Health and Safety
• Development of Health and Safety Plan.
• Site Safety Officer to implement and enforce health and safety controls.
• Workers will be identified by ID badges and high-visibility clothing.
• Temporary construction fencing will be established at the work zone perimeter to restrict access. The fence may be covered with fabric to obstruct views of the ongoing work.

Health and Safety Controls
• Safe passage across foot bridges will be controlled by flag person.
• A Community Air Monitoring Plan will be developed.
• Air monitoring equipment will be placed on the work area perimeter to monitor for dust and other airborne contaminants.
• Erosion and sedimentation controls will be established.
• Soil piles may be covered with tarps or foam sprays to neutralize or control odors.
