Vehicle Emissions Certification

The vehicle's emissions certification can be found on the vehicle emission control information (VECI) label located in the vehicle's engine compartment. The VECI label includes emissions certification, engine family or test group, engine displacement, OBD, model year, fuel type, and catalyst information. Sample VECI labels are shown below. The CARB certified and 50-state certified vehicles (Examples 1-3) are subject to CARB certified AMCC requirements.

Example 1 - Sample CARB Certified VECI Label
If the VECI cannot be located, an OEM dealer may be contacted to obtain a replacement VECI label containing the correct test group or engine family information.
