

Sentinel Range Wilderness - Pitchoff Mountain

Pitchoff Mountain (3,600 ft.) Trail extends 4.3 miles over the summit between two trailheads located on State Route 73. The trail ascends 1.9 miles and 1,400 feet from the Pitchoff Mountain West Trailhead. Parking for the Pitchoff Mountain West Trailhead is in any of the many parking areas along Route 73 that are shared with the Cascade Mountain Trailhead which is located within the High Peaks Wilderness. At approximately the 1.2-mile mark a 0.1-mile spur trail leads to the "Balanced Boulders" and a view of the Cascade Lakes, Cascade Mountain and other High Peaks. The upper reaches of the west trail and the ridgeline on the east trail are on open bedrock and provide many opportunities for taking in the views of the surrounding mountains.
