HEARINGS AND MEDIATION SERVICES

Dear Mr McClymonds

I am writing to you in opposition to CWM's application for expanding their Model City hazardous waste landfill operation. For the last 30 years. we have been the dumping ground for over 8 million tons of hazardous waste in our community, buried less than a mile from our school. **Enough is enough!**

The NYSDEC has stated, on record, in their hazardous waste siting plan that no additional landfill space is needed in New York. Furthermore, an expansion is absolutely not in the public's best interest. We have had to share our roads with 80,000 lb trucks that have rolled over near our school and were involved in a fatal accident three years ago. **Enough is enough!**

The last thing that our community needs is 40 more years of the environmental degradation, safety and health risks and the compromising of our quality of life that would accompany further CWM's operations.

The 20,000 + hazardous waste trucks, 40 million gallon lagoons and destruction of 40 more acres of land near our schools is unacceptable. There is currently the equivalent of 400 Love Canals buried within CWM property. **Enough is enough!**

Respectfully yours,  

James T. McClymonds
