Mr. William J. Clarke
Regional Permit Administrator
NYS Department of Environmental Conservation
Region 4 – Division of Environmental Permits
1150 North Westcott Road
Schenectady, New York 12306-2014

Subject: Permit Application #4-0103-00016/00020
STERLING File #21033

Dear Mr. Clarke,

Norlite Corporation (Norlite) reviewed the proposed modification to the State Pollutant Discharge Elimination System (SPDES) Permit, SPDES #NY-000-4880 and DEC #4-0103-00016/00020 to address the potential discharge from the LGF Tanker Staging area and the Specification Used Oil Fuel Storage Area proposed to be issued by the New York State Department of Environmental Conservation (NYSDEC).

On behalf of Norlite, Sterling Environmental Engineering, P.C. provides this written notification that Norlite has decided to withdraw its application for modification of the permit at this time.

Norlite appreciates the efforts of the NYSDEC toward issuing the permit modification and looks forward to working with the NYSDEC in the future on all matters pertaining to the facility.

Should you have any questions regarding this letter, please contact me at (518) 456-4900.

Very truly yours,

STERLING ENVIRONMENTAL ENGINEERING, P.C.
