WELL NAME: Snyder E 1-A

API NUMBER: 31-107-30000-01-00

From: Adam Schultz (applicant) to Peter Briggs (NYSDEC-DMN)

Date: January 8, 2018

Re: Water well monitoring plan for subject well

1. Applicant plans to sample and evaluate farm pond and all accessible (landowner opt in) **private water wells within 3,000 feet of well's surface location.**
2. Applicant plans to evaluate samples for NYSDOH recommended parameters per 2015 Final SGEIS, Page 7-46, Table 7.3. Static water level will be measured if possible due to well construction.
3. Water samples will be collected by a qualified professional and analyzed utilizing a NYSDOH ELAP approved laboratory, including the use of proper sampling and laboratory protocol, in addition to the use of proper sample containers, preservation methods, holding times, chain of custody, analytical methods, and laboratory QA/QC.
