Accessing NFPA Standards referenced in Proposed 6 NYCRR Part 570

The proposed regulation for Liquefied Natural Gas (6 NYCRR Part 570) incorporates by reference two standards from the National Fire Protection Association (NFPA). These standards are available for reviewing on the NFPA website. Free public access is available for all NFPA standards by following the directions below. There are no restrictions to access these standards, however, you must create an account. The documents are designed to be only viewed on-line.

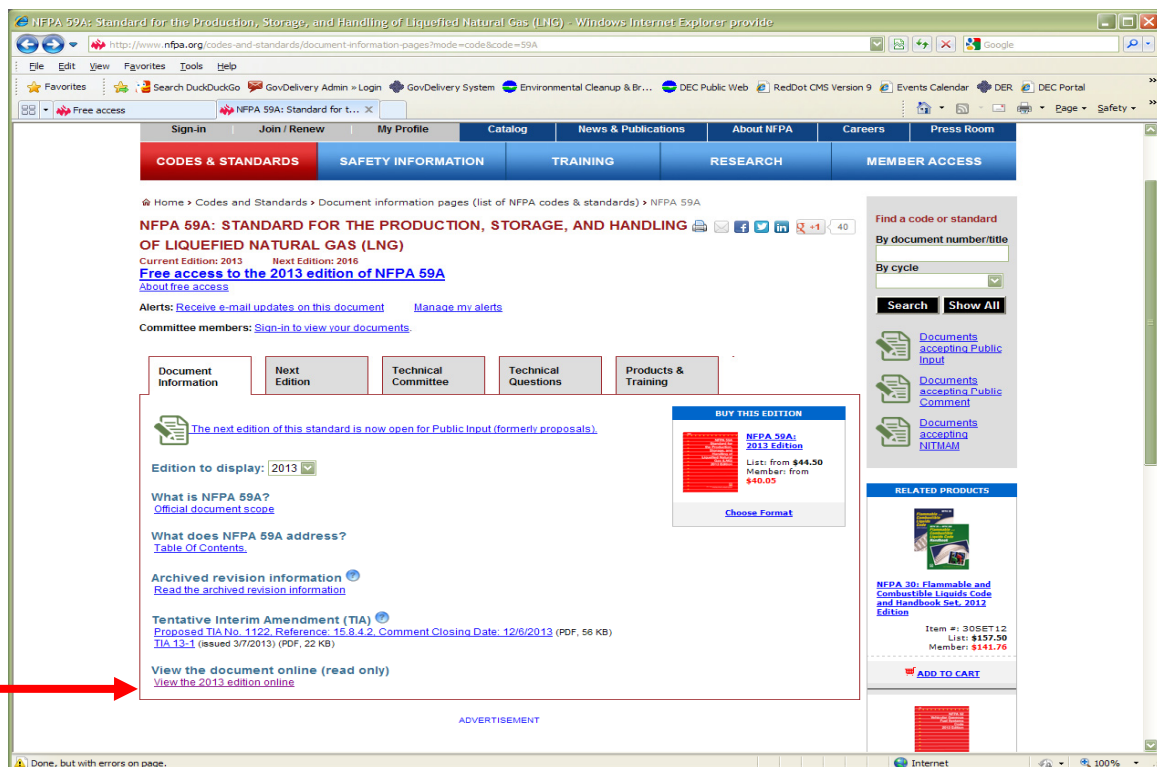

- Go to: <http://www.nfpa.org/codes-and-standards/free-access>
- Click on [View the full list of NFPA's codes and standards.](#)

The screenshot shows the NFPA website interface. At the top, there's a navigation bar with links like 'Sign-in', 'Join / Renew', 'My Profile', 'Catalog', 'News & Publications', 'About NFPA', 'Careers', and 'Press Room'. Below this is a search bar and a 'Free access' button. The main content area is titled 'FREE ACCESS' and 'NFPA makes important safety codes and standards available for free online'. It explains that NFPA provides online access to its consensus documents for public safety. A section titled 'To review codes and standards online:' lists steps: 1. View the full list of NFPA's codes and standards (highlighted with a red arrow), 2. Select the document you want to review, 3. Select the edition of the document you want to review, 4. Click the 'Free access' link (under the document title), and 5. You will be asked to 'sign-in' or create a profile to access the document in read-only format. On the right, there's a 'FEATURED PRODUCT' section for 'National Fire Codes Subscription Service All Access'. The bottom of the page shows a video player with a thumbnail of Jim Shannon.

- Scroll down and select (click on) the standard you wish to view. NFPA 52 and 59A are referenced in Proposed 6 NYCRR Part 570, Liquefied Natural Gas (LNG) regulations.

- Click on “View the 2013 Document Online”

- This will take you to a screen where you will click on “Create an Account”.
