Subject: Snyder 1-A Drilling Permit Application Request for Additional Information

Mr. Schultz, one additional item that I neglected to add to my June 22 e-mails requesting additional information to supplement the Tioga Energy Partners proposed Snyder 1 and Snyder 1-A applications is information related to the blow-out prevention equipment that is proposed to be used during drilling operations. We are requesting that the application be supplemented with information on the type and the pressure rating of the proposed blow-out prevention equipment that the drilling company proposes to use. This information can be included with submittals made in response to the June 22 requests.

Please don't hesitate to call me at if you have any questions.
