Read the following article and answer the questions.

From the Mountains to the Sea

High in the Adirondack Mountains, surrounded by evergreen trees, is a little pond called Lake Tear of the Clouds. The tiny brook that flows from Lake Tear is starting a journey 315 miles long. Joining with many other streams, it will become the mighty Hudson River flowing to New York Harbor.

At first, the Hudson rushes downhill over waterfalls and rapids. The water from Lake Tear drops 4,000 feet as its course winds through the Adirondacks to the city of Glens Falls.

In Fort Edward, a few miles south of Glens Falls, the Hudson becomes a canal. The river flows downstream over a set of dams, each with a lock that raises or lowers boats from one section of the river to the next.

From the Mountains to the Sea
The last of these dams and locks is at Troy. When the Hudson goes over this dam, it drops almost to sea level. Even though the Atlantic Ocean is more than 150 miles away, it influences the river all the way to Troy. The water level here goes up and down with ocean tides. These are the same high and low tides that affect beaches on Long Island and the New Jersey shore.

Closer to the Atlantic, the river flows through mountains called the Hudson Highlands. Here the ocean starts to influence the Hudson in another way. Seawater pushes into the Hudson and mixes with fresh water, making the river taste slightly salty. This mix of salt and fresh water is called brackish water. Places where this mixing occurs are called estuaries.

The Hudson River estuary becomes saltier as it nears New York City and the Atlantic Ocean. Here people catch flounder and other fish of the sea. Cruise ships sail in from the ocean to dock at river piers.

Perhaps the estuary’s brackish water and tides gave the explorer Henry Hudson hope that this river would lead to the Pacific Ocean and China. He sailed up the river on his ship the Half Moon in 1609. He was disappointed in the end, but his voyage was remembered. This great river flowing from the Adirondacks to the Atlantic was named after him.
1. This article is mostly about
   a. how people use the Hudson River
   b. the kinds of fish that live in the Hudson River
   c. the course of the Hudson River
   d. Lake Tear of the Clouds

2. Where did the Hudson River get its name?
   a. from an explorer
   b. from a Native American
   c. from a fish found in the sea
   d. from an estuary

3. What is an estuary?
   a. a stream with rapids and waterfalls
   b. a place where fresh water and salty ocean water mix
   c. a kind of ship
   d. a water route to Asia

4. Where does the Hudson River begin its journey?
   a. the City of Troy
   b. the Adirondack Mountains
   c. the Hudson Highlands
   d. the Atlantic Ocean

5. Do you think the Hudson goes over any waterfalls between the dam at Troy and the Atlantic Ocean? Why or why not?

6. Challenge question: Why do you think Henry Hudson decided that this river did not lead all the way to China?
