfeeder Park Playground
Other: _____
