

Tire Stockpiles Over Primary Aquifers

Division of Solid & Hazardous Materials
Bureau of Solid Waste, Reduction, and Recycling

Name	County	Quantity
New York Tire Izzo Property Lot 65 Newport Rd.	Suffolk Onondaga	2000000 8000

Usage Notes (Primary Aquifer Dataset):

1. There are some polygons which are not considered part of the primary aquifer because of certain geological conditions. Cortland, for instance, has a round rock knob located within the primary aquifer. These polygons were deleted from the aquifer region subclass.
2. The polygon theme includes those areas which are not considered part of the prime aquifer.
3. The digitization involved folded paper maps, leading to poor precision.
4. No USGS reports were done for Long Island but the region is included because it is a Sole Source aquifer
