The Representative Outfall waiver is being submitted after corrective actions have been completed and 2 consecutive semi-annual monitoring results show Benchmark Monitoring Cutoff Concentrations have not been exceeded for all outfalls at the facility. (Part IV.G.3.d)

1) Are substantially identical industrial activities being conducted in the areas discharging to the outfall that is being sampled and the outfall(s) for which a sampling waiver is being requested?
   - Yes
   - No
   **If NO, you are not eligible for this waiver.**

2) Are similar stormwater controls being implemented in the drainage area(s) discharging to the outfall being sampled and the outfall(s) for which the waiver is being claimed?
   - Yes
   - No
   **If NO, you are not eligible for this waiver.**

3) Do any of the outfalls for which the waiver is being claimed discharge to an impaired waterbody where the cause of the impairment is a pollutant of concern included in the benchmarks and/or effluent limitations to which the facility is subject to in Part VII of the MSGP?
   - Yes
   - No
   **If YES, you are not eligible for this waiver.**

4) The outfall that is being claimed as the representative outfall is:
   - Outfall No. ______

5) The outfall(s) for which the waiver is being claimed is/are:
   - Outfall No.(s) ______, ______, ______, ______, ______

All sections must be completed unless otherwise noted. Incomplete forms will result in ineligibility for this waiver claim and all applicable monitoring and sampling requirements must be performed. For each Representative Outfall being claimed a separate Representative Outfall Waiver Form must be completed and submitted.
6) For each outfall, provide an estimate of the Drainage Area (in acres), Impervious Area, Area of Exposed Materials (in acres) within the drainage area and Level of Industrial Activity within the drainage area:

<table>
<thead>
<tr>
<th>Outfall #</th>
<th>Drainage Area (ac)</th>
<th>Impervious Area (ac)</th>
<th>Area of Exposed Materials (ac)</th>
<th>Level of Industrial Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>○ Low ○ High</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>○ Low ○ High</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>○ Low ○ High</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>○ Low ○ High</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>○ Low ○ High</td>
</tr>
</tbody>
</table>

7) Provide a short description of why the outfall chosen as a representative outfall represents the worst case scenario (e.g. more industrial activity in the drainage area, more impervious area, etc.)

---

**Certification**

I certify under penalty of law that I have read and understand the eligibility requirements for claiming a condition of "Representative Outfall(s)." Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
