Re: Tioga Energy Partners, LLC  
Snyder E 1 (API 31-107-30000-00-00)  
Snyder E 1-A (API 31-107-30000-01-00)

Dear Ms. Collart:

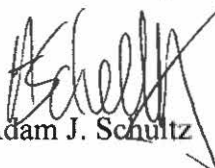

This office represents Tioga Energy Partners, LLC (“TEP”) regarding the above-referenced applications. Attached please find correspondence from Casella Waste Services affirming their ability and willingness to accept drilling and well completion fluids.

After the well is completed and during the production life of the well, we anticipate that an average of two to four truck (typically, pick-up trucks) trips per week will be associated with activity at the well site.

If you have any questions or comments, please contact me.

Very truly yours,

COUCH WHITE, LLP

**Re: Tioga Energy Partners - Snyder Wells E1 and E1-A  
Drill Cuttings and Flowback Waste Disposal**

Mr. Smith:

Thank you for your inquiry regarding disposal of drilling and completion fluids. Our McKean County Landfill, in Mount Jewitt, PA., can accept solid and solidified liquid waste, such as drill cuttings, water and oil based drilling fluids and flowback and production fluids. We are permitted to provide liquid solidification at the facility, if required, prior to disposal in the landfill. The McKean County Landfill operates under PADEP permit #100361 which authorizes acceptance and solidification of these types of waste. The waste material must be characterized and approved by Casella and PADEP prior to acceptance at the facility.

If you have any questions or require anything further, please contact me. We look forward to working with your company.

Sincerely,

**CASELLA WASTE SERVICES**
